World News **Civic Forum** seeks to forge Czech coalition

Civic Forum, the Czechoslovak opposition movement, said last night that it would transform itself into a political party and offer coalition talks with all non-communist parties in order to form a government. In the capital, Prague, more than 250,000 demonstrators filled the central Wencesias Square in an angry protest against the Communist Party's domination of the country's proposed new government. Britain admits to withholding details on Rover

Page 16

FOREIGN AFFAIRS

Germany's future and a continent's

D 8523A

By Kevin Done, Motor Industry Correspondent, and Lucy Keilaway In Brussels

BRITAIN last night admitted that it had hidden from the of the sale. The Commission is consider-ing whether to reopen the European Commission key inquiry into the purchase price financial terms of last year's paid for Rover by BAe. It wants to reach a decision by takeover of Rover Gronp by the end of the year about whether to ask BAe to repay part or all of the £547m

British Aerospace. Sir Peter Gregson, perma-nent secretary at the Depart-ment of Trade and Industry, said that the Government had feared that disclosure of the hidden financial concessions, amounting to around £38m (\$60m) would damage its rela-tions with the European Commission

In the face of intense questioning by the Public Accounts select committee Sir Peter said that the Government had been "anxious" not to risk reopen-ing the European Commis-sion's examination of the state aid granted to Rover because it might have placed the sell-off

in jeopardy. He insisted that the secret financial concessions had been accounted for in varions reports to Parliament. But the Government was accused by Dr John Reid, from the Labour opposition, of deliberately "scattering" the information in different reports in order to suppress the information from Members of Parliament, members of the public and the European Commission Mr Dale Campbell-Savours

(Labour) accused Lord Young, Secretary of State for Trade and Industry at the time, of being "less than frank" in his statements to the House of Lords. He suggested that Lord Young had "conned" Mr Peter Sutherland, the EC Competition Commissioner at the time

Danish premier joins parties in finance bill pact

By Hilary Barnes in Copenhege

MR Poul Schlüter, Denmark's Prime Minister, has demonstrated that seven years at the helm have not blunted his political touch.

2

He has brought off a compro-mise on the 1990 finance bill between all six of the non-socialist parties, including the right-wing populist Progress Party which has voted against every finance bill since it entered the Folketing (parlia-ment) in 1973. He out-manoeuvred the Social Democratic opposition in the process, who had hoped to defeat the finance bill with the help of Progress Party votes and to force an

early general election. The Progress Party, started by Copenhagen lawyer Mogens Glistrup in 1972 when he demanded the abolition of income tax, has become responsible and the Social Democrats are now the coun-try's true protest party, say commentators in the pro-gov-

ernment newspapers. The creation of a conservative-liberal bloc could trans-form the political scene, as well as the life expectancy of Mr Schlüter's three-party minority coalition - including the Conservatives and the Liberal and Radical par-ties - which came into office following an election in May of last year. "A significant change in the front-lines," was how Mr Schlüter put it. But the new alliance may prove fragile. "The coalition

parties don't agree when it comes to their relationship with us," warned Mrs Pia Kja-ersgaard, the Progress Party leader. The Radicals are especially uneasy about keeping company with the Progress Party, which apart from its populist appeals for tax and public spending cuts also has a policy towards refugees which carries racist undertones.

The economics of the com-promise may turn out to be less satisfactory than the politics. The deal weakens fiscal policy and many economists think that the opportunity to swing the country into surplus on the current external account for the first time in 28 years - as predicted by the

Schlüter: fragile alliance

Economic Advisory Council last week - was blown by the Government. The compromise increases the cuts in budget spending (as compared with a no-change hudget) from the Government's original Kr8bn (\$1.17bn) to Kr11bn but it also puts more money in consum-ers' pockets.

The most controversial item in the deal is the abolition, with retroactive effect from 1988, of a tax penalty on bor-rowing for purposes other than mortgages and student loans. The tax was 20 per cent on the difference between interest outgoings and interest income as these featured on income

tax returns. Introduced in 1986, the tax contributed to an abrupt slow-down in consumer spending. Although high interest rates and low inflation should pre-vent a boom in debt-financed

consumer spending, as Mr Hen-ning Dyremose, the finance minister, said hopefully, others fear that the psychological effect of removing the tax could nevertheless set off a sig-

nificant rise in spending. Other major items in the finance bill are a reduction in the corporate income tax rate from 50 to 40 per cent and reductions in several excise taxes on goods affected by border trade with Germany.

German unification moves up the agenda

interest of people living here." New Forum said that a uni-tary German state could no

longer be seen as as "an unthinkable Utopia", but underlined that it could only

become feasible if East and West Germany abandoned their "military commitments" to the Wareaw Pact and Nato respectively. Its statement

respectively. Its statement throws attention on to the key question deliberately sidestep-ped in Mr Kohl's speech: Could reunification come abont within the present framework of the two military alliances? Mr Kohl relegated the mili-tary security question to num-

By David Marsh in Bonn

A DOUR joke relayed over East German radio last week spoke of Mr Leonid Brezhnev, the for-mer Soviet leader, enthusiasti-cally inviting his aged mother to inspect his fine official resi-dence, Western limousines and DEITMAR KELLER, the new East German Culture Minister, yesterday apologised for his country's former culture policy. This is less surprising than it sounds as almost all East German political leaders are now either apologising for the past or - literally - on the run from it, writes David Goodhart in country home. After the showcountry nome. And the show-ing, his mother remained unimpressed. When Mr Brezh-nev asked her why, she exclaimed sadly: "Oh, my son: When the revolution comes, they will take them all away from you." that censorship was now abolished, although not of course discretion over who gets govenment hand-outs and who doesn't; culture pol-icy would forthwith be depoliticised, and the state would withdraw, as far as practical, from art.

The witticism, aptly reflecting the new-found liveli-ness of East German broadcast-ing, illustrates the daily media focus on the corruption of the Honocker paging Mindful of the void opening up, Mr Helmut Kohl, the West German Chancellor, did his best last week to plug a per-ceived gap in the Federal Republic's policies on unity. Significantly, his 10-point plan aimed at paying the way for an all-German federation, setting up as a starping since

focus on the corruption of the Honecker regime. Massive popular indignation about allegations of wrong-do-ings, together with the con-tinuing tide of emigres leaving for the West, swept away at the weekend the complete lead-ership of the Socialist Unity Party (SED). The East German revolution has left a power vacuum in East Berlin which many observers in both East and West believe will soon "confederative structures" between the two Germanys, has won a degree of support from some East German oppo-sition forces. The New Forum reformist group called yester-day for a referendum on Mr Kohl's proposals to explore the possibilities for steps "in the and West believe will soon become filled by growing pres-sure for German unification.

Ten-point unity plan sets Kohl and Genscher apart between Chancellor Helmut Kohl and Mr Hans-Dietrich Genscher, his Foreign Minister, has surfaced over the 10-point plau on German unity, writes David Marsh. In a radio interview yesterday, Mr Genscher underlined again the importance of assuring Poland that a reunited Germany would not make ter-ritorial claims by casting doubt on the Oder-Nelsse line drawn up as Poland's western border in 1945.

BARELY DISGUISED irritation his plan, leaving open the possibility between Chancellor Helmut Kohl and that Bonn could bow to right-wing

forces by questioning the validity of the post-war frontier. Many of the elements in Mr Kohl's proposals - above all, the ideas on forming a confederation between ths two Germanys as a stepping stone to an eventual federation ~ are supported by Mr Genscher. However, he was annoyed Oder-Neisse line drawn up as Poland's western border in 1945. Mr Genscher is disturbed that Mr Kohl did not make this point clear in

Bonn yesterday was the Chancellor's fear that Mr Genscher would undermine the speech's impact by giving advance details of it in a morning radio interview.

Signalling the poor state of relations between the Foreign Ministry and the Chancellor's office, Mr Genscher is also perturbed that Mr Kohl's desire for some form of unity with the East may dampen his willingness to go ahead with plane for Euromean moneters with plans for European monetary union (EMU).

He heaped praise upon the artists who have played such a prominent role in the opposition movement and pointed out that literature had a special cultural role when the official information media were not tell-ing the truth. He even compared the current interplay of arts and politics with the 1920s in the Soviet Union "before the Stalinist deg-

radation". Tatation". Dr Keller had also daringly called for the country's national anthem, written in 1948, to be sung in full. In recent years party leaders have had to hum the first verse because of its reference to a united Germany.

> ber 9 in his 10 points. This ber 9 in his 10 points. This stated the rather vague formu-lation that "overcoming the separation of Europe and of Germany requires speedy and far-reaching steps in disarma-ment and arms control." The Chancellor's sugges-

German federation. According to one estimate, a total of 100,000 troops from the US and Soviet Union could remain in the two Germanys as part of a gradual plan for a greatly demilitarised united Germany. Later, perhaps, depending very much on the policies of the Kremlin, they could be removed altogether. tions, announced to the Bund-estag last Tneeday, have ruf-fied feathers both within the centre-right coalition and the three Western allies. This is because of the lack of consulta-tion about the proposals, and because of their military implicould be removed altogether. This compares with the cations

roughly 800,000 foreign troops at present on German soil. The Bonn ambassadors of the US, Britain and France are

in Bonn for deeper extremely annoyed that they were informed of the proposals hy Mr Horst Teltschik, the Chancellor's security adviser, only after the speech had been given – and several hours after Mr Teltschik briefed the troop cuts By David Marsh press. The implications of propos-als on German unity for Nato and the Warsaw Pact have yet to be realised, let alone studied in detail, by Western govern-ments. But opinion is growing in Bonn that troops of Nato and the Soviet Union stationed in West and East Germany would have to be scaled down, perhaps to one third of present levels (or maybe more) to allow any chance of realisation of a German federation. According to one estimate, a

CALLS are growing within the CALLS are growing within the Bonn government to deepen planned cuts in the strength of the West German armed forces, the Bundeswehr, in line with the fast pace of East-West changes and the ebbing of superpower confrontation. Mr Gerhard Stoltenberg, the

Calls grow

Mr Gerhard Stoltenberg, the Defence Minister, who is pres-enting plans to the cabinet this week on cutting Bundeswehr personnel 15 per cent to 420,000 by the mid-1990s, stood firm yesterday against suggestions that the reductions did not go for enough.

that the reductions did not go far enough. Mr Stoltenberg, however, is being challenged by a strong body of opinion from the Free Democratic Party (FDP), junior partners in the government, to keep open options for a much more far-reaching lowering of troop numbers. Mr Stolten-herg's Christian Democrats suspect that the FDP is playing for electoral advantage by for electoral advantage by appealing to strong popular pressure for arms reductions. Mr Jürgen Möllemann, the FDP Education Minister, has

TDP Education Minister, has spoken out recently in favour of lowering the Bundeswehr's strength to 350,000, and drop-ping the conscription period to 12 months from 15 months. Mr Möllemann, echoing views known to find favour with Mr Hans-Dietrich Genscher, the Foreign Minis-ter, has also proposed scrap-ping the four-nation European Fighter Aircraft planned for the 1990s - a project which is failing foul of growing parlia-mentary opposition. Mr Stolkenberg said yester-day that he would not be changing the concept for cut-ting the Bundeswehr to 420,000 soldiars from its present

soldiers from its present 495,000 level when the cabinet 495,000 level when the cabinet discusses it tomorrow. The plan was put forward by Mr Stolkenberg and chiefs of the army, navy and air force at the end of October, and was given the blessing of coalition lead-ers last month. Mr Otto Lambsdorff, the FDP chairman, said yesterday that the Government should name no specific level of troop

tigious Institute of Prognostics : and who is widely tipped as a future Prime Minister. He argues that despite the Com-munist party's mismanage-ment of the economy, the "physical and human founda-

"physical and human founda-tions" remain for a remarkably swift economic recovery. Since the Prognostics Insti-tute was founded in 1986, it has provided the Government with reliable economic information and recommended sweeping reforms which, however, were blocked by the party. Undoubtedly, Czechoslo-vakia's starting point is much better than most Communist countries. Unlike in Poland or

countries. Unlike in Poland or the Soviet Union, food shops are filled with meat, sausage and pre-Christmas oranges and bananas. While choice is lim-ited by Western standards and packaging is poor, the variety equals that in neighbouring Hungary, while (subsidised)

Hungary, while (subsidised) prices are much lower. Dr Komarek insists, how-ever, that Gzechoslovakia can-not be compared with Hungary, but only with the West. In 1938, its industrial plant was on a par with Belgium's and the standard of living was well above that of Anstria. After the Communist takeover in 1948.

Communist takeover in 1948 heavy industry was expanded at a break-neck pace. Forty years on, Czechoslo-vakia ranks among the leading producers of steel, fuels and netal-bashing machinery but lags far behind in advanced electronics. A veritable glut of 15m tonnes of steel is pro-duced, or one tonne per capita-- more than any country surrout Luxemberger Excitnee except Luxenbourg Factories produce a range of trucks, buses and locomotives which Western coutries many times its size cannot match.

Giant englueering concerns, such as Skoda and Taira, cover virtually the entire range of products from nuclear and concoal are mined in the country, which generates 90bn Kw of electricity. But much of the DISCLOSURES of covert East German armaments sales to flict

\$50 seats - a bare majority -on October 29 but a court in Murcia later stripped him of a seat in the province and gave it to the Communist-led Izquierds Unida. A higher court overturned that ruling on Briday and insisted that all nine Murcla deputies must be elected again.

elected again. On Saturday, a Galician court ordered the entire elec-tion in Pontevedra to be held again, putting another Social-ist seat in danger, after uphold-ing allegations of voting fraud. Both elections will take place in the next fluxes months in the next three months. The apparent inability of the

Government to guarantee a fair election has profoundly emharrassed the Prime Minis-ter, and he said yesterday that he would ask for a vote of confidence after the two elections have been re-run.

Mr. Gonzalez opened the ses-sion by insisting that the Gov-ernment had no plans to harden already tough credit and fiscal policies. Measures already taken, he said, were "sufficient, are showing results, and should be evaluated calmly.

As he was speaking, the Bank of Spain announced that October's current account defi-cit had reached a record \$1.53bn (more than the first 10 months of last year together) to bring this year's 10-month deficit to \$8.4bn. Imports in October rose 25 per cent on October last year, while exports rose only 5 per cent, bringing the trade deficit for the year to \$19.8bn, a 60 per cent increase on 1988.

Obviously responding to election losses to the left, Mr Gonzalez said the Government would raise pensions to the same level as the minimum

wage and redesign the income tax regime to ease the burden on low earners.

From the handiest little portable, to the heavyweights ideal for head offices and major departments, all fax machines have one thing in common: their language of business travels along the telephone lines.

A CALL AND A CALL AND A CALL AND A CALL AND A CALL AND A CALL AND A CALL AND A CALL AND A CALL AND A CALL AND A

So as the people who lay and maintain more miles of the telephone network than anyone else, we at British Telecom are in a unique position to evaluate the machines that plug into them.

Now we offer a new range of six fax machines that spans the full spectrum of business needs.

At one end, the compact CF9 offers the small business a fax that's small enough to vice network.

sit neatly on a desk-top and light enough to carry with you - for just £645 + VAT. At the other end, for \$3,395 + VAT, the SF200 is one of the most powerful machines on the market.

Its 120-page memory means it can store large documents (handling A4, B4 and A3 originals), while its 100-number memory enables it to send to as many as 100 destinations one after the other, at a single command.

All our machines can be bought, rented or leased, and our terms include a full maintenance contract backed by our national ser-

Jakarta stock exchange faces test By John Murray Brown in

INDONESIA'S stock market reforms face a critical test today when trading starts in a large local eement company which many brokers fear could swamp the recently rejuve-nated Jakarta exchange.

Indocement, a company part owned by Mr Liem Sioe Liong, a local Chinese and a close business associate of President Suharto, is making a \$335m issue, in one stroke increasing Jakarta's market capitalisation by a third. It is not only the size that is

It is not only the size that is cause for concern. Indocement has failed to make profits in the last two years of operations, one of the few requirements for a company to receive listing approval. The eompany reported losses of Rupiah 77.9bn (£29m) last year and Rupiahs 97bn in 1987. In addition in 1985, faced with ercess canacity and large

with excess capacity and large debts, Indocement was \$325m bail-out through which the government took s 35 per cent equity stake.

New stock accounts for 75 per cent of the issue. However Mr Liem will receive about \$29m through the sale of exist-ing shares. Mr Sudwikatmono, the cousin and foster brother of President Suharto will receive \$6m. The government takes \$28m and will keep a 30.4 per cent stake in the company.

One foreign banker described the issue as "blatant favouritism" which he feared could damage the market's reputation

utation. Since rules on foreign owner-ship were eased last year Jak-arta has attracted unprece-dented interest. The index calculated on a percentage basis peaked at 525 in early September, having idled at under 100 at the start of 1988 and Consul in Baghdad saw Mrs Parish for 45 minutes at under 100 at the start of 1988. the Iraqi Foreign Ministry. They reported that she looked thin but was in fairly good Yesterday it slipped helow 400. Indonesia's economy is on the road to recovery and a construction boom means cement stocks should prove a good bny. But Indocement, like many companies on the Jak-arta market, is considered overpriced. Its Ruplah 10,000 overpriced. Its Rupian 10,000 striking price is more than 20 times projected earnings for 1990 - the normal measure of a company's underlying value. It assumes a profit turnaround of Rupiah 255.5bn. According to the underwrit-ers the issue has been fully

the objective is to avoid blood-shed and violence. This thing could deteriorate into guerilla warfare and even civil war, and I think stepping down and civing up two years of six for any public servant." He cast doubts upon Mrs Aquino's ability to continue governing even if the coup is put down. "If Mrs Aquino insists on staying in power I don't think that would assist in giving up two years of six years is a cheap price to pay

solving the problem," Mr Lan-rel said. "I think she would have a very hard time provid-ing leadership, especially now she is being perceived as more beholden to Washington than to the Filipino people."

Vice president urges Aquino to step down Sony halts plan for **Philippines plant**

By Robert Thomson in Tokyo

amount was \$101m, according to Japan's Ministry of Finance. An official of the Ministry of SONY, the Japanese consumer SONY, the Japanese consumer electronics maker, has indefi-nitely postponed plans to build an audin equipment production plant in the Philippines, which had struggled to build an image of stability to entice Jap-anese investment before the failed coup attempt. The Japanese company had International Trade and Industry (Miti) said that the events of recent days have been a serious setback for Japanese investor confidence in the Philip-pines, and that it could take two years for investor confi-

ialed coup arcempt. The Japanese company had already made a down-payment on a factory site near Manila, and received final approval from the Philippine Board of Investment only two weeks ago for the Y5bn project (£22.4m), but has now decided to "moni-tor" indefinitely the country's neitical struction.

tor" indefinitely the country's political situation. "We want to see how the Aquino Government handles the situation. The delay could be a couple of months or it could be indefinitely. Wa will have to see how things develop," a Sony spokesman said yesterday. The plant was to have been a symbol of the success of the Aquino Government's attempts to convince Japanese compa-

under what conditions the company would resume work on the project: "I can't give you any precise criteria." Froduction of radio cassette players and compact disc play-ers was scheduled to begin in early 1991 in the plant, in which Sony had a 95 per cent stake and Solid Corporation, a' distributor of Sony products in the Philippines, has a 5 per cent share. Aquino Government's attempts to convince Japanese compa-nies of the country's political stability. In 1987, direct invest-ment in the Philippines by Jap-anese companies was \$72m (246m), last year, the figure rose to \$134m, and in the first six months of this year, the cent share.

China and Japan in accord on boat people

By Robert Thomson in Tokyo

JAPAN and China have finalised arrangements for the repatriation of about 300 Chirepatriation of about 300 Chi-ness boat people later this month, but serious doubts remain about the punishments that the refugees will receive on their return to China. The Chinese have attived in recent months and many had pretended to be Vietnamese, who have automatically been

dence to be restored. "All of the negative aspects of the Philippines are now being emphasised by the Japa-nese press. This is creating a very bad impression. Until now, the country's economy had been going well, but, fun-damentally, it is not strong, so the coup attempt will be very damaging," the Miti official said. who have automatically been given right of residence in Japan. However, screening by Japanese authorities suggests that as many as 2,000 of more than 3,100 refugees to land in Japan this year could be Chi-

It is expected that a boat chartered by the Chinese Gov-ernment will arrive in Japan late in the month to take about 300 of the recent arrivals back to China, although several Chi-nese have said that they fear

political persecution: Japanese officials have been reluctant to raise the issue of punishme

raise the issue of punishment, which they regard as an inter-nal Chinese matter. A Japanese Ministry of Jus-tice official said that 902 people have been confirmed as Chi-nese citizens by the Chinese embassy here, with some of them Vietnamese of Chinese origin who resettled in southern China a decade ago. The official said that informa-tion about further suspected Chinese will be presented to Chinese will be presented to the embassy in coming days and that the boat charters will continue until all the Chinese are returned.

When the Chinese arrived in Japan they were treated as ref-ugees, but, after screening, they have been classified as illegal immigrants, moved from refugee camps and kept under tight security. Japanese police are searching for 15 Chinese who escaped from custody shortly before security was tightened when refugee regula-tions were changed in Septem-

Until then, all Vietnamese refugees landing in Japan had a right of residence, but, fola right of residence, but, fol-lowing a 1,800 per cent increase in arrivals this year, the Gov-ernment decided to introduce a screening process, and will now only grant residence to those judged to be political ref-ngees. Economic refugees are being held mult a sensitiation

that Japanese consumers are becoming more individual and month self-assertive - and that com-panies are getting better at tar-geting their products. Dentsu says: "In 1989, con-sumers found themselves no longer contant with just following trends and began to assert

more individuality in their acquisition patterns. Rising sales of fast cars, portable compact disc players, lightweight video recorders and lap-top computers all bear witness to Japan's continuing fascination with technology.

"Many superior 'high-tech' products can now be enjoyed at reasonable prices," says Denisu. For example, sales of portable video cameras have risen by 30 per cent this year to more than 1.7m. The launch of Sony's latest model, the Handycam 55, was so success-ful that it captured 40 per cent of the market in its first

The prices of compact disc players and discs have fallen low enough for young teenagers to buy. CDs now accou for about 90 per cent of the market in pre-recorded music - records have become hard to find in central Tokyo.

mid in central Tokyo. The multifunctional front door earns a special mention from Dentsu. This electronic marvel, costing Y635,000 (\$4,860), has a burglar alarm, an electronic lock, a message recording machine and a computer to forecast the weather ...

makes selling to Japanese sound easy. The losers have been left in decent obscurity. They can perhaps console themselves looking after the rented tropical fish.

Convenience goods are also in demand. The Y290bn-a-year market for pot noodles was long dominated hy sales of standard-sized portions of about 70 grams. This year, a newly-launched 120-gram giant size has captured almost 20 per cent of the market. Dentsu

nce to be restored.

Indonesia boosts loan to \$500m

INDONESIA, Asia's largest debtor with total outstanding debt of more than \$50bn, has won such strong bank support for its intest loan syndication. It is increasing the borrowing to \$500m. A US dollar denomi-

to \$500m. A US dollar denomi-nated loan which was negoti-ated loat week in Hong Kong had first been set at \$350m. The 8 year credit is laad managed by JP Morgan, the US Bank. The borrowing carries interest of 0.5 per cent over Libor, the London interbank offered rate, for the first 4 years and % per cent for the remainder - significantly softer than earlier syndications. It also has a drawdown option in dollars or two other currencies. dollars or two other currencies. Officials of Bank Indonesia, the country's central bank, said yesterday 70 per cent of the participation was by non-Japanese banks.

Around half of Indonesia's official debt is at concessional rates. But Jakarta is concerned to contain the yen exposure which currently accounts for more than a third of the total. The World Bank estimates adverse currency fluctuation added \$12.6bn th Indonesia's external debt over the period 1982-88, the equivalent of 9 per cent of the country's GDP.

Setback for Taiwan political reforms

ing under dures

By John Elliott in Taipei

modern Taiwan.

TAIWANESE government plans for political reforms based on the voluntary retire-ment of elderly Kuomintang (KMT) legislators may face a temporary setback because of encourage the elders to retire. At that time there were 200 of them and government spokes-men expect this to have come down by at least 70 when the new Legislative Yuan starts much content for the starts temporary setback because of the victories won by the coun-iry's main opposition, the Dem-ocratic Progressive Party, in polls last weekend. Contesting elections for the first time as a legal political party, the DPP won over 30 per cent of the votes cast. It work next February after the Chinese New Year. The 130 remaining would be further reduced in practice because a large number of them are too

infirm to attend. Last Friday senior KMT offi-cials intimated that there would be faster progress and forecast that there would be a "significant breakthrough secured six regional administrative posts as mayors and magistrates and is claiming KMT ballot-rigging prevented a seventh victory. With independent support-

within the next few days". They thought a substantial number would retire after the weekend poll so taking some of the steam out of a DPP camers, it also won about 24 seats in the country's national par-liament, the Legislative Yuan. This has shocked the KMT's paign for electoral reform. However several of the elders, many in their 80s and 90s, who have regarded their party as the rightful ruler of the island since Generalissimo Chiang Kal-shek fled the main-

elders are now saying that they are now willing to retre quickly from the Yuan because of the increased DPP presence. They are likely to be backed by elders in the National Assem-bly the form an electron of land 40 years ago and founded lege that will choose the coun-try's president next March when Mr Lee Teng hui, the current president, is expected to be re-elected. Politics will now become There was no chance of the KMT losing overall power at the weekend because it controls the Legislative Yuan and

other institutions. In addition to 72 seats which it won in the Yuan polls, it also has 29 appointed representatives of increasingly controversial because the DPP will be able to overseas Chinese communities as well as about 160 of the provoke the KMT administra-tion by tabling measures in the Yuan. EFFORTS to resolve tha Punjab issue are expected to be renewed now that Mr Simranjit renewed now that Mr Simiranit Singh Mann, the former Sikh police officer, released after five years in an Indian jall for preaching secession of Punjab, has returned to the holy city of Amritsar to a hero's welcome. Mr Mann and eight of his followers have been returned to parliament in the recent Indian elections.

over two weeks as there would not sufficient police forces to guarantee law and order for Despite his long imprison-mant, much of it in solitary confinement, Mr. Mann has said that the Sikhs' demands can be worked out within the polling on the same day throughout the country. framework of the Indian con-stitution. This suggests he is willing to consider a settle-ment of the Punjab crisis on the basis of more autonomy without seeking secession.

Mr V.P. Singh, the new Prime Minister, spoke over the weekend of "the urgent need for a national endeavour to resolve the (Punjab) problem". The Prime Minister is expected to deal directly with Mr Mann in working out a solution now that tha militants have emerged into the open under him.

First contacts are expected to be made when Mr Mann and supporters of his faction of the Akail Dal, the Sikhs' main political party, come to New Delhi later this month when the first session of parliament is held.

session of parliament is new. Sikh moderates feel Mr Mann will first have to consoli-date his position among the militant leaders, most of whom are still underground. Some have made highly provocative statements in an attempt to force Mr Mann to take an

extreme position. Mr Mann's wide respected in the entire Sikh community, comes partly because of his long imprisonment and trial on charges of sedition and con-spiracy to assassinate the late Mrs Indira Gandhi.

His imprisonment bas enabled him to speer clear of the tangled Sikh politics which are ridden with factional guarrels. He now emerges virtually as the Sikhs' unchallenged leader but to retain this posi-tion Mr Mann will have tread carefully in the coming weeks.

That expectations are high in Punjab is demonstrated by the sharp fall in violence for the past week after polling in the utilized electron was of the national elections went off peacefully in the state.

Dilemmas of countering the intifada nag at the Israeli soul Hugh Carnegy reports on the continuing controversy over the level of force used against the Palestinian uprising

S THE Palestinian uprising A against Israeli rule in the west Bank and Gaza Strip approaches its second anniversary this week, one recurring issue of the intifada – the accusation of exces-sive use of force and widespread human rights abuses by the authoritles - remains as live as ever.

In its chronicle of human rights conditions around the world in 1988, published in October, Amnesty International voiced grave concern "about e wide range of human rights violations by Israeli forces since the beginning of the intifada and called for a comprehensive judicial inquiry

to investigate them. Next week, the principal Palestinian human rights watchdog in the occupied territories, Al-Haq, an affiliats of the International Commission of Jurists in Geneva, is due to pro-duce its annual report which Ms Mona Rishmawi, its executive director, says will point to a deterioration in conditions during 1989. The Israeli Government regards

they take advantage of the openness of the country to outside scrutiny – which contrasts sharply with many other states accused of human rights abuses - without taking into suffi-clent account the violent nature of the uprising.

The anthorities were pleased recently when Amnesty condemned the recent trend of brutal killings by Palestinians of alleged collaborators

in the territories.

But the Government continues to face strong complaints against its actions, which have been responsible for much of the decline in international sympathy which Israel has

tional sympathy which Israel has experienced since the *intifuda* began. Tallies for the number of people killed during the uprising now vary quite widely according to source and method of calculation. Retters news agency puts the death toll in the territories, and in related violence within Israel itself, at 590 Falestin-ians killed by Israelis, 150 killed by fellow Palestinians and 44 Jews killed by Palestinians. killed by Palestinians.

Whatever the exact figure - there are also discrepancies over the thon-sands injured - Israel's critics com-

plain that the continuing habitual use of live ammunition and metal-filled "plastic" bullets against petroi-bomb and stone throwers is an

unwarranted overreaction. Al-Haq documentation shows only a small percentage of those shot dead had wounds to the legs, indicat-ing there was no initial attempt to demobilise before firing at the upper body. It also suggests about one quarter of those killed were under iswarter of those killed were under dianter of those which were there 16-years-old Army figures show that plastic bullets, introduced to stem fatalities, have in fact killed more than 120 Palestinians. Al-Haq alleges, based on sworn statements from victims and with

nesses, that detainees are routinely severely beaten - despite orders to

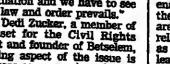

the contrary by the military - and that torture is no longer rare. It cites evidence of summary executions by

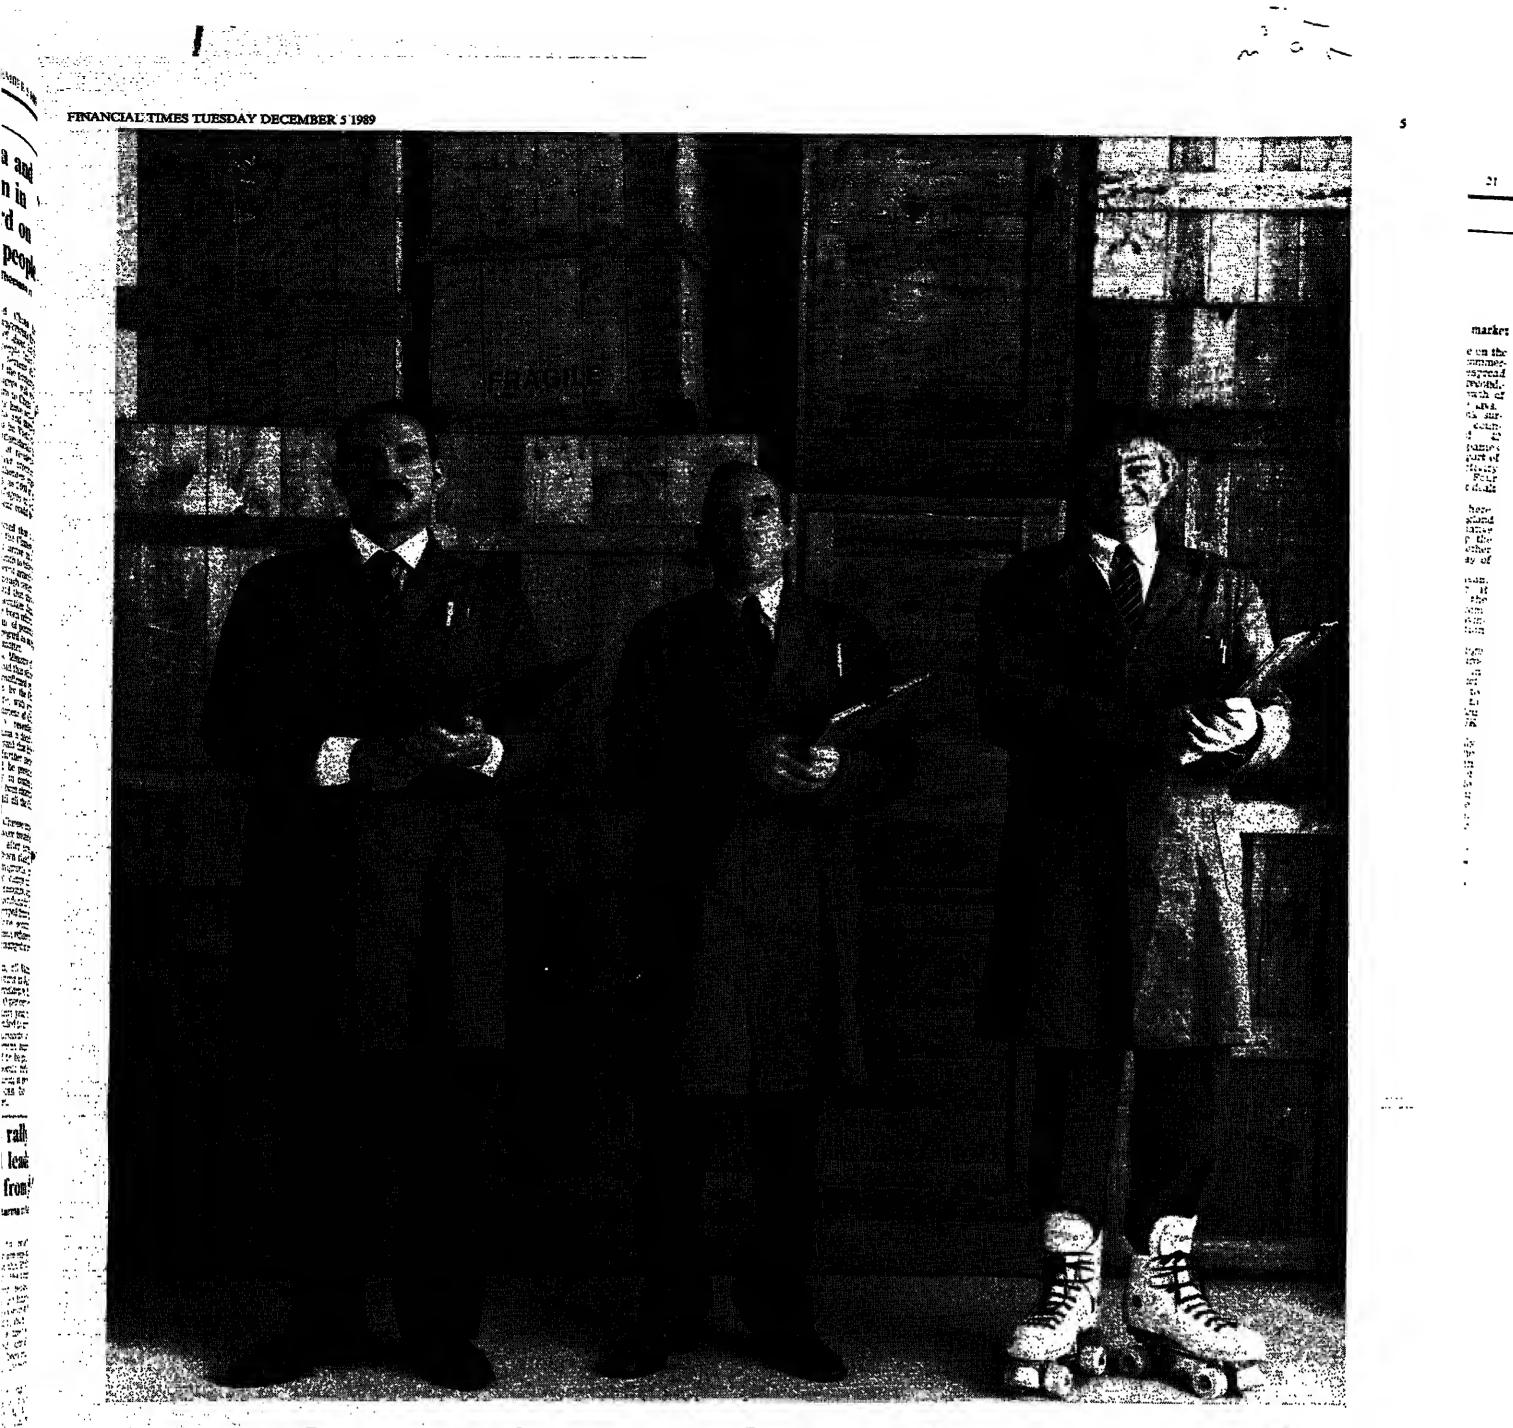

plainclothes Israeli squads. Other complaints focus on the heavy use of administrative measures by the anthorities, such as detention without trial - a person can now be held for up to one year without charge - prolonged clo-sures of schools in the West Bank and restrictions on movement. Nearly 60 Palestinians have been deported during the *intifada* and about 250 houses of alleged activists

the (1973) Yom Kippur war, but what is happening within Israel. The worst part is the unwillingness to know, the disconfort it brings to our have been destroyed. Israeli officials deny widespread violations of human rights and reject the accusation that complaints are not properly investigated. They

protest that the situation in the

protest that the situation in the occupied territories demands extraordinary measures. "Hebron, unfortunately, is not like Zurich," says Mr Dan Meridor, the Minister of Justice. "We are confronting a very violent situation and we have to see to it that law and order prevails." For Mr Dedi Zucker, a member of the Knesset for the Civil Rights Movement and founder of Betselem, a dismaying aspect of the issue is what he sees as an erosion of stan-dards within Israel. "The success of the Arabs was not the (1973) Yom Kippur war, but what

Brazilian inflation rise may force early handover

By Ivo Dawnay in Rio de Janeiro

BRAZIL'S monthly inflation rate reached 41.4 per cent in November, up from 37.6 per cent in October and deepening fears that the inauguration of a new president due in March may have to be brought forward

With two weeks before the decisive second round in the presidential election, many political and business analysts now believe that the winner may have to follow the lead shown by President Carlos Menem of Argentina in July and take power early.

However, there are serious doubts as to whether Mr Fer-nando Collor de Mello, the centre-right front-runner, or Mr Luís Inácio Lula de Silva, his left-wing rival, has adequate plans in hand to cope with the rapidly deteriorating economy. President José Sarney insists

he will stay until the end of his mandate, but many market analysts say that events could force his hand.

Finace Ministry officials are unofficially reporting that outlook for Brazil's economy

they hope to keep the steadily rising inflation index below 60 per cent a month until midper cent a month until mid-March. Soma hankers, how-ever, say that a new surge is likely as soon as the election is over. "Everyone is anaesthe-tised by the election," said Mr Daniel Dantas of Icatu bank, "but when they are over, we are In serious danger of

are in serious danger of another surge." Accumulated price rises this year have already reached a record of 1,114 per cent. Any hint of further turbulence could provoke a rush out of government any mainter comments from pundits who argued that neither candidate had shown sufficient aware-

could provoke a rush out of government overnight markets into the dollar or gold. Also, the possibility of Lula winning ths presidency, although he remains some 12 percentage points behind in the opinion polls - could trig-ger a panic. "The markets have already discounted the Lula factor," one banker said, "but if he were to show any sign of if he were to show any sign of winning, there will be serious trooble."

By Lionel Barber in Washington appeared in the first question by a journalist in the first FURTHER evidence of a slowdown in the US economy hate between the two candi-

HE tale of how Peruvian Senator Armando Villanueva came to

donate a fine piece of pre-Co-lumbian pottery to the nation is doing the rounds of Lima. President Alan Garcia had turned up at the senator's house to celebrate the latter's 74th birthday. No sooner inside, the head of state spied a mre-Columbian pot and made a InSide, the lacat of state spines a pre-Columbian pot and made a beeline for it. Without consult-ing his host, he held it aloft in front of the guests and announced that "compariero Armando" had made a generous gift to the National Museum, which was about to open. Mr Villanueva, who is

the president's godfather and who has served him as prime minister, nodded incredulous assent. "Thank you, Armando, in the name of the nation," the president added. Mr Garcia still gets his way

in Peru, with a mixture of bra-vado, bullying and calculation. But he does so these days over less and less insignificant mat-ters, and he is overshadowed by the campaign for the presi-dential election next April. Prevented by law from succeeding himself, he and his administration labour under an end-ofregime atmosphere. This has been accentuated by the heavy defeat of the ruling APRA party in the municipal election last month.

The president's final eight months - he is to step down in late-July - will be a crucial test whether or not Peru can be held back from the edge of economic chaos and social dis-

order. In Peru the perspective is further clouded by deteriorat-ing security and Mr Carcia's unpredictable attitude to the two most likely successors -Mr Mario Vargas Llosa, novel-ist turned centre-right politi-cian, and Mr Manuel Barrantes, Communist former mayor of Lima. Security is so fraught that it requires the full resources of

the armed forces to ensure vot-ers were not intimidated during the municipal elections by the Maoist guerrilla organisation Sendero Luminoso (Shining Path). Sendero failed to dis-

rupt the elections, but its campaign of terror in the Andean highlands has meanth that, in many towns, no-one other than a Sendero stooge is prepared to be mayor. The guerrillas are increasingly bold and have infilirated the police, and trade unions.

policies and no investment. Failing purchasing power has produced a series of strikes. President Garcia: Insecure behind the military and struggling against advancing guerrillas

Mexican economic pact extended

Since 1987 real incomes have fallen by 40 per cent against a background of hyperinflation. This has provided even more fertile soil for subversion.

Inflation, at 25 per cent per month, has become a tax on the long-suffering population. Rich and poor alike take refuge in the dollar. Money-changers, calculators in hand, are on street corners from 8 a.m., to past midnight. In two weeks the street rate has jumped from 9,000 intis to the dollar to 12,500 (at one stage touching 14,000:\$1). This is three times the official rate. In mid-November the Government was oblige to close its borders to prevent contrahand and a haemorrhage of foreign currency.

Despite this and other corrective measures, the govern-ment finds itself printing intis for Peruvians to buy dollars. The banks are virtually empty of sight deposits and the preva-lence of low interest rates is the fund that Peru simply could not clear up its arrears eroding the profitability of the with one down-payment. All banks to a disturbing degree. Companies are faring better, but on the basis of short-term we could do was to come cur-rent on arrears beginning in

this change of direction as a to block the expulsion. How ever, this ignores Peru's cur-rent isolation in the internaresponse to concessions made by the IMF. The fund has accepted ths principle that rent isolation in the interna-tional community and the problems created by Mr Gar-cia's policy of limiting debt ser-vice payments to 10 per cent of export earnings. The foreign debt has now reached almost \$17bn, of which 60 per cent rep-ments arrange Peru's plight is so parlous that conventional stabilisation pro-

grammes could prove econom-ically damaging and socially dangerous, hnt no formal agreement has been reached and the fund is holding Peru to resents arrears. Of late the president has also begun to talk in slightly differ-ent economic terms, including paying its arrears and repair-ing its relations with other multilateral organisations and with governments.

privatisation. A deal, even in outline, with the IMF, could steal some of the thunder from Peru is expected to pay soon the arrears due to the IMF Mr Vargas Llosa's presidential (\$44m is due in September-De-cember). Total arrears due to campaign. The latter, who is well ahead in opinion polls, has set the campaign agenda with his economic proposals. These focus on trimming the the fund amount to \$800m, out of \$1.67bn due to multilateral organisations.

Doubts in US over Bush call to speed arms control timetable

By Lionel Barber in Washington

PRESIDENT George Bush won general acclaim at home for his performance at the Malta summit, but his call to accelerate arms control agreements with the Soviet Union is already stirring up criticism in

Mr Paul Nitze, the veteran US arms negotiator, said it was wrong to commit the US by the middle of next year to producing agreements, particularly on cutting strategic nuclear weap-

cutting strategic nuclear weap-ons by 50 per cent. "I hope ths President doesn't take it too seriously," he said. Mr Sam Nunn, the key Dem-ocrat who chairs the Senate Armed Services committee, agreed: "I don't helleve we gave away chips, but I do believe that setting an arbi-trary timeframe for arms contrary timeframe for arms control reaties to actually be com-pleted and signed is not wise." In the New York Times, Mr William Safire accused Mr Bush of pressing for a quick treaty to reduce strategic arms instead of focussing on efforts

arms superiority in Europe. "Doormat diplomacy," he thun-dsred, "In succumbing to a misperceived need to seize the moment, President Bush 1st ths moment seize him." Mr Busb said at the weekend he would like to "shoot" for a

strategic arms accord by next June's planned summit in the US with President Gorbachev. other US officials, notably Mr James Baker, US Secretary of State, have been more cauof State, have been more cat-tious, suggesting that a Start treaty may be ready for sign-ing by the end of next year. However, leading Demo-cratic Senators who have accused Mr Bush of "timidity" in his formion policy minimum.

in his foreign policy, welcomed Mr Bush's steps towards a cooperative relationship with the Soviet Union. "It was a suc-cessful summit," said Mr George Mitchell, Senate majority leader and one of the President's most persistent critics. Mr Bush's decision to liberalise trade and offer observer

to reduce Soviet conventional status for Moscow in the General Agreement on Tariffs and Trade (Gatt) drew support in the business community. "It is time now to unleash trade as a force for a better relationship, said Mr Dwayne Andreas, chief executive of Archer-Daniels-Midland who knows President

Gorbachev personally. The Washington Post, in an editorial, described Mr Bush's Malta initatives as modest and constructive. "From the Soviet viewpoInt, Mr Bush's most important initiative had to have been that he is starting to play the American economic card. . For Mikhail Gorba-chev, this is the payoff that will let him show critics and consumers that peres-troika. . is worth the pain." The Wall Street Journal handed editorial street Journal handed editorial space to Alexis de Tocqueville, the French political theorist who drew attention to the deep cul-

tural differences between the two countries in "Democracy in America" written in 1840.

The Florida city takes up arms amid fears of ethnic violence, reports Henry Hamman

Racial tension runs high during Miami trial

O N January 16 1989, known as Martin Lutbsr King Day, Miami police officer William Lozano shot and killed a black motorcyclist, 23-year-old Clement Lloyd. A passenger on the motorcycle died in the subse-quent crash and Miami was engulfed in three days of vio-lence in inner city black neighbourhoods.

Now Mr Lozano is on trial, charged with two counts of manslaughter, and there are fears that, if Mr Lozano is acquitted, racial violence could erupt again.

The fears of violence are so great that the police have pur-chased 700 gas masks and have arranged for the use of two armoured personnel carriers.

Officials have also requested that the announcement of the verdict in the trial be delayed

Last week, the prosecution finished presenting its case to a six-person jury. The defence is now offering its version of

Mr Lloyd was being chased by a police car ot the time of the shooting. Mr Lozano and his partner were investigating a theft and Mr Lozano was standing in the street beside their patrol car when a motorcycle appeared. Mr Lozano has said he shot

Mr Lloyd In self-defence because he believed Mr Lloyd was about to run him down. But other witnesses said the

police officer was in no danger and had no reason to shoot Mr Lloyd.

That the trial is causing concern is no surprise, given Miami's record of troubled relations between blacks and the police.

In May 1980, 18 people died after an all-white jury in Tampa, Florida, acquitted four Miami police officers of beating

to death another black motor-cyclist, Arthur McDuffie. The riots - in Miami's black Liberty City neighhourhood - were among the most violent in US history.

In 1984, rioting broke out when a Miami police officer was acquitted after a trial following the death by shooting of another black man in the black neighbourhood, Overtown. The Lloyd shooting was also in Overtown.

In addition to the difficulties between Miami's hlacks and the police, the Lozano case also highlights another side of Miami's ethnic tensions, the stress between blacks and Hispanics.

Mr Lozano is Hispanic. He

.

A Swat anti-terroist team patrols Miami after three days of inner-city riots

was born in Bogata, Colombia, in 1959.

In recent years, friction has Increased as blacks have watched Hispanics advance economically and politically. As recently as 1960, Hispanics made up only 50,000 of the total 935,000 population of the Miami metropolitan area - the Dade County.

The country's planning department projects that by next year Hispanics will num-ber 854,000, out of a total county population of about 1.9m.

During the same period, the black population of the county will have Increased from 137,000 to an estimated 395,000, a declining share of the total population.

he growth of the Hispanic population is largely due to successive waves of Cuban immigraor Anglo. tion. The most recent of these was the 1980 Mariel boat lift, which saw 125,000 Cnbans arrive in South Florida in a

matter of months. In recent years, other immi-grants from South and Central America have also come to Miami.

There were enough Nicara-In the most recent local elections, held earlier this month, only one in five of Miami's guans in Miami for Violeta de Chamorro, the opposition can-didate for president, to stage a Angle voters even bothered to

major political rally in the city go to the polls.

The local newspaper, the Miami Herald, quoted one dis-affected Anglo voter who said she did not vote because she was "pretty tired" of having the chance to vote "for ethnic mounts only "or blocks and this autumn. Peruvian presidential candi-date and novelist Mario Vargas Llosa made a similar pitch to the 40,000 Peruvians In southern Florida. A recent opinion poll showed that many blacks feel Hispan-ics have taken jobs from them. the Americans, and we pay big taxe But it is for blacks and Hispanics that the Lozano trial has the greatest symbolic Statistics show that black income levels are lower than

importance. In the months between the those of Hispanics. Tha mayor, Xavier Suarez, is Hispanic and political consulon to put Mr Lozano on trial and the opening of the court case, some Hispanic groups ran campaigns to col-lect the large amounts of money needed for his defence. tants say that non-Hispanic candidates for Miami office will increasingly have trouble getting elected. Miami's city commission has In the trial, three black eyewitses were the key to the case against Mr Lozano.

three Hispanic members, one black and one non-Latin white, What has happened, in the words of the Mlami Herald, is Indeed, if blacks have lost as a result of the Latinising of that the Lozano case has become for Miami a "sort of Miami, Anglos have too. While the Anglos remain the Rorschach test" In which different people "examine the same fact and see different wealthiest group in the city, they have seen their share of the population and their politithings."

Often those "different things" depend on which eth-nic group the viewer is from. cal influence decline dramatic-

Mr Lloyd, the dead motorcyclist, was, like Mr Lozano, not a native. He was born in St. Thomas, Virgin Islands. In the

hours before his death, he had used cocaine, drunk alcohol and smoked marijuana. At the time of his death he was carry-ing nearly \$1,514 in cash and wore four gold bracelets and two gold necklaces.

Not surprisingly, the defence has sought to portray him as a small-time drug dealer and Mr Lozano as a policeman trying to enforce the laws in a diffi-cult and dangeous situation cult and dangerous situation.

The prosecution has tried to show Mr Lozano as insufficiently respectful of human life.

The jury is a mix of three Angios, two blacks and an His-panic. The defence sought to keep one of the blacks - a union official - off the jury, but the judge denied the challenge.

Now, the six, and four alter-nate jurors, file into the courtroom every day, several of them carrying pillows to ease the strain of sitting for hours on end

ourtroom observers say that the prosecution's case against Mr Lozano did not appear to go well. Several eyewitnesses to the shooting contradicted them-

tions.

ins

But when the dsfance opened its case and put Mr Lozano's partner, Officer Dawn Campbell, in the witness box, her testimony, too, raised ques-

She denied that she had spo-ken to Mr Lozano about the shooting. But the prosecution produced photographs which showed her talking to Mr Lozano at the scene of the shoot-In an effort to convince the

blacks that the trial is fair, one television station is carrying the entire trial proceeding. But community relations officials concede that potential "rabblerousers" are unlikely to sit at home and watch.

For Mlami, there is a lot riding on whether or not the trial is concluded calmly. The city has been striving to overcome its "Miami Vice" reputation and sell itself as a business and tourist centre. Another bout of rioting would set back those efforts

At least as important is that worry that Miami's ethnic groups are increasingly diverg-

One Anglo civic leader put it this way: the city is not a melting pot, he said Instead, it is more like a salad bar, with lots of ingredients, all of them in separate containers.r

does rather prove a point; it doesn't take a test pilot's salary to take these cars flying.

Aircraft technology is available at a very down-to-earth price.

The cars illustrated are the latest Saab 900i and 900i 16 valve. Both boast the ultimate in safety and comfort.

Why? Because neither 900i is a leap into the unknown, but a car that, over the years, has been constantly developed, slowly evolved. But before you take off, let us explain. Open the door of the car on the left. The 900i 8-valve, sit yourself down. Now, as you're cossetted in the heated front seat, adjust it to your exact requirement and survey the scene around you. The aircraft heritage gives the

Turn the ignition key, the engine hums into life. Select the first of five gears, and feel the immediate responsiveness of power steering as you thunder away.

Up through the gears now, glancing at the rev counter to pitch it just right.

Meanwhile, under the bonnet, the Bosch K-Jetronic fuel injection is measuring exactly the right amount of fuel (unleaded or otherwise) to each cylinder. It's utilizing each drop as efficiently as possible. You're now getting the maximum engine performance with the minimum fuel consumption.

In complete contrast, though, slowing the pace is almost completely unexhilarating. Your right foot merely moves a couple of inches to rest swiftly, safely and smoothly.

Accelerating; or decelerating; it's an outstanding car, the 900i. But Saab didn't stop there. With the latest 16-valve technology, the car would evolve into an even more powerful argument. Hence the car on the right. The 900i 16-valve. Of course, extra power costs a little more kroner, but there's a simple method for choosing the fuel injected Saab suited to you. Contact your local Saab dealer.

Any request for a demonstration on the terrain you see above, may be met with a little hesitancy. But ask any dealer to give you a thorough test drive on the toughest of Britains public roads, and hell jump at the chance. For a test drive ring 0800 626556.

SUMMIT PROPOSAL TO JOIN GATT **Soviet Union** may soon obtain observer status

By William Dullforce in Geneva

THE Soviet Uniou could be granted observer status in the General Agreement on Tariffs and Trade at the next Gatt council meeting in February, if its diplomats act fast enough. The proposal to give Moscow

observer status was agreed at the Malta summit with the US at the weekend. But, even under the most optimistic estimate, the Soviet Union could not achieve full membership before the end of 1993 - and 1995 would be a safer bet.

First, there is no point in Moscow applying before the eud of 1990, when Gatt is scheduled to complete its Uru-guay Round. Gatt countries will not want to talk of Soviet membership while they are in the throes of their most ambi-tious trade-liberalising exer-

Secondly, for an economy as large as that of the Soviet Union the process of negotia-ting membership will be lengthy. The compatibility of its economic and trade policies with Gatt free-trade principles would have to be assessed in great detail. Then Moscow would have to satisfy, in bilat-eral negotiations, all Gatt members with a significant interest in Soviet trade of the benefits they could expect to gain.

The results of these bilateral talks would be incorporated into the final protocol of acces-siou for the Soviet Union. Mr Arthur Dunkel, Director Gen-eral, recently remarked that the price of the entry ticket to Gatt for new members had been steadily rising.

China, with the political backing of the US, the Euro-pean Community and Japan, had been negotiating its re-entry to Gatt for three years before the crushing of the student revolt in Tiananmen Square in June brought the process to an at least temporary halt,

Thirdly, while the US and the EC have now agreed to support observer status for the Soviet Union, they have not undertaken to back full membership.

THE EC yesterday reassured its partners in Gatt that its trade priorities had not been changed by developments in Eastern Europe, writes Wil-

Liam Dullforce. Its first priority was the multilateral trading system and the EC would not be dis-tracted from working for the success of the trade-liberalis-ing Humanag Found M3 Pod success of the transmost normalized and the success of the transmost network. Abbott, director responsible for Gatt affairs, told the annual meeting of

Gatt's contracting parties. Negotiators in Geneva have voiced concern about els' apparently increa ing disinterest in the Round. Doubts about the EC's attitude were particularly dis-missed a US proposal for the reform of farm trade.

In 1986 Washington and Brussels opposed a Soviet request to participate in the because Moscow had indicated that participation could lead to an application for Gatt memhership.

However, under an understanding reached in the last few weeks the granting of observer status to Moscow

implies no commitment by either side over membership. Another element in US and European opposition to Soviet membership had been fear of membership has been lear ut the influence Moscow might exercise within Gatt, even as a mere observer, over the four East European members of

Gatt - Czechoslovakia, Hun-gary, Poland and Romania. This concern may be under reassessment in Western capitals after the receut political changes in Eastern Europe but fear of the impact that a Soviet Union with full membership might have on free-trading Gatt has not been entirely abandoned.

Now that they are assured of US and EC support for their observer status, Soviet trade officials have to ensure the backing of a wider number of Gatt members. The Gatt coun-cil acts by consensus.

Nato warship project holed but not sunk David White on implications of the UK decision to drop out of the £12bn venture

ture from NFR 90 removed

HE ship is listing badly, close to the rocks, and almost half the crew has the US, had already shown some hesitation about the ven-ture but the MoD recomjumped off. Bnt contrary to mended pursuing the definimany expectations the Nato Frigate Replacement for the 1990s (NFR 90), the first big tion phase. It is reckoned this would have cost the UK about 26m, relatively little compared with its share of the overall programme, which would have multinational project to pro-duce a collaborative warship,

been about £2.4bn. However, Mrs Margaret Thatcher, the Prime Minister, took the Treasury's advice and After years of studies involv-ing eight Nato countries and dozens of industrial companies, the British Governmeut took overruled the MoD. The miniseveryone by surprise at the end of September – not least the Royal Navy – by suddenly quitting the £12bu project. The NFR 90 was then well into a two-year project defini-tion phase, launched in Janu-ary under a joint company based in Hamburg, Internatio-nale Schiffs-Studien (ISS). The UK and its partners – the US, Canada, West Germany, France, Italy, the Netherlands and Spain – were planning a total of 59 ships, with a joint hull design but built in each country's own yards. About half the equipment was to be jointly procured. try held the announcement everyone by surprise at the

from the joint ship programme the main support the French and Italians were hoping for. They are now still trying to get UK participation in FAMS. Britain has to decide soou what to do. It has until the middle of this month if it wants to join NAAWS, broadly backed by the remaining NFR 90 partners. If it does not, it then has the option of joining

for neither.

range and longer-range naval weapons in the family. FAMS also includes a land-based varl-ant, aimed at the multi-billiondollar replacement market for the widely used US-developed HAWK (Homing All The Way Killer) missile. This FAMS variant would be a candidate to succeed the RAF's Blood-hound missile hut the RAF has FAMS hy next April, or going no funds for developing a Bloodbound replacement.

France and Italy have requirements for both shorterindicated they will refuse to give the merger the go-ahead unless the British come on board with FAMS.

board with FAMS. The UK also needs to decide soou on the ship to build instead of NFR 90 to take over the Type 42's air-defence role - and with whom, if anybody, to halld it. Supporters of NFR 90 argued that collaboration would provide significant savings on development. How-ever, senior Navy officials donbt whether the savings would have exceeded £50m, and say the NFR 90 as planned, at 5,500 tonnes full-load, was

at 5,500 tonnes mil-joad, was about 1,000 tonnes bigger than the UK needed. British officials have been quietly trying to woo the Span-ish, who have similar weapon requirements, away from the

in which which a way from the US-led group. However, the "club of five" (the partners still in NFE 90) have agreed to provide enough money - DM10m (£3.6m) - to keep work going at least until the end of the year. The next main question mark hangs over the West Germans and whether they are willing to bear the cost of pursuing the programme with NAAWS. They could opt instead for an update of their US See Sparrow missile system, possibly with the Dutch. A West German decision is awaited immidecision is awaited immi-

THE Pirelli Group yesterday joined the list of Italian companies which have agreed joint panies which have agreen joint venture deals with the Soviet Union over the past week when it signed a letter of intent to set up a radial tyre production plant in the repah-lic of Tataria, writes John Weike in Powe

Wyles in Rome. Mr Leopoldo Pirelli, the group's president, and Mr Nikolai Vassilievich Lemaev, the Soviet Minister for Chemithe Soviet minister for comment which should see the creation next year of a joint company two-thirds Soviet-owned. This will be responsible for

producing 5m tyres a year at a plant at Nizhnekamsk which is plant at Nizhitekanist which is already producing tyres under licence on Pirelli machinery. Sighty-five per ceut of the joint venture's output will be destined for the Soviet market.

S Koreans hasten to reflag vessels

South Korean shipowners are rashing to reflag their vessels to avoid a US ban on Panama-registered ships entering American ports announced last week, writes Maggie Ford in Seoul. These include nine owned by Hyundai Merchant Marine, used for car exports. Most of the others are con-triner thing.

tainer ships. A total of 39 South Korean vessels are affected and shipowners expect to benefit from a decision by Liberia to slash prices for registration.

\$55m investment in Brazil pulp project

The International Finance Corporation, the World Bank's affiliate which channels funds annate when channels funds to the private sector, is to invest \$55m (£35m) in a \$300m Brazilian pulp and paper ven-ture, writes Peter Montagnon.

Its contribution will include a \$15m equity stake in the project which will make it one

of the largest equity holdings in the IFC portfolio. Sponsored by Companhia Suzano de Papel e Colulose, Brazil's largest pulp and paper company, and the Companhia Vale do Rio Doce mining and minerals company, the project will eventually produce some 230,000 tonnes annually of pulp and a similar amount of printing and writing paper.

Star Congel and Congel HMS Gloucester, one of the Type 42 destroyers which Britain is seeking to replace

until the Royal Navy Equip-ment Exhibition in Portsmouth had closed.

jointly procured. The Ministry of Defence had France and Italy then aban-doned ship as well. They were working on a weapon project, Family of Auti-Air Missile Systems (FAMS), in competi-tion with a US-led programme, pointed out a gap between the nine-year target set by the ISS partners and the 11 years it thought would be needed before the ship's key weapon system, for defence against attack by aircraft and missiles, would be ready. Britain, like Nato Anti-Air Warfare System (NAAWS). Britain was talking to both camps. The UK's depar-

British participation is vital to FAMS because the UK requires part of the range of missiles which neither France uor Italy wants for their navies. The UK wants a medium-range "local area" weapon to arm the replacement vessels for its 12 Type 42 destroyers, which carry Sea Dart surface-to-air missiles, at the beginning of the next century.

The question of the UK's missile choice has become a source of some evident French impatience. The French statecontrolled companies Aérospa-tiale and Thomson-CSF are

both involved, with Selenia of Italy, in FAMS. But Thomson-CSF has announced plans to merge its guided weapons busi-ness with British Aerospace's. The French authorities have

Japanese drugs groups plan back-up for European sales

By Peter Marsh in Düsseldorf

is still afloat.

TOP COMPANIES in Japan's pharmaceutical industry are planning a new West European trade association as part of a drive to expand their busi-ness in the region.

Takeda, Sankyo and Shionogi - the three biggest Japanese drugs companies - are due to be among the founder members of the association which will

probably be set up next year. The group will advise Japanese drugs companies on how to develop strategies for selling more products in Europe, either using their own marketing forces or by joint ventures with European and

US companies. Another goal will be to help Japanese companies to organise clinical trials for new drugs in Europe to provide infor-mation about safety and effectiveness. This information is needed before government regulatory authorities can grant the necessary products licences. Japan's drug industry - although extremely strong in its home market which is the second biggest in the world after the US - has only a small presence in Europe.

But many observers think this will change as a result of the increased costs of developing uew pharmacenticals which is forcing Japan's drug makers to

seek more outlets overseas. Another factor is pressure by Tokyo to hold down domestic drug prices, making the Japanese market relatively less attractive for the large Japanese drug producers compared with other parts

arts of the world. Mr Junichi Ohtani, head of Shionogi's European office based in Düsseldorf. says that the planned completion of the European Community market after 1992 was another reason why the Japanes pharmaceutical industry was looking more closely at Europe. Several other Japanese drugs groups

may decide to join the association

UK team explores potential to strengthen Argentine links

By Gary Mead in Buenos Aires

THE largest British trade delegation to have visited Argentina left the country at the weekend after a week of meet-ings with government officials, includ-ing President Carlos Menem. The 57 members of the Latin Ameri-can Trade Advisory Group mission vis-

can Trade Advisory Group mission vis-ited Cordoba, Mendoza and Rosario as well as Buenos Aires. It was sponsored by the British Department of Trade and Industry. Lord David Montgomery, head of the mission, described the

exploratory visit as a success. While no deals were tied up during the visit, a number of potential areas for British involvement were touched

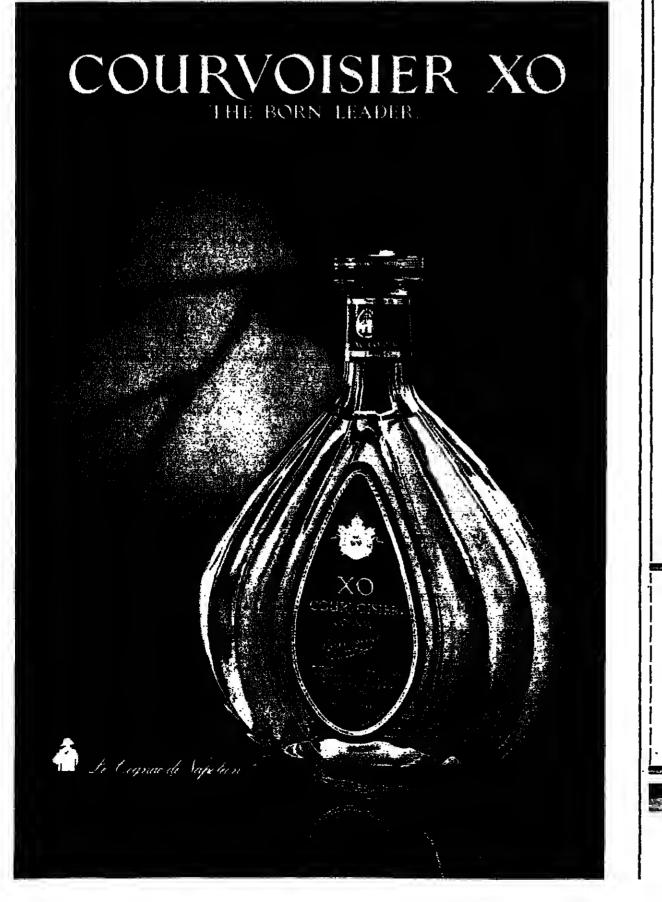

Cable and Wireless is believed to be interested in plans to privatise ENTel, the nationally-owned telecommunications network. Representatives of the Crown Agents held eight meetings with different government representatives who expressed interest in using the

Crown Agents in areas such as fisheries, ports, health and energy. The visit is part of a general improve-

ment in Anglo-Argentine relations and is seen as paving the way to a return to full diplomatic relations at the Madrid talks scheduled for February 1990. Trade restrictions against Britain were lifted by the Menem administration in August.

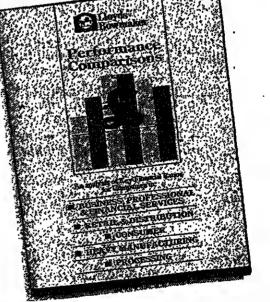

Before the 1982 Falklands conflict Argentina was Britain's largest trading partner in Latin America. Lord Montgomery said that he saw no reason why bilateral trade should not exceed \$1bn (£641m) in four years from now.

According to Argentine government figures, Argentina imported just over \$1m worth of goods from Britain last year and exported \$85m. In 1968 Argen-tina provided less than 1 per cent of Britain's imports, in comparison with Brazil which provided 1.7 per cent.

contracts which British Coal resterday announced with elec-tricity industry. The contracts, called "interim" by British Coal, cover three years' coal deliv-eries to National Power and

PowerGen, the successor gen-erating companies to the Cen-tral Electricity Generating Board. They will also help to keep the electricity privatisation programme on coursa by enabling the generating com-panies to finalise their bulk

power contracts with the 12 distribution companies of England and Wales. In return for a continued

freeze on its prices, British Coal will suffer only a mar-ginal reduction in the volume of its power station business and hopes that next year it will be able to convert the initial agreement into longer term contracts.

of his industry had been "seri-ously overstated" and were "a firm rebuff for the Jeremiahs and their gloomy forecasts." British Coal had become "the supplier of choice" to the elec-

supplier of chnice" to the elec-tricity industry. In Parliament, Mr John Wak-cham, Energy Secretary, said the contracts were a result of British Coal's "remarkable per-formance" in raising productiv-ity and squeezing costs over the past five years. But the the past five years. But the improvement would have to continue if it were to maintain

Mr Wakeham was speaking in a debate on the Coal Indus-try Bill under which the Gov-emment plans to whe out Brit-ish Coalla Stim much de debate ish Coal's fish worth of debts and simultaneously expand opportunities for small inde-pendent mining businesses.

Mr Malcolm Edwards, Britisb Coal's commercial direc-tors, said in London that the coal contracts gave the elec-tricity producers the greatest conceivable security for 50 per cent of the costs of genera-tion." That alone could help electricity prices to fall in real terms rather than rise as everyone had forecast.

Former MTM chief loses **TVS stake compensation**

mance

opposition to MTM.

TVS purchase price.

By Raymond Snoddy

MR Arthur Price, former president and chief executive of MTM, the loss-making American television production com-pany, is to give up without compensation rights to his 10 per cent stake in TVS Entertainment of the UK - a stake worth more than film at cur-

rent prices. The deal comes as part of a bizarre settlemaut pack-- said to be unique in the UK, though not so unusual in the US - between TVS and Mr Price, who resigned as head of MTM on October 27. TVS acquired MTM in July last year but admitted in Sep-

tember that the American com-

temper that the American com-pany was performing much worse than expected. Under the deal TVS can choose a buyer for Mr Price's stake and virtually all the pro-ceeds will be paid to TVS. In a reversal of normal busi-pers practice for departing two In a reversal of normal busi-ness practice for departing top executives, the agreement pub-lished yesterday concentrated almost entirely on what Mr Price is not going to get. One of the team behind hit television programmes such as

Lou Grant and Hill Street Blues, he will not receive: Any compensation for the early ending of a six year con-tract worth an estimated \$300,000 a year. Any right to a share of

ward found out there was no chance of targets being met. "I don't believe that Arthur Price was lying. The question then arises what was happen-ing?" Mr Gatward asked. The TVS chief executive con-ceded that the programme syn-dication market had indeed gone soft but there had also tions, a key part of the MTM Mr James Gatward, chief executive of TVS, warned in September that because of losses at MTM full year pre-tax profits for TVS would be below gone soft but there had also been "a management failure that has now been put right." (The changes have included the departure of the syndication manager and the closure of several departments to reduce the first half figure of £13.4m. The final figure is likely to be between £10m and £18m

Mr Price, who is travelling in the Carribbean, could not be contacted for comment last although MTM loses for the year to October are at \$16m-\$20m, considerably lower than night.

Student loan scheme 'would deter those from lower incomes'

By Jimmy Burns

THE Government's proposed student loan scheme will have a particularly strong deterrent effect on young people from lower income groups wishing to enter higher education, according to a survey pub-lished yesterdey by the National Uniou of Students. The survey suggests that 16.2 per cent of all fifth and sixth form pupils intending to go to a university, polytechnic or college would not do so if the scheme went ahead. The proportion among those from

the poorer social classes was 23.6 per cent. The proportion of women who would be affected by the

proposals is far higher than for men - 73 per cent compared with 62 per cent - although there is little difference between the percentage of men and women saying they defi-nitely would not go on to

higher education. Student loans are to be phased in from next September when undergraduates will be able to top np their present means-tested government grants by borrowing £420 from most of the main commercial banker

banks. The NUS is campaigning against the scheme and has

threatened a student union boycott of participating banks. The survey - conducted among 805 students in May and June - found that 74 per cent of students felt the present grant system of student sup-port was more acceptable than the proposed loans scheme. If loans were introduced, 22.3 per cent of students from the two top socio-economic groups said they would easily get money from their parents.

 $\mathcal{T}_{\mathcal{T}}$

demand during the early 1990s. Asea Brown Boveri, the Swiss-Swedish power engineering conglomerate, is confi-dent that its robotics business will expand rapidly over the next three years. "We are investing \$100m in capacity and technical resources to increase the industry's competitive strength in time for the creation of the EC's internal market in 1992," declares Stelio Demark, president of ABB Robotics at Vasteras in central Sweden. Up to 17,000 ABB robots are at work

across the world. The company started building its first robot in 1973 under the influence of Swedish industrialist Curt Nicolin. He became a robot enthusiast after a visit to the US, where robotk technology was pioneered. Robotic manufacturers have found it dif-

ficult to agree on a definition for their product, but the International Federation product, but the International Federation of Robotics has come up with a definition that is widely used. An industrial robot is "an automatically controlled, reprogramm-able, multi-purpose, manipulative machine with several degrees of freedom which may be either fixed in place or mobile in use in industrial automation applications." John O'Hara, president of the Interna-tional Federation of Robotics and execu-tive vice-mendent for ABB at its Ameritional rederation of Robotics and execu-tive vice-president for ABB at its Ameri-can head office in Connecticut, believes the outlook is bright for robot sales, despite signs of a downturn in US indus-trial activity this autumn. "If the US is to remain a strong industrial power, it will have to improve its industrial efficiency and productivity. Robots will have a key role to play," he asserts. The United Nations Economic Commis-

sion for Europe has estimated that there were around 260,000 robots in productive use around the world at the end of last year. This may look small but it repre-sents a 22 per cent increase on 1967.

Robots that turn into colleagues

Two thirds of the world's industrial robots are in Japan; Sweden has almost as many when measured in proportion. Nevmany when measured in proportion. Nev-ertheless, during the 1980s the trend in robotic activity was uneven. In the US – mainly due to managerial disillusionment at General Motors in the early 1980s with the performance of their robots – there was a decline in the growth of robot stocks after 1985 with a fall in a growth rate of 25 per cent to only 12 ner cent is treat

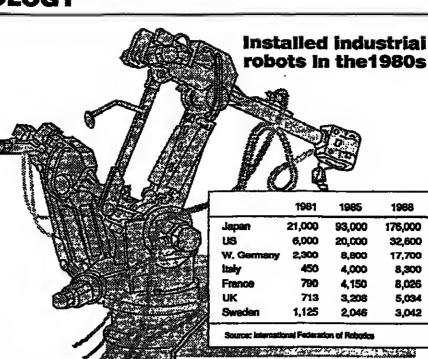

after 1985 with a fail in a growth rate of 25 per cent to only 12 per cent last year. There was a similar setback in the demand for industrial robots in West Ger-many, where the 1984 growth rate of 40.9 per cent dropped to 18.8 per cent four years later. No similar failing off in inter-est can be detected in Japan, however, which has expanded robot use by nearly a quarter for each of the past three years.

quarter for each of the past three years. Sceptics feel that much of the potential for robotics in industry has already been realised. They argue that significant improvements in the technological skills of robots are required to improve their price/performance ratios and make it sen-sible for manufacturers to invest in them. It is estimated that it takes between two to

three years for robots to recoup their installation costs.

The International Federation of Robotics questions such pessimism. Over the next three years O'Hara believes there will be a marked improvement in industrial demand for robots. In part, this will come from a new rationalisation in the automo-tive industry's production system, even if there is a fall in overall volume produc-tion Drate to design a system. tion. But it also derives from a conviction that robots will begin to gain popularity in industries other than car components and

construction. construction. O'Hara points to their application in sec-tors like security at nuclear power plants, mine and bomb search, the drilling and inspection of oil rigs at sea and in the American space programme. "I believe that by the end of the next decade we will also see robots in use in many service areas like hospitals, fast food restaurants and commercial cleaning operations." he and commercial cleaning operations," he says. He visualises robots helping in the care of the elderly and the sick, particu-larly as shortages of labour and the grow-ing number of pensioners put a strain on

existing welfare resources.

O'Hara and Demark are convinced that a growing number of companies recognise the potential of robotic technology. But the potential of robotic technology. But both concede that during the early years of robot activity too many employers made a mistake in thinking that the robots, alone and unaided, could solve their pro-duction problems. "At that time robots were not seen as an integrated part of the industrial process," admits Demark. "Too much was expected of them. They were introduced too quickly without the necessary infrastructure around them to max-imise their potential."

Robot manufacturers stress the importance of training workers in the skills nec-essary to operate robots effectively. By the end of the century ABB estimates that it

will have trained 90,000 people to operate robotic technology. Computer software is also an integral part of the robotic packages. ABB, which remains the world's leading robots manufacturer with 30 per cent of the European market, has built up a network of robot service automation centres in 20 countries. At least 10 per cent of the annual turnover from the robotics business is being ploughed back into research and development. To a large extent, robots are still con-centrated in anto production, where

employers find it hard to recruit and retain humans to perform dirty, repetitive tasks that need pin-point accuracy, such as arc and spot welding, gluing and seeling. There is also considerable potential for robotics in spray-painting, coating

and finishing car bodies. ABB has been developing and refining robots to deal with the handling and loading of heavy materials. Next year as many as 57 per cent of robots in use in the US will be working in the auto companies and their component suppliers. In Japan robots are even being used in assembly work. O'Hara regards robots as part of the long-term answer to productivity problems in the manufacturing industry, especially in the US. "Americans know they must improve the quality of their manufactured goods and they also realise they need to be globally competitive but they don't under-stand how they can achieve this," he argues. "Automation is just one of the cures with robots as an element in the prescription."

11

Probably the biggest attraction of robots is that they can replace humans in areas of production where working conditions are monotonous, strenuous or dangerous. Increasing worker absenteelsm and labour turnover provide a powerful argument for the introduction of robots into the Swedthe introduction of robots into the Swed-ish auto industry, for example, particu-larly in the welding and painting areas of production. But the "revolt" on the shop-floor is bound to increase the pressure on employers to innovate with greater use of technology-based production systems. "Robots will do the unpopular or unballed tobe chilfelly and without prowhen the skilfully and without pro-test," notes Demark. "Workers are saved wear and tear on their bodies while management has far less problems with pro-duction delays."

This does not mean that robots are a substitute for humans. O'Hara believes the co-operation of workers in robotic production is extremely important. "It is worth remembering that the two countries that make the greatest use of robots - Japan and Sweden - are those with some of the lowest unemployment rates in the world," says Demark. Robots look like they will be a necessary assistance, not an alternative, to humans in the flexible manufacturing systems of the future.

Relief from hot temperatures

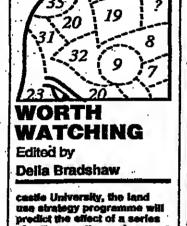

PEOPLE who own greenhouses, or even those who dislike hot weather, could benefit from develop-ments to regulate the heat that passes through windows.

Researchers at the Univer-sity of Bordeaux 1 in France and the Research Institute of Construction Physics in Moscow have, separately, devised ways of taking the heat out of the situation. The Bordeaux developme

is for a window which sandwiches a tungsten oxide material between two layers of conducting polymer. The material allows visible light to pass through, while the polymer absracts most of the heat generating intra-red

rays. The Mascow development, intended for greenhouses, similarly relies on a polymer sendwich, but contains a material which changes in hickness with the external

temperature. Solar radiation makes the material thin and translant during the day, allowing through the visible light while absorbing the infra-red and ultraviolet rays — ensuring that plants do not overheat.

of actions on the environmen - what would happen to the surroundings of an agricul-tural area, for example, if it were jurned into a housing estate.

The system is based on a geographical information system, with the computer soltware simulating the consequences of the actions using colour graphics. To enable it to do that, the

computer is programmed with all the relevant data on, for instance, the amount of pesticides in the groundwater or the local population of toads. The project, funded by the Natural Environment Research and Economic and

The solar heat is stored in batteries during the day and released at night to keep the plants snug.

Cables send the signal reeling

SENDING an electric signal along a cable while realing and unrealing it from a winch is difficult enough, writes Mike Witt.

But when data is being sen along the cable, the traditional methods - such as. using two copper rings, one rotating and one stalls, to transmit the signal — can cause blips and corrupt the

To solve the problem, Frazer-Nash Dalence Systeme has devised a simple mechanical cable winder which allows a fixed five connection at the end of the cable, even as it is being round on a drum.

Roeling system

1¢

÷

As well as for defence applications - towing sonar behind a ship, for example - the system could be used for telecommunications cables or even for winding and unwinding fire hoses. The device comprises an

outer drum round which the cable is wound. Inside this drum are several internal metary drums, which also ake the cable before it is fixed to a centrally located stationary inner drum. From there the cable runs to, say, the computer processing con-tre so the data can be anatyped. . . .

Graphics to save the environment

A UK university computer project to help promote sound land use policies for the next century could help prevent further demage to the envicatchment areas of the Type and Great Ouse. A similar system, but relat-ing to urban areas, has been developed by Leads Univer-

sity.

Car batteries that won't give up

ANYONE who has inserver-tently left car headlights on overnight, only to swake to a that battery the next morn-ing, will realise the potential of a new battery which, the menufacturers claim, will not go flat.

Aithough battery menufac-turers have been developing such units for some time, Johnson Controls, in Milwau-kee, has announced that it has already begun manufacture.

The Everstart bettery has two power units — a main battery and a less powertui back-up one — in a single case. If the main battery goes that, the car owner flicks a switch on the top of the device to tap the back-up Dower.

The problem for Europe and Americans is that the bai-tery will not be available until March, when most of the long dark nights will be over.

Fresh bread sent down the line

HOPING for a bigger slice of the action in the Christmas bread rush, the UK superman ket chain Tesco has used its loaf and introduced a comput-erised ordering system for bread.

Hand-held computers are used in the stores to feed in information about the stock of, say, wholemeal or white aliced brend on the shelve That data is sent along Tesco's private network to its head office computer, where it is processed by software from the FI Group. From there orders are sent electronically to the bakers.

Ind use policies for the next snury could help prevent inther damage to the envi-nment. Under development at New-

MANAGEMENT: The Growing Business

Seed capital

12

EC tries to plug the gap for early stagers

By Charles Batchelor

he European Commis-sion has launched an ambitious scheme* to increase the availability of seed capital for entrepre-neurs. It is backing 24 new seed capital funds to overcome a severe shortage of very early stage and start up funding. The commission will provide Ecu 12.5m (SPm) to help the

new funds meet their day-to-day running costs and, in the less developed "assisted areas," to meet part of their capital needs. The funds will be run by managers with expe-rience in helping small firms and in venture capital. "We noticed that existing

white capital groups were withdrawing from the seed capital area," Alan Mayhew, head of the commission'e Enterprise Directorate, told the managers of the new funds at a seminar in Brussels last week.

The problem with seed capi-The problem with seed can-tal, which is used to help an entrepreneur develop a proto-type or prepare a business plan, is that its provision is very time-consuming for the venture capitalist. The amounts of finance needed are usually quite small and, while the rewards of success can be the rewards of success can be high, the cost of assessing and monitoring a large number of small investments makes them unattractive.

A seed capital investment typically requires the fund's executives to assess the tech-nology involved in the project, to call on the views of outside experts and to arrange licen-sing deals and patent protection

"The proliferation of new technologies and the shortening of product life-cycles have increased the risks of seed cap-ital investments," commented Jos Peeters, president of the European Venture Capital Association. Seed capital investments accounted for inst investments accounted for just Ecu 9.2m in 1988 or 0.3 per cent of European venture capital spending.

The commission hopes its funds will lead directly to an

increase in the finance avail-able and encourage the setting -up of other funds. It is backing three funds each in West Germany, Spain, Italy and Britain, two each in the Netherlands, Belgium and France, and one each in the Irish Republic, Greece and Portngal. It is also snpporting three "transna-tional" funds with operations

in more than one country. The commission will meet half of these funds' operating costs for up to five years and, in assisted areas, contribute up needs with an upper limit of Ecu 250,000. After five years the funds are expected to be

self-supporting. Some of the funds have com-pleted their fund-raising while others are still attempting to persuade investors. Nearly half the funds said seed capital was such a new idea in their coun-try or region that they first had to familiarise potential

investors with the concept. Entrepreneurs who win the backing of one of the funds will no doubt welcome the commission's efforts but should Brussels become involved in what some govern-ments believe should be local initiatives? Some venture capi-talists also believe that it is misguided to attempt a Europe-wide programme when local conditions vary considerably. The enterprise directorate responds that the individ-ual seed fund managers will adapt their policies to local

conditions and not to any grand scheme devised in Brus-Soms participants at the introductory seminar won-dered whether the funds would be too small - the commission has set a minimum size of Ecu 500,000 - to be viable. Also, the funds are restricted to hacking companies with a maximum turnover of Ecn 100,000. Was this not too restrictive? The snterprise directorate says most of the funds will be larger than the minimum size while the turn-

over limit on companiee backed is meant to restrict investments to businesses in

the research and development stage, before sales take off. Some fund managers with a venture capital background questioned the commission's idea of putting the funds in the assisted areas in the charge of Business and Innovation Cen-tres. These centres, which have been set up in recent years to promote innovative small firms, lack experience of actually making investments, some

any many many investments, some participants argued. They might also run into a conflict of interest if, on the one hand, they were advising an entrepreneur on how to raise finance, while on the other, they were providing the finance. The solution most-BiCs plan to adopt is to employ people with investment experience and to separate the two jobs of providing advice and

While Europe as a whole suf-fers from a shortage of seed capital, demand is expected to vary and fund managers in some of the less developed regions fear they may have difficulty finding entrepreneurs to back. Spain's regional net-work of development companies, which provide. venture and seed capital, complain of a low level of entrepreneurial activity in some areas, of a lack of interest in technology among larger companies and of universities which do not focus on practical research projects. Other participants in the

seminar expressed fears about the level of failure which some fund managers said was acceptable. Paul Verdurme of Euroventures Benelux Seed Fund said he planned on the basis of a 50 per cent failure rate but Francois Reingold, of

Financier Rapp, a French fund, argued such high rates were economically and eocially unacceptable. Well-managed seed investments need not be riskier than other venture capital investments because the seed capitalist is able to help from a very early stage, said Carolyn Hayman, of Korda Seed Capital, a UK fund.

As in other areas of venture capital, the US has a longer experience of seed investments than Europe. Twenty nine states run publicly funded seed capital programmes to supple-ment federal programmes for research and development work. Public programmes fill the gaps left by commercial venture capitalists, said Diane Palmintera of Innovation Assoclates, a US consultancy.

Pennsylvania, for example, expects to finance 35 out of 300 proposals this year from its seed capital programme, which provides up to \$35,000 to help someone with a good idea develop a product. Second and third stage programmes provide larger amounts for prod-uct development and to finance the move to establishing a company. Despite criticism of public

sector attempts to help seed sector attempts to help seed capital there appeared to be lit-tle chance of persuading estab-lished vanture capital groups - in either Europe or the US - to move away from more lucrative later stage deals, said Gordon Baty of Zero Stage Cap-ital, a Boston-based seed capi-tal fund "The commission has tal fund. "The commission has probably chosen the least worst option," he comments.

Academics draw a portrait

By Charles Batchelor

he most ambitious research project into email business since the publication of the Bol-ton Committee report in 1971 is currently under way in universities and polylechnices throughout the UK. The £1.4m programme, funded mainly

Research into small business

by the Economic and Social Research Council (ESRC), is intended to provide e picture of the small firms community in the late 1980s and to provide government

USING NEW TECHNOLOGY. Small firms are failing to take full advantage of the benefits of the new computerised technologies which are becoming available in fields such as word processing, accounting software and machinery control. One quarter of firms had not purchased any kind of new technology product in the pre-vious five years, according to a study of 63 businessee by **Christine Edwards of Kingston** olytechnic.

Average speoding on new equipment was very modest despite the fact that most users funds. reported major becefits in terms of increased efficiency, quality, output and the range of products or services they could offer. Cost was the major fector inhibiting investment since most firms preferred to finance purchases internally.

Few companies realised the full potential of their invest-ment because they failed to invest in training, recruit expert labour or seek expert advice. Most owner-managers lacked technical expertise and simply "muddled through." Some owners said they would welcome a source of

cheap and easily accessible advice but few email firms' advice agencies have experts in this field. Of firms surveyed which did

per cent had installed comput-ers, 25 per cent a word processor, 22 per cent a fax machine and 21 per cent electronically controlled machinery. A fur-ther 13 per cent had bought photocopiers and 10 per cent laser printers.

TECHNOLOGY POLICY. The British Government's technol ogy support policy, which emphasises collaborative pro-grammes, largely by-passes small firms, according to a study by Ian Moore of the Cambridge University Management

with some pointers for its future policy. David Storey, co-ordinator of the research programme and head of War-wick University's Small and Medium Size Enterprise Centre, together with the ESRC, have caused a stir in the aca-demic community by awarding contracts to some newcomers to the small firms area and rejecting proposals from some of the long-established small business consenters. The aim says Storty, is to researchers. The elm. savs Storey, is to

Studies Gronp. The cost in management time of finding partners for collaborative pro-jects and then of running the project is too much for many small firms, his study of 12 biothe sonth were on average older than their northern countechnology and scientific instrument companies showed. These problems are magnified by the Government's with drawal from applied research and development projects and its concentration on "pre-com-petitive" R&D. Small firms are

by necessity involved in pro-jects which are "near market" so miss out on earlier stage The Small Firms Merit

Awards for Research and Tech-nology (SMART) is an exception to these rules but, with just £29m available over three years, it is a relatively small

Government policy also needs to address the problem of how innovations are dif-fused through the market place. Small firms are good at developing new technology but are inefficient at spreading awarenese among customers because they lack marketing influence and manufacturing resources.

Some firms resolve this by staying small and targeting niche markets. Others team up with and often sell out to a larger, often overseas, company. More should be done to help these small firms remain independent, Moore argued.

THE NORTH-SOUTH DIVIDE. A comparison of small firms in the north and south of England tends to confirm the popular view of the north-south divide, study of 242 companies showed. Northern firms tended to be

less profitable, were more likely to be involved in manu-facturing, invested little in management resources and were more likely to be supported by grants, according to

research and listen to the findings of a study by Sue Birley and Paul Westhead of Cranfield Entre-preneurship Research Centre. However, while southern Britain has a more youthful, dynamic image, small firms in

older than their northern coun-terparts. This reflected the greater stability of the southern economy compared with the north with its higher rates of company failure. Small firms in the north gen-erally had lower sales than

those in the more affluent south. In the north 37 per cent of firms had sales of less than \$250,000 compared with just 19 per cent in the south though this may have partly reflected the fact that northern firms

were generally younger. A significantly larger proport tion of sonthern firms had recorded a profit in the previ-

ous financial year - 87 per cent against 74 per cent in the north; while more northern firms reported a loss - 19 per cent against 7 per cent. If public policy was intended to increase national efficiency and reduce social inequality, then local perspectives must be

taken into account when considering entrepreneurial devel-opment, the researchers urged.

STRESS. The uncertaintice involved in running a small business and the damands placed on the individual's judg-ment and enterprise mean that owner-managers are more likely to suffer from stress than large company managers. Stress may well be a cause of small businese failure along-side more traditional factors such as under-capitalisation, competition and poor planning, a study of 81 business owners by Claude Lambshead of Bris-

tol University and Frank Levy, a freelance consultant, showed Owner-managers suffered particular stress from trying to balance the demands of home

produce the best quality research across a broad range of small firms topics. But even without the special encour-agement of the ESRC, small business researchers have been hard st work. lere than 200 attended the Twalf National Smell Firms Policy and Research Conference held in London at the end of last month to present their

nic colleagues,

and work and from the need to maintain personal relation-ships with a wide range of peo-ple, including suppliers, bank managers, customers and other

managers, customers and customers business people. Making a deliberate effort to keep work and home apart and improving time management

both help to reduce stress. It would be useful if the small business support network was more aware of the problems of stress so that it. could advise would be entre-preneurs of the demands likely to be pnt upon them, the researchers urged.

ATTITUDES TO ENTERPRISE. Just under a quarter of sixth-formers expect they will evenformers expect they will even-tually have a business of their own, according to a survey car-ried out by James Curran and Robert Blackburn of Kingston Polytechnic. At present 12 per cent of the adult population is self-employed - which suggests an increase in the general

an increase in the general awareness of enterprise. However, one third of the 850 pnpils polled, thought it unlikely they would have a business of their own, while a further 41 per cent were unsure; enterprise consciousness appears to be growing more slowly than its more enthusiastic supporters claim. Independence was the main reason given for wanting to be self-employed with money being mentioned much less frequently. Pupils were mature in their approach and were well aware of the financial problems and personal pressures involved. On average they expected to be aged 28 when they extended

they started up. Pupils from private schools were more likely to see them-selves owning their own busi-ness than those from state schools. More young men than women were enterprise-minded though the difference was not as great as among adults.

Immigrant issues

William Packer reviews the exhibition at the Hayward Gallery

The Other Story, the South Bank Centre's major winter show at the Hayward Gallery (until February 4: then on to Wolverhampton and Manchester), is, on the surface, simply a survey of the work produced in Britain since the War by artists from Africa, Asia and the Caribbean and seen as such it is the more interesting and successful. But there is more to the story than

mere celebration of particular quality. Close beneath the surface lies a sus-tained polemic against supposed critical discrimination. The charge inferred by the "Other" of the title is that so sub-stantial a body of work can only have been realisted by mixture of a critical been neglected by virtue of a critico-cultural conspiracy on our, the host society's part.

ety's part. Imperial exploitation and instinctive, patronising assumptions of cultural superiority live on. We might well won-der whether the inclusion of such nota-ble absentees as Aniah Kapoor, Diruva Mistry and Shirazeh Houshiary, whose careers have prospered here in recent years, would have seriously punctured the show's entire rationale. The question conspicuously not asked by Rasheed Araeen, the sculptor

asked by Rasheed Araeen, the sculptor who has selected this show, is that if who has selected this show, is that if few immigrant artists have achieved any sort of recognition, might not the reason be that only so very few have been good enough in their work? Patent sincerity and worthy ambition are not enough. Throughout history, the immi-grant has had his way to make, and in electing the society which is to receive him he must acknowledge, if he is not naive, that the terms of acceptance and possible success are already set, and not by him.

possible success are already set, and not by him. Araeen makes the fair point in his introduction that European art history and philosphy has paid scant regard to the other great historic cultures of the world. Hegel and Ruskin, he says, set Indian art as inherently inferior to the Greek, Even in our own time, such luminaries as Gombrich and Clark, he suggests, have agreed in "the assump-tion that other peoples belong to histor-ically receding cultures." But he misses the larger point that such a view is necessarily determined by its view-point, which in Europe is an historic culture quite as rich and engrossing, for

those brought up in it, as those of India, Asia and the Ocient. An uncomfortable truth of the modern world is that the influence of that European tradition is spreading still.

No culture is an island entire of itself, and of course it is misguided now to imagine it could be. Today the artists of imagine it could be. Today the artists of India and Japan, for example, face the considerable creative challange of reconciling their native art with ever-pervasive western influences. The prob-lem is how to remain an artist true to an Indian or Japanese experience and yet be an artist of the world. And this comflict of interact is one which an art conflict of interest is one which an art-ist of Europe or America simply does not face.

not face. It might have been more useful, therefore, to set these immigrant artists into the British context within which they worked, which would have been a more delicate but ultimately rewarding and constructive exercise. Even better might have been to show the art of the post-war period made not only here but in the societies — in India, Japan, Africa, the West Indies — from which these immigrant artists came. As it is, the show falls comfortably into two unequal parts, the work of the older and the younger generations, which coincide more or less with the serious and the slly. That silliness is in the event a kind of blessing, for without its grace the more hysterical of the political polemics would be downight offensive. With such invectives as Eddie Chambers' Union Jack Swastika, little

omensive. With such invectives as Educe Chambers' Union Jack Swastika, little more than a poster against the hateful National Front, or Keith Piper's sequence of texts, "The Black Assassin Saints" or "Another Nigger Dled Today," one cannot but wonder which is the more simple-minded: the selec-tor's pious hope that such examples advance bis case, or the authors" that advance his case, or the authors', that what they offer is art rather than the crudest, self-limiting propaganda, visual

shouting. It is the work that is less specific and limited, that is quieter, wittier or more oblique, that allows the viewer to address it in terms of his own experi-ence, that is the more persuasive. Thus the painted cut-out reliefs of Lubaina Himid, or the large figure drawings and conversation pieces of Sonia Boyce, of conversation pieces of Sonia Boyce, of cism of Francis Souza, Avinash Chan-the younger artists, have more to say of dra and Ahmed Parvez followed, and

thing of Piper or Chambers. Yet even they retain something of the propagan-

dist. More truly impressive are the artists, most of them of the older generation, who have simply got on with their work. The monumental figurative sculpture of Ronald Moody, who died at 84 in 1984, dominates the entrance to the show, with the gentle symbolist por-traits and figure paintings of Ivan Per-les, who died last year at 67, an immedi-ate contrast close by. Tha more strident, sometimes desperate eclecti-cism of Francis Souza. Avinash Chan-1960s.

then come the paintings of Anbrey Wil-liams, Balraj Khanna and Frank Bowl-ing, each display small but substantial, and distinguished in its own way. Bowl-ing seems now especially strong, with his large, thickly encrusted abstract canvasses set against the precociously assured surreal expressionism from his time at the Royal College in the early

He, rather than Aracen, might be allowed the last word: "Clem (Green-berg, in New York) was able to make me see that modernism belonged to me also, that I had no good reason to pre-tend I wasn't part of the whole thing." Exactly.

TEATRO COMUNALE, BOLOGNA

Only the most blindly (and deafly) devoted Verdian would claim that his *Giocanna d'Arco* is a masterpiece. Written in the full urgency of the "galley years," when his yonthful success was attracting commis-sions from theatres all over Italy, Verdi's seventh opera, the story of the Maid of Orleans, the libretto fashioned by Tam-istocle Solera, the poet of *Nabucco*, is a curious mixture of well-crafted bnt uninspired numbers with others where the composer's imagination and invention soar. Uneven as it is, it can be

completely effective in perfor-mance, as productions with Renata Tebaldi and Carlo Bergonzi prove (and the Montserrat Caballé recording con-firms). Still, it is rarely given, and when the Teatro Comun-ale in Bologna announced a New production for this season, Verdians' hopes rose. In the event, this *Giopanna*

d'Arco (currently running at the Comunale) was a sad disap-pointment. First of all, it was visually a botch. The film director Werner Herzog, who has previously staged only two operas - an interesting Busoni Doktor Foust in Bologna and a Lohengrin at Bayreuth -apparently worked more with the designer Henning von Gierke than with the singers or with the chorus. The coronation ceremony took place at night; and the crowd milled about at random, while the soprano stood stock still. Solera's stage directions were usually ignored (there was no

helmet in the first act, and when Giovanna asks for her flag at the end, the king holds up the hem of what looks like an immense counterpane).

Verdi and Solera carefully calculated the alteration of bright scenes and dark, pag-eantry and intimacy. But in Herzog's version, all the scenes were uniformly dark, and the love-duet - musically one of the opera's high points - was the opera's high points - was sung on a terrace inserted in the midst of the battle-field left over from the preceding scene. Thus a life-size dead horsa sprawled in the foreground, diminishing the king and his warrior maid. As in *Ernani*, Verdi chose to end *Giovanna* with an extended trio, a muted, tracic

extended trio, a muted, tragic close. Herzog and Gierke devised a cheap, silly trick as the opera reached its end, some tall, black curtains came

flopping down to the stage until the last revealed a huge, blinding electric light trained directly on the innocent, blink-

directly on the innocent, bunk-ing andience. Of course, if you disliked the staging you could shut your eyes. There were soma musical consolations. The Bologna consolations. The Bologna orchestra is playing very well, and Luciano Chailly held them in firm control. He drove the soloists hard (Renato Bruson, as Giacomo, Giovanna's father, tended to drag, as if in protest); and some of Verdi's little touches of pathos were swept aside. When Tebaldi sang Giov-anna, simple lines like "O anna, simple lines like "O padre, benedicimi" were supremely affecting, unforget-

table. Susan Dunn was not allowed time to be moving. For that matter, she seemed generally ill-at-ease and while she sang her chief arias, especially "O fatidica foresta" with clean and effective simplicity, in loud and heroic passages she was likely to turn shrili.

Bruson, too, often forced his voice beyond its natural limits, and was a gruff, blustering father. Admittedly Giacomo is not one of Verdi's most reward ing roles, and neither is that of Carlo, the king, though he is assigned some lovely music. Vincenzo La Scola comes close to being a Verdi tenor, despite a tendency to sing too ioud much of the time? When he sings more softly, he fre-quently produces an unattractive plangeot croon. But often the voice rang out with Vcr-dian metal in it.

The fact that, despite these flaws in the presentation, *Gior-*anna d'Arco was still enjoyable and, at moments, stirring indi-cates that this youthful, fre-quently-dismissed work has more vitality than we are led to believe by commentators. In to believe by commentators. In an interview, reproduced in the rich Comunalc programme, Herzog boasts that he never goes to the opera. Perhaps he should change his habits. Or, at least, he might study the librettos of the operas he is called upon to stage. Verdi and Solcra created a drama far more effective than the one I caw at the Comunale saw at the Comunale.

William Weaver

icing on a cake. Does the fre-quent use of the harp reflect Pacini's reputed study of ancient Greek music? It is always a pleasure to

hear Caballé spreading vocal riches over unfamiliar music even when, as on this occasion, the voice takes a whole act to settle down. There were fine moments in the second act and uneasy ones as well. By the third act, with the postess pre-paring to throw herself into the sea from the Leucadian rock, Caballe was in her grand-est form, (Saffo's crime was to insult the altar at the wedding of her rival Clymene, a rival not in poetry but in love). As Clymene, the mezzo Raquel Pierotti displayed a lovely voice, in flexibility and colour not unlike Caballe's.

who is revealed as her long-lost father, was sung by Enric Serra with eloquent phrasing clothed in frayed tone. Saffo's distraught suitor Faone was the tenor Antonio Ordonez, passionate but constricted. There was some vivid declamation in a small role from Claudio Otelli.

The conductor José-María Collado paced the opera lightly and swiftly at the expense of some shaky detail. Poor bal-ance, almost submerging the lower instruments of the Salzburg Chamber Orchestra, mado the score sound more flimsy than it probably is. Worth doing but the two leading ladies deserved more solid support.

Ránki and Georgian QUIEN ELIZABETH HALL

We see much less of Deszo Ránki in London than we should, and his appear-ance on Friday to replace Annie Fischer ance on Friday to replace Annie Fischer seemed a curious piece of serendipity – one of the most distinguished planists of his generation really ought to have regular engagements here. Yet the whole cast of Ránki's playing seems calculatedly unglamorous and lacking in self-promotion. There is something quite unassuming, almost casual, about his platform memory and a persistent his platform manner and a persistent emphasis upon elegant understatement rather than flashy assertion. Few planists determined to make an

wonderfully self-confident opening, holding attention from the first bars. It lost its way temporarily just twice - the short first-movement develop-ment could have had more drama, a

tighter knot of energy to separate the roomy exposition and reprise, and the central section of the hig Largo seemed unsettled, as if having eased his way into-the-timescale of the first section Banki found it an unfortunate joit to

bave to change gear. There was much marvellous playing, though, and a perfectly puried tech-nique, which then delivered Bartok's Out of Doors with crisp concentration. impact would begin a recital with Bee thoven's E flat Sonata Op.7; there is plenty of room to unfold it at leisurely rhythmic inflections of Brahms's Han-Inoven's E hat somath Op.7; there is mank was equally attentive to the plenty of room to unfold it at leisurely hythmic inflections of Brahms's Han-length, and equally plenty of space in which to allow the work to lose its way. Ranki'a elegant presentation, never forced and always judicious in in its choice of tempo, was nevertheless a

and fractionally underpowered. But the attention to detail was always a delight, and the lucidity of the textures always intent on drawing the ear into the

Ránki has the precious ability to make his audiences listen hard and learn, and convince them that there is more to piano recitals than superficial thrills. It is a lesson that be should be invited to deliver here far more often.

On Sunday afternoon another effortlessly musical artist played to an Eliza-beth Hall which was barely half full. The Armenian cellist Karine Georgian brought a programme of only one work, Debussy's Sonata. It was out of the instrument's mainstream repertory; quence.

Everything Georgian plays is pres-ented with the most succilent glowing tone, tha phrasing boundlessly ample. That can be too much of a good thing in the Debussy, the first movement was just a little over-emphatic, but the exuberant transition from slow movement to finale was quite irresistible. With her fine partner Pavel Gililoy and some

generously measured tempi she turned the Brahms sonata into a big, rangey work, and then turned her attention to two small solo pieces - Dutilleux's ruminative Trois Strophes sur le nom de Sacher, and the first performance of a Capriccio by her fellow countryman

Saffo RADIO 3

his contemporaries Rossini, Donizetti, Bellini and later by the young Verdi. His most celebrated work was Saffo first given at Naples in 1840. Mon-tserrat Caballé has added the tempting title role to her reper-tory. She sang it at this Austrian Radio concert perfor-mance during the Vienna festival last summer, broadcast by the BBC on last Thursday, To jndge from what we heard (tha three acts lasted

WEMBLEY ARENA

Alexander O'Neal, American footballer turned soul super-star, is a big man. Like many big men, he needs a big bed. The thing with with Mr O'Neal is that he takes his bed on tour with him. At every concert, he chooses an attractive young woman from the audience, takes her gently by the hand and lays her on a giant brass bed mid-stage. He sings to her his finest ballad and presents her with flowers and cham-

her with Howers and cham-pagne before sending her on her way with a tender kiss. Modest, he is not. A big man with a big ego, O'Neal puts on a big show. At Wembley on Sunday night the occasion started with the big entrance. Surrounded by a phalanx of walkie-talkle toting body Max Loppert guards, he strolled through the audience to the stage like a

prize fighter taking to the ring at Caesar's Palace. There is much of Las Vegas in an O'Neal show; excess is every-thing. Two bass players, four keyboardists, two dancers, three backing singers; there three backing singers; there were enough people on stage to satisfy the starting line-up of O'Neal's former employers, the Los Angeles Rams. Biggest of all, though, is his music. A huge, southal sound that shook the Arena's ageing foundations and lifted every

foundations and lifted every-one out of their seats. On the up-tempo numbers O'Neal built up a formidable head of steam-ing funk. "Fake," and "Innocent" were furious foot-stom-pers of aggrieved male bravado. With only two new songs to show, he stuck mostly to material from his most

recent album. "What Can I Say

to Make You Love Me?" and the titla track, "Criticize," stood out, perfect examples of

late 1930s synthesised soul. Yet It was with the ballads that that the man-mountain from Minneapolis, Minnesota came into his own. Stretching each song to almost unbear-able limits, O'Neal teased out every sexual nuance and tear-ful drop from marathon ver-slons of "Crying Overtime," "A Broken Heart Can Mend," and the positively volcanic "if Yon Were Here Tonight." Alexander O'Neal is likely to

return next year with a new album. It is difficult to see how he will be able to top his cur-rent show. For such a big star, bringing his own bed with him is no longer such a big deal.

Patrick Harverson

The entity called the Juilliard Quartet has now been in exis-tence for more than 40 years. However, only one of its origi-nal personnel – Robert Mann, the leader – remains in office. Since recent reports have spo-ken of erratic performances, I terpoint were attacked by all the four players equally in a spirit of athletic confidence and, indeed, absolute stylistic anthority. This composer's music is currently, in its entirety, well out of fashion. It was, no doubt, the very pane of Hindemith on the bills

It was, no doubt, tha very name of Hindemith on the bills that denied the recital a com-pletely full hall. The newcomer to this work may be forgiven a sense of snrprise at its unabated urgency and power. It is an early piece, from what may now be termad the avant-garde phase. It was writleast until the finale. However, with the opening salvos of the Hindemith Second Quartet (1921) it soon became clear that tha Juilliard were "on." The angular phrases, expanding and contracting with fiercely uncompromising harmonic logic, and tightly argued coun-

Records in Monaco; records in New York - Sotheby's had a quite wonderful week end. After securing a record £9.9m for Guardi's view of the Glu-decca Canal in Venice in Mon-aco on Friday It secured two more auction highs there on Sunday for major artists -Géricault and Winterhalter, while in New York the \$14.3m (£9.16m) total for a 20th cen-tury decorative arts auction tury decorative arts auction was a record for this market. Pretty girls brought out the competitive bidding. Géri-cault's portrait is of his land-

lady Laura Bro, painted around 1818, with a rural Mont-martre in the background. It sold for £3.7m, around three times its estimate, to the Gal-lerie French of New York. Winterhalter's portrait of an anonymous young girl with a tambourine was painted when he was also working in Paris in 1838 and confirmed his grow-ing reputation. It sold for just over fim. The highlight of the New York auction was the fl.Im paid for a Daum Nancy and

Louis Majorelle wheel carved cameo glass and bronze three-branch lotus lamp, 31 ½ inches high, which was made around 1900. It was a record for any 20th century decorative item and the price was over three times the forecast.

A Gallé internally decorated and intaglio carved glass and wrought iron figural lamp,

dubbed "Les Coprins" (the mushroom lamp) and produced around 1902 sold for £703,774, at the bottom end of its estimate, perhaps because recent research suggests that the design is not so rare as originally believed. Cbristia's also claimed a

record at Monaco on Sunday -for any 18th century rock crystal ever. It was made in Paris around 1730; has gold mounts; and is believed to have belonged to Madame de Pompa-deur. It cama from the collection of Jacques and Marlanne Helft and sold for £641,281. In New York Christie's met

resistance in its auction of Chinese works of art, which was a third unsold. This market seems firm at the top end, but a spate of smuggied grave goods out of China in recent years has depressed prices at the lower levels. A large Sancai glazed pottery figure of a Bactrian camel, 29 inches high and dating from the Tang Dynasty, did well at £315,286, as did a rare painted wood figure of a lady of tha same period

(around 700 AD) at £105,095. In London yesterday a carved ivory relief plaqua depicting the Crucifizion, of the 11th century sold for f121,000 at Phillips, and a pink diamond ring went for £253,000 at Sotheby's, twice its estimate.

the West. In reality both President François Mitterrand and Mr Delors do François Mitterrand and Mr Defors do fear - as Mrs Thatcher hopes - that focusing on the problems of a wider Europe will result in a loss of momen-tum for the integration process. They are trying to square the circle by asserting (a) that eastern Europe wants and needs to find an integrated western Europe already in place as partner and benefactor, but (b) that as far as membership is concerned the CDP is a special case whose inclusion GDR is a special case whose inclusion in the Community would not imply that other east European countries were entitled to the same treatment.

were entitled to the same treatment. One reason why the integrationists are so reluctant to expand the Com-munity eastwards is that they do not see how it can be politically unified if it includes members of both Nato and the Warsaw Pact. Indeed they oppose even the admission of neutral Austria on the grounds that the Community would then be unable to develop as a fully political body with its own for-eign and defence policies. If one objects that the Community already has a neutral member, one is told that irish neutrality is not an obstacle of the same kind because it is not neu-trality between East and West, and not the subject of any arrangement involving the Soviet Union. Implicitly, therefore, the European

WARSAN Implicitly, therefore, the European Implicitly, therefore, the European integrationists make the same assumption as the Nato conserva-tives: that the division of Europe into east and west is going to remain. In fact they are often the same people, which is why criticism of Mrs Thatcher for blocking European polit-ical integration is now heard almost as much from Americans as from Europeans.

as much from Americans as non Europeans. When asked how they reconcile this position with enpport for German unity, both groups are driven to reply that they believe the GDR can eventu-ally be extracted from the Warsaw Pact and included in Nato, though perhaps as part of a demilitarised zone between the blocs. Some think the Soviet Union could be persuaded to accent this. Others suggest that it the Soviet Union could be persuaded to accept this. Others suggest that it may simply be unable to prevent it. The Warsaw Pact, they point out, was never based on the consent of its com-ponent peoples; and it will probably now disintegrate, they say, without Nato having to do the same, Chancellor Kohl it same, does not

Chancellor Kohl, it seems, does not ehare these bland assumptions. He has seen the danger of a collision between German aspirations for unity (if these turn out to be shared by the East Germans) and what the Soviet Union will see as its legitimate secu-rity interests, unless those interests are catered for by some method other than the perpetuation of the two blocs.

That is what Mr Gorbachev's common European home is all about a mon European home is all about a new security organisation embracing both the present alliances and thus overcoming the division between them. What Nato should now be all about is ensuring that the US is fully incorporated into that new structure, so that it continues to act as a geopo-litical counterweight to the Soviet Union, but without having to be the leader of an anti-Soviet alliance. This of course presumases a much

This of course presupposes a much lower level of armed forces through-out the continent. Monitoring troop levels, and anthorising the use of force for specific purposes defined in its charter, would be the main tasks much more at stake in his relations the **n**e V organise мштаг

High cost of share deals

FINANCIAL TIMES

NUMBER ONE SOUTHWARK BRIDGE, LONDON SEI 9HL Talephone: 01-873 3000 Telex: 922186 Fax: 01-407 5700

Tuesday December 5 1989

THERE ARE three reasons Taurus, the planned paperless trading system that will auto-mate clearing and settlement in the London stock market. The first is that, without it, London's dominant position in European equity trading is at risk. The buge backlog of uncleared deals that built up in 1987, due to the inability of the paper-based clearing arrange-ments to cope, exposed the vulnerability of the London system. No financial centra operating under those conditions can expect the confidence of international investors.

16

The second is the sickness in the securities industry, where unprofitability since the 1987 crasb has given way to a shaky recovery, though few are sanguine about the future. in this environment, it seems absurd to pay anything from £20 to £50 or more just to settle a bargain (the accurate figures are hard to come by, which is part of the problem). Screwing down these costs, while not solving the bigger problem of overca-pacity in the market, would at least lessen the pressure.

Small shareholders

The third reason is that the costs of dealing for the UK's newly created class of small sbareholders are too high. Institutional shareholders may not bat an eyelid at the scale of settlement costs, but for pri-vate sharebolders they are exorbitant. It is not just politi-cians who are concerned: pri-vate shareholders pay very nearly a half of all commis-sions to stockbrokers, and deserve better treatment.

The need is evident: the problem is that vested inter-ests in the City have fought too long over possible designs for tbe system, each of which would spread costs differently between the market's partici-pants. During all the chopping and changing, the credibility of the protagonists has evapo-

rated. News last week of the latest shift in direction has prompted a cynical reaction among Tau-rus-watchers, wbo bave become accustomed over a number of years to frequent U-turns. The latest views - if they gain acceptance – appear to answer some of the concerns that have been holding back are already disbelieving public, the cost of failure is too high to be countenanced.

the project. But it would take an optimistic observer to con-ciude that this really is the final soluti

The change in direction does achieve one significant objec-tive. Put crudely, it shifts costs away from brokers (and ulti-mately investors) and back on to registrars (and, through them, the listed companies they serve). This more could finally bring support from that committees which have been developing Taurus, perhaps even by the end of the year.

Second battle

nie

There is a second major bat-There is a second major bat-tile to be won: to convince the market's users of the way ahead. To date the City has been so engrossed in its own in-figbting that it has com-pletely failed to make it clear to anyone outside its narrow confines what the benefits of Taurus will be. Its first job must be to overcome the oppo-sition of some listed companies must be to overcome the oppo-sition of some listed companies to what they see as a system which will obscure the identity of their shareholders. The lat-est design could belp bere, since it appears to reduce the need for, or even do away with, the element that has particu-larly concerned listed compa-nies.

The position of private shareholders must also be made clear. Dealing costs may fall, but there is still a fear that the vast majority of passive shareholders, who seldom deal, may find themselves with a

may find themselves with a new cost simply for holding shares. At the same time, the project's organisers will need to overcome the political diffi-culty of separating private shareholders from the share certificates they currently receive. The cost of running two systems - neuronased two systems - paper-based and automated - in parallel would be crippling economi-cally and complex. Taurus at last appears to

have the leaders it needs, with a newly-appointed project man-ager and a new Stock Exchange chief executive with a reputation for solving tech-nological problems. If they are to succeed, they must waste no time in taking their case to a wider audience. In the face of

Point Programme for Ger-man unity, delivered to the Bundestag last Tuesday, has had a mixed reception: polite in public but anxious in private from West Germany's allies, who wondered if it could have been mere oversight that could have been mere oversight that stopped Mr Kohl from repeating, in this important speech, the traditional reaffirmation of his country's unchanging and unshakeable commit-ment to the Western alliance. Fear that the Soviet Union might "play the German card" - seek to woo West Germany away from its western allies with an offer of Ger-man unity - is a long-standing Nato

hancellor Helmut Kohl's Ten

western ailies with an offer of Ger-man unity - is a long-standing Nato obsession. Last week I beard a senior British official wonder alond, after careful perusal of Mr Kohl's speech, "whether the German card had not already been played." German offi-cials present hastened to refute the suggestion, drawing attention both to the Chancellor's long and impeccable the Chancellor's long and impeccable record of support for Nato and to his generous acknowledgement, in the preamble to the Ten Points, of the key

preamble to the Ten Points, of the key role played by Nato's steadfastness in making possible the current trimmphs of freedom in the East. The fact is, though, that this ack-nowledgement referred to the past. For the future Mr Kohl addressed to his allies, in Point Six, not a pledge but a request — almost a command: "The development of inner-German relations remains bedded in the pan-European process and in East-West relations. The future structure of Ger-many must fit into the future archirelations. The future structure of Ger-many must fit into the future archi-tecture of Europe as a whole. The West has to provide pace-making aid here with its concept for a permanent and just European order of peace." That is, I understand, a reference to the political objective which Nato pro-claimed in the Harmel Report, back in 1967 But "meen-making aid" (cebriit

1967. But "pace-making aid" (schritt-machende Hilfe) clearly implies some-thing more than ritual incantation of a phrase. The West is being asked to set the pace of a "pan-European pro-cess" which will make German unity possible. That process is presumably the one known in Germany as Uberunindumg der Blocke: the superannua-tion of the alliances - both of them - in the interests of a wider European unity. It is also what Mr Mikhail

Gorbachev is generally thought to be on about with his "common European. home." He was on about it again in Rome last week, declaring that "the situation today calls for a greater emphasis on European construction" and suggesting in the next breath that there should be "an all-European summit, a Helsinki-2 meeting" as early as 1990.

Mr Kohl, in other words, did not think the time particularly appropri-ate for ringing declarations of undy-ing fidelity to Nato, because these ing indeity to Nato, because these might be taken as implying that the division of Europe into blocs, with Germany divided between them, should be regarded as permanent. In his eyes Nato's task was to prepare for the day when it would no longer be needed because the conditions which made it necessary alies the which made it necessary, alias the Cold War, would have been removed. With Mr Bush and Mr Gorbachev chaffing each other about the precise minute on Sunday when the Cold War ended, Mr Kohl can be forgiven, perhaps, for hinting that Nato's remain-ing service to humanity should be the rehearsal of its own Nunc Dimittis. see matters in quite that light. Hence

FOREIGN AFFAIRS

The new Europe can be knit together without unravelling the old, argues Edward Mortimer

European Community must remain open to a democratic GDR and to other democratic countries from Cen-tral and South-Eastern Europe. The EC must not end on the Elbe, but must remain open to the East." That can hardly be interpreted as a

ringing endorsement of the French argument that the changes in eastern Europe make it imperative to push abead as fast as possible with the political integration of the Commu-nity including economic and mone-tary union. On the contrary, Mr Kohl seems to be saying, integration must not take any form which might make it more difficult for the Community to expand eastwards. While the French and the Commission in Brussels are saying "let's get on with strengthening and deepening the Community so that it can respond better to the new challenges in the east, and only think about admitting new members later, if and when they can accept the tight political and economic union we shall mans are saying increasingly that widening the Community must come first, not in chronological order but in order of priority. The British Government is not committed to widening the Community as such, but it clearly sees a tactical advantage in stressing the wider European agenda as opposed to the specific Community menn of Emn plus Social Charter so vigorously can-

speech to the Centre for European Policy Studies annual conference last week that he now wishes to supple-ment this menu with further institutional changes, designed to improve the Community's decision-making machinery and make it more democratic. Intellectually these can be seen as in part an answer to Mrs Thatch-er's proclaimed dislika of ceding powers to unelected bodies which are not subject to democratic control. Poblically however they will make the whole menn even less appealing to her, since their effect would be to

support from Chancellor Kohl at the EC summit in Strasbourg this weekend for delaying, if not actually blocking, the convocation of an inter-governmental conference. Unlike him, sbe is opposed in principle to the "deepening" of the Community. Unlike her, he is committed in princi-ple to the "widening" of it. But some people in Whitehall obviously see this

as the possible basis for a de facto alliance: no deepening before, or at the expense of, a possible widening. Tha French will work very hard to prevent such an alliance. They will be able to play on the two leaders' able to play on the two leaders' well-known mutual dislike, which in this case will probably turn to Mrs Thatcher's disadvantage. Mr Kohl will not wish to be seen making common cause with her in what would be portrayed as an obstructive attitude to the Community: he is much more sen-sitive than she is to the charge of being a "bad Enropean," and has

No alternative to Mrs Aquino

PRESIDENT Corazon Aquino of the Philippines and her government are in the midst of their worst crisis as loyalist soldiers struggle to quell the iatest and longest coup attempt.

The Philippines has suffered incalculable damage since the rebellion began on Thursday, the sixth coup attempt since Mrs Aquino was swept to office on a wave of "people power" in 1986. Since the last attempt in August 1987 Mrs Aquino has fought to stabilise the country and to attract foreign invest-ment. The Japanese and Taiwanese were cautiously mov-ing in. So were the tourists. The moribund economy jerked

back to life this year. The last week will have destroyed much of that. Tha Pbilippines again appears inherently unstable, the key deterrent to investment. The indiscipling of the armed forces and their loyalty to president and constitution appears to be in doubt at every rank in every unit, including the most professional. Parliament contains members who care not at all for the constitutional niceties of democracy. Tourists seeking safety on the demonstrably dangerous Philippine archipel-ago will again take their valuable foreign exchange else-where. Mrs Aquino will have to start the process of rebuild-ing confidence all over again. The reasons for these recurthe reasons for these recur-rent coup attempts are not dif-ficult to find. Two decades of corrupt and despotic rule by President Ferdinand Marcos produced a generation of politi-cians, businessmen and army officers for whom the abuse of power was an officially sanc-tioned way of life. Cronyism and "perks" were the principal tools of government and Mr Marcos was careful to buy mili-

Military shake-up

tary loyalty.

It takes a long time to eradi-cate the products of such a system. Mrs Aquino has started to shake up the military but too many officers still owe their allegiance to the Marcos regime and the lifestyle it brought them. Acceptance that the role of armed forces is to serve governments, not to form

them, remains patchy. Some of the civilian discon-tent with Mrs Aquino is doubt-

· · · · · -

less of her own making Although corruption has not been laid at her door, it per-sists at the highest levels of political, commercial and bureaucratic life. Her govern-ment appears increasingly weak-willed. Long-promised reforms to bridge the huge guif between rich and poor have

not been implemented. The biggest single failure has been on land reform. This aspect of policy may not be of great economic importance, but it is a crucial way of allowing the poorest peasants on to the bottom rang of the ladder of prosperity. Worse, Mrs Aquino, a member of the fam-ily which owns the largest estate in the country, has falled to give a personal lead by redistributing some of her own land holdings.

Democracy's survival

These failings are important These failings are important, but they are not the central issue in the present crisis. The survival of democracy is the priority. Mrs Aquino restored democracy to the Philippines and it would not easily survive her overthrow. It is vital that Mrs Aquino and her govern-ment prevail and then deal firmly with the mutineers. firmly with the mutineers. There can be no stable peace in the Philippines while charac-ters like Gregorio "Gringo" Honasan, the cashisred colonel behind this and previous failed

Coups, may roam freely. Whatever Mrs Aquino's diffi-culties and political weak-nesses, all the alternatives appear worse. The military reb els would, if victorious, pro els would, if victorious, pro-duce a junta determined to take the Philippines back to the worst of tha Marcos era. The assortment of opportunis-tic politicians thought to be sympathetic to the rebels includes Vice President Salva-dor Laurel and Senator Juan Bonce Envilo My Acquirace for Ponce Enrile, Mrs Aquino's for mer defence minister. Both were "loyal" snpporters of President Marcos before their timely switch to Mrs Aquino. Opponents of Mrs Aquino will have their chance at the ballot box in 1992 elections. There is no acceptable alterna tive to waiting for those elec-tions. Weak democracy - and each coup attempt in the Philippines weakens it still further

remains preferable on every count to no democracy.

the anxious reference to the playing of "the German card." But the same British official who made that remark found something else in the Ten-Point Plan which clearly pleased him. He pointed out that the *only* reference in the speech to European integration came in this paragraph: "We under-stand the process leading to the recov-ery of the German unity to be of Euro-

pean concern. It must, therefore, be considered together with European integration. In keeping with this, the

Voting in the dark

■ I think that it was Talleyrand, though I have been unable to trace the quotation, who said that "the business of politics is to foresee the inevitable and to expedite its occurrence." That is what today's election for the leadership of the Conservative Party is all about. The trouble is that it is hard to put the maxim

into practice. Everybody knows that Mar-garet Thatcher is not going to be beaten. The Tory Party has been lucky, and perhaps also skilful, in that no particu-lar number has emerged to be quite savage, but perhaps it is better to delay the day. One is reminded of another test whether she will have done well or not. If there are 100 votes against her -a mixture of abstentions and support for Sir Anthony Meyer, the sole opposing candidate - one would expect the markets, let Minister who was long tipped to succeed him: "Hava you ever tried to nall a blancmang to a wall?" If it is any consolaalone the party, to be affected. It there are 30 or less, no doubt business will resume much as usual. It is the grey area in between 30 and 100 that could set people thinking. Not thet Tory MPs - the only people who have the vote

- have not been thinking very hard. One does not envy them their choice. Part of the calcu-lation must include the fact that if the Prime Minister gets a smooth ride today, she will a smooth ride today, she will still be leading the party – barring accidents – at the time of the next general elec-tion. After all, it is unlikely that people who did not choose to challenge her in 1969 would do so in 1990 when the election will be much nearer.

On the other hand, the idea "Everything flows and nothing of fighting an election in 1991-92 under Mrs Thatcher stays." There was dead stience and some embarrassment. Healey asked how many of the 300-odd audience had learned cannot be all that attractive. She will have been around by then longer than most leaders Greek at school. Not one of them put up a hand. Healey was deeply shocked. in the democratic world have ever been. The "time-for-achange factor" among the elec-torate could be very powerful. There would also be something

overriding priority is now German unity, both because that is where his electoral interest lies and because it is

there that he has a chance to play a unique role in his country's history. Is there in fact any irreconcilable contradiction between German unity and the further political integration of the EC with its present membership? The French and the Commission say no. But they have to say that: to say anything else would mean asking the Germans to choose between their national aspirations and their ties to

force would thus come to be seen as a technical aspect of the maintenance of order rather than the ultimate manifestation of political power. Once that perspective is accepted

the Community would no longer have to see competence in military matters as the ultimate test of its political identity; and, the military blocs hav-ing ceased to exist, it would be free to recruit members in eastern Europe without either jeopardising its politi-cal vocation or posing a military threat to the Soviet Union.

We wholly disagree with your conclusion that political sensitivities and the possible effect on the UK balance of

payments should encourage a pedestrian approach to opening np the European market for corporate control. This blandly assumes that a lopsided restructuring of EC business might not lead to a political backlash here. The real need is for the UK Govern-

ment and European Commission to be given the strongest support for their initiative in nical barriers to contested takeovers - even if the timetakeovers - even II the time-scale may be a long one. Your Business Law report (November 23) peffects the dis-satisfaction of business in the UK and other parts of the EC with political compromises now being shaped on the

ber 21 will settle on a text which will fail to offer a one-

stop shop for companies con-templating significant cross-border acquisitions or mergers. Forms of words may he agreed which blur the dividing line between the jurisdiction of national competition authorities and the Commission; directorate general IV (competition), in contrast to its powers when examining cartels, will not be able to weigh the benafits to production, distribution and technical progress against possible anti-competitive effects when it looks at EC-scaled mergers and acquisitions. While there may be a few legitimate reasons for public

interest which prompt EC member governments to look at mergers and acquisitions that have passed muster with the Commission, we think that powers to second guess the Berlaymont because it may

have missed some anti-compet-itive effect on an ill-defined "local" or "distinct" market is simply going to leave compa-nies with multiple control.

The only difference from the present situation will be that they may have to jump several hurdles in future, whereas now they know that they will have to, before they restructure operations across EC borders. That is why big companies in the UK are thinking that the regulation may leave them

worse off than now. Sir Leon Brittan should stand out against the BC member states' attempts to dibute the Commission's original con-cept. He might even invite his colleagues who promote derecolleagues who promote dere-gulation in the EC to assess the cost for businesses of comtion now being patched together. The result might be instructive. John M.M. Banham,

of hand. A lower pound sterling midoubtedly increases import prices and, to the extent that real wages cannot easily be reduced, makes it more diffiexacerbate the problem of reducing the longer term underlying inflation rate. The cult to limit inflation. But UK Government's aims, "to higher interest rates, which raise mortgage payments, add to living costs and encourage bring inflation decisively down and keep it down," cannot be achieved by high interest rates higher wage demands. This also makes it more difficult to and a strong pound. Brian Reading, 83 Shakespeare Tower, limit inflation. I myself would rather see the price of Barbican, ECZ

Stomping over the Savoy

From Mr Anthony Rowley. Sir, Lex writes an extraordinarily biased, ill-considered note on the Savoy Hotel group (November 30). The Savoy, the

guish between index arbitrage and other kinds of computer-assisted trading. Index arbitrage is merely the simultaneous adoption of equal and opposite positions in the shares which comprise an index, and in a futures con-tract on that index tract on that index. The purpose of such trades is to bring the spot and futures markets into equilibrium. Because this is a risk-free arbitrage such opportunities

disappear as soon as they are exploited. Without such arbi-trage the spot and futures marksts would become "unhinged," the size of total markat would be reduced, liquidity would suffer. The Brady Commission report recognised this, and recommended closer integration of the spot and futures markets. The other kinds of computer-assisted trading do what has always been done by portfolio managers, but more rapidly and mechanistically. The strat-egy of selling in a falling market and buying in a rising market became formalised in the mid-1980s into portfolio insur-ance. Similarly a portfolio manager has always had the opportunity of trying to track a

closing-down the forward market in sterling to prevent inter-est-rate parity from holding. The truth is that these securities houses cannot make much profit from stock-index arbitrage - therefore it is a convenient scapegoat. They also know that passive managemant of portfolios has been superior to active management over recent years, as the fees have been so much smaller. Gordon GemmilL The City University Business

Barbican Centre, EC2

Productivity gap in Ulster From Professor N.J. Gibson. Sir. Hitchins and Birnie (Letters, November 14) rightly attach importance to the

E niry into the exchange rete mechanism (ERM) of the European monetary system must necessarily lower UK interest rates. The UK's economic performance in the last 30 years has been gravely handicapped by the endency of consumer demand to rise more strongly than sup-ply in economic upswings and in response to easier money. in the last 10 years this tendency has been made worse by finan-cial liberalisation and by the weak growth in the capacity of the economy to produce trada-ble goods. Unless the signals in the economy are permanently reset to restrain consumer demand relative to the supply of tradables. ERM entry will prove a disaster for the balance of payments and inflation. A property tax would prevent such a disaster and make low interest rates sustainable.

The main effect of financial come ratio. liberalisation on consumer demand has been through asset values¹. One effect of financial liberalisation was to fuet the house and land price boom. Between 1981 and mid-1968 residential land prices in England and Wales rose by a factor of 4.6 and in the south-east by a factor of 5.8. Relative the composite net wealth/in-come ratio in the 1980s explains most of the decade's consumer boom and so the coleast by a factor of 5.8. Relative to UK per capita personal dis-posable income, the increases were respectively 2.6 and 3.3 fold. Only a part of these increases is explicable by the growth in incomes, by lower interest rates and by demo-graphic trends. graphic trends. An indicator of financial lib-

consumer boom and so the col-lapse in the savings ratio. House prices — and hence underlying land prices — are important for two reasons. One is the sheer weight in the per-sonal sector's Illiquid wealth of residential property. This was around 57 per cent in 1988 but would be higher still if the effective weight of pension and lifs insurance rights were reduced because of their lower liquidity. eralisation can be derived from the average proportion of the value of a property advanced in building society mortgages to first time buyers. In 1988 this was 85 per cent. Under pre-1981 credit conditions, but liquidity. given 1988 interest rates and average house price to income The other reason is that resi-dential land markets are by far the most distorted markets in ratios, we estimate that build-ing societies would have advanced only 73 per cent of

the UK. They have therefore

the value of a property to first time buyers. The difference between 73 per cent and 85 per **Consumption, wealth and income** cent is a measure of how easy credit has become since 1981. 0.970 The other effect of financial The consumption to income ratio C/Y liberalisation has been to make illiquid assets such as houses and the composite net wealth to income ratio A/Y 0.950 more liquid. Households have become more free to rearrange their financial and property 0.930 portfolios in order to borrow at the most advantageous rates – that is, at the mortgage rate – and to invest or spend these funds as they see fit. The more liquid an asset, the AN/ 0.910 0.890 greater the spending its posses-sion makes possible. We esti-mate that before 1981, illiquid CN 0.870 assets such as houses, equities and pension rights had a spending power per pound equivalent to around 43 per C/Y-1-personal savings ratio. Ranges of series matched cent of liquid assets such as

No ERM entry without a property tax

By John Muellbauer and Anthony Murphy

bank and building society been much more affected by accounts. By 1988, this had financial liberalisation than risen to around 59 per cent, as gilt and equity markets. illiquid assets had become effectively more liquid. The supply of residential

land is restricted by some of the tightest planning controls in Europe. Demand for land is Based on these estimates, it is possible to construct a comb posite measure of liquid assets, debt and Illiquid assets relative to income. The graph shows its movement in the last 25 years against the consumption/inartificially stimulated by layer upon layer of subsidy or tax advantage. For the poor there are Housing Benefit and subsi-dies to housing associations. For landlords there are the The correlation is striking. For example, the fall in the measure after the first oil very generous Business Expan-sion Schemes. And dominating

the first two, for owner-occupi-ers we have mortgage interest shock and the associated infla-tion does much to explain the tax relief and no capital gains tax on main residences. fail in the consumption/income retio and so the rise at that Mrs Thatcher would like to time in the savings ratio. Simi-larly, the unprecedented rise in raise the current £30,000 loan

raise the current 130,000 loan ceiling for mortgage interest tax relief, through house price inflation, the ceiling has some-what eroded the concession's relative importance. Moreover, she is the architect of the abolition of domestic rates, the UK'e form of residential property tax. This, it has been esti-mated, will make house price/

income ratios perhaps 18 per cent higher in due course. Given the sharpness of the economic showdown in the UK, it seems likely that the trade balance in 1990 will show a repid improvement. Together with a cautious March Budget, this will allow interest rates to fall. Evelyn Brodie of Morgan Grenfell argues that the combination of these falls and the

abolition of domestic rates will then set house prices in the south-east rising at an annual rate of 10 per cent. If she is right, the improvement in the trade balance and the reduc-tion in inflationary pressure will be shortlined.

will be shortlived. The high interest policy of 1988 and 1989, like that of 1979-81, is causing long term damage to the capacity of the component to produce tradables economy to produce tradables by curtailing investment and raising business failures. It does not adequately address Britain's fundamental prob-lems. And though it raises the resistance of firms to wage demand, higher mortgage costs

increase such demands. Entry into the European exchange rate mechanism would permanently bring down UK interest rates relative to European ones. Given current institutional arrangements in the UK, these interest rate reductions will set off the consumer boom again through asset price inflation - which also has inflationary consequences through the labour markets². Under these condi-tions it will be impossible to combine reasonable economic growth in the UK with the maintenance of a stabla exchange rate. If Mrs Thatcher's myopia on housing and land prevails, entry into the exchange rate mechanism could be a disaster. One of us has put forward a

modest reform proposal (FT, March 20 1989). This is to raise roughly the revenue now obtained from owner-occupiers through domestic rates by a national tax on residential land values. The tax would be indexed annually to local land price indices. By including land zoned for residantial development but not built on, the burden on owner occupiers would be less than now.

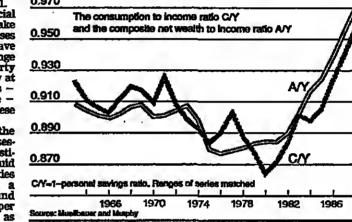

Moreover, by creating incen-tives to release building land early, such a tax would bring down land price to income ratios by more than the abolition of domestic rates raises them. Such a tax would also have a number of important microeconomic benefits, among them its function as a congestion tax and a marketbased, non-interventionist regional policy. This tax would go some way to balancing the artificial stimuli to the demand

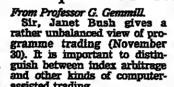

for land discussed above. ¹ "Why has UK personal sav-ing collapsed?" Crédit Suisse First Boston Economics, July

CIVIC FORUM SEEKS OPPOSITION COALITION Fresh challenge to Czech Communist Party

By Leslie Colitt in Prague

CIVIC FORUM, the Czechoslovak opposition move-ment, said last night that it would transform itself into a political party and offer coali-tion talks with all non-Com-munist parties in order to form a government.

a government. The new challenge to the ruling Communist Party came as more than 250,000 demon-strators filled Prague's Wenceslas Square in an angry protest against the Communist Party's domination of the country's

proposed new government. The demonstration was

called by Civic Forum to pro-test about the Communist-dom-inated government announced Communist Party in the week-end Cabinet changes - to break formally with the Comat the weekend by Mr Ladislav Adamec, the Czechoslovak Prime Minister. Mr Vaclav Maly, a leading opposition figure, told the crowd that Civic Forum would establish its own "political stanting" munist leadership. The two smaller parties were each allot-ted one member in the 20-mem-ber Communist-domineted

ber Communist-domineted Cabinet named on Sunday. Significantly, Mr Maly spoke to the crowd from the balcony of the headquarters of the widely read Socialist Party newspaper. Syobodne Slovo, which offered Civic Forum combine a platform when the The call for an anti-Communist alliance appeared to be aimed to encourage the small but influential Socialist and speakers a platform when the oppositon held its first rallies two weeks ago. People's Parties - which joined the coalition with the

Mr Jiri Muller, the Socialist Party spokesman, said: "Civic Forum is saying join us, we are the new government." It would be difficult for the Socialist Party leadership to resist the offer, he added.

The Czech opposition move has parallels with the coalition offer made earlier this year by the Solidarity movement when it offered to form a coalition government with Poland's Peasants Party. That alliance led eventually to the first non-Communist government in Eastern Europe.

The good-natured crowd in Wencesias Square repeatedly called ont "Demisi" (resign) and applauded calls for a genand applaunen caus for a gen-eral strike next Monday if the Government did not step flown by then. A general strike last Monday led to the resignation of Mr Aramec's previous gov-ernment. Tens of thousands of inhabitants of Bratislava held a circular reliv

a similar rally. Demonstrators in Prague also demanded that President Gustav Husak reconsider his position and resign. Czechs well-placed, Page 3

UK underlines tight money, firm pound

By Peter Norman, Economics Correspondent, in London

S billion

structure."

MR JOHN MAJOR, Britain's Chancellor of the Exchequer, UK official reserves yesterday underlined that he wanted a firm exchange rate for the pound with a tight fiscal and monetary policy to combat inflation.

However, in a masterly demonstration of how not to give any hostages to fortune, he left 46 the members of the House of Commons Treasury and Civil 44 Service Committee in the dark about what be meant by a firm 42 exchange rate

It was Mr Major's first expe-If was Mr Major's first expe-rience of being grilled by the committee of MPs from the three main parties since he succeeded Mr Nigel Lawson just over five weeks ago, and the late afternoon session in a stuffy committee room was a graphic illustration of the new style of Chancellorchin style of Chancellorship.

Mr Major avoided his prede-cessor's occasional lapses into heavy sarcasm. He charmed the committee early in the ses-sion by admitting that the Gov-ernment had made mistakes by casing monetary policy after the stock market crash of October 1987 and giving too long a deadline in the 1988 Budget for scrapping multiple tax relief on single home loans, a move which spurred a summer boom in house purchases and prices. Whereas Mr Lawson often

gave the impression that be had better things to do than tell MPs abont his policy, Mr Major was unfailingly polite.

But like the banker that he

had once been, he showed that he was adept at saying no. He was asked what constituted a firm exchange rate. It was "impossible and undesirable" to define this.

He was asked abont ster-ling's 50 pfennig fall against the D-Mark since February. Maintaining a firm exchange rate did not mean being "rigid

against each and every cur-rency," he said. Mr Major conceded that a "fall in the exchange value of

Major: adept at saying no

the currency for a material period of time would loosen monetary conditions and have an effect on inflation." But he then declined to define a material period of time.

As if to add to the confusion, he pointed out that the pound's value, measured on the Bank of England's exchange rate index, was "within a whisker" of the rate at the beginning of

Throughout the session, the Chancellor repeated the new Treasury mantra that interest rates would be fixed in the light of the exchange rate, monetary aggregates and other

Mr Major stressed that the UK needed a firm policy framework. However, in the same breath he said he was disinclined to close down any of the policy options open to him. When reminded that the **Conservative Government in** its early years had devised a medium-term financial strategy to guide its actions, he observed that there would

observed that there would have to be changes of emphasis from time to time. The economy, he said, was moving and fluid. Perhaps inspired by the Maita super-power summit, he said running it was "something like surf-boarding in a fairly heavy sea." But Mr Major did add one or two small items to what is two small items to what is known of his views.

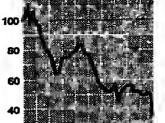

He said the Government's policy was not to liquidate the national debt, merely to stop it rising. He rejected the idea of This is the rejected the mea of an incomes policy as unsus-tainable, unfair, unworkable and sure to be bypassed. The Chancellor also made clear that further rises in bank base rates from their current is not have a check of both

15 per cent level should not be ruled out.

Cracked eggs in Asda's basket The one good thing abont yesterday's profits warning from Asda is that it seems not to carry a message about food retailers overall. Asda's prob-lems are sadly specific: cloth-ing and footwear, where sales Asda Share price relative to the

FT~A Food Retailing Index 120 1 1 1 2 2 3

1980 82 84 86 8889

company now grappling with perhaps the biggest manage-ment job in its history, the Gateway superstores. It is also worrying that Asda industry and another battle-front on which to combat GEC-Alsthom and the US Gen-eral Electric. As for NEI, the rationale for its own formation went through the process of lowering brokers' forecasts as recently as October, without apparently grasping the scale of the problem. It now finds back in 1977 was to create an integrated power generation company; it was starting to look sadly incomplete without the gas turbine capability which ABB provides. NEI had itself in the curious position of amouncing a 25 per cent fall in interim profits 10 days ahead of the figures them-selves. The inclusion of the Gateway stores should ensure that the second half will be at least as hed again a previous gas turbine joint venture with Mitsubishi, which venture with Mitsubishi, which has now been discreetly ditched, at least as far as UK sales are concerned. One assumes the explanation lies in ABB's role in equipping some 60 gas turbine stations world-wide.

As for the stock market, the joint venture will obviously not, by itself, reverse the severe recent underperform-ance of Rolls-Royce's shares; that has more to do with fac-tors like the UK engineering industry dispute than with worries about the NEI merger. But it is a step in the right direction.

British Aerospace

Yesterday's 4 per cent fall in the British Aerospace share price might seem an odd response to further evidence of the company's prowess as deal-maker. The debated £38m, fall to 165p in the share price of Rolls-Royce, NEI's owner since the summer. Short-term, the after all, would scarcely cripple BAe, even if repayable in full. But the market is more con-cerned about the £150m pur-chase price for Rover, thought the summer. Short-term, the joint venture's results may hardly register in Rolls-Royce's earnings; it is still early days for National Power and Power-Gen in planning for the cheap "combined cycle" gas-andto have been paid long ago. A round sum of nearly £200m deducted from BAe's cash flow

multiple of 8, a yield of 6 per cent and a discount to stated net asset value of some 40 per cent. But the shares will cent. But the shares whi always be on a switchback. The furore over asset values, after all, has rather disguised the question of what happens to Rover if the trading goes wrong.

M & G

The independent fund man-The independent fund man-agement sector is still thriving, judging by M & G's figures yes-terday. A 40 per cent increase in funds under management and a net unit trust inflow of £277m indicates perhaps a flight to quality by small inves-tors after the 1967 crash; but it less illustrates that it is still also illustrates that it is still possible to prosper via the independent intermediaries. The fact that M & G's costs are at the low end of the scale must help, but its long-term record allows intermediaries to point to reassuring statistics when advising clients. Now that Mr Bond is gone, there is no bid speculation surrounding the group: the shares, assumalso illustrates that it is still the group; the shares, assum-ing 33p of earnings this year, are in line with the market on are in ime with the market on a prospective p/e of 11.5. Since fund managers' profits are geared to the index, any sign of a premium rating would also be a sign that the bulls are hack in control of the equity market.

TVS

The settlement between TVS and Arthur Price may be too little and too late to save the company's deal-making reputa-tion, but it at least sets a good example for others when acquiexample for others when acqui-sitions go wrong. Mr Price received \$104m in cash when TVS bought MIM for \$325m last year; to have the former CEO take \$4m in severance money and 10 per cent of the equity as well would have added insult to shareholders' injuries. MIM is set to lose \$25m this year and its per-caived value can be judged by the fact that TVS's market cap-italisation is now less than it italisation is now less than it

was before the acquisition. Even success for MTM in creating new shows will burden TVS with additional costs:

The maximum writing down allowance on an asset is 25% each year, right? Wrong.

At RoyScot Corporate Leasing we're not inclined to take accepted wisdom unchallenged.

Wheo it comes to writing down allowances many companies aren't eware of their rights.

With many assets, you could still be waiting to get tax relief long after they cease to be useful to you.

But items which can be defined as short life assets may be treated differently. Their entire cost can be deducted from your tax bill less any writing down allowances already claimed, at the time you dispose of

So you get the whole tax benefit much sooner.

But what criterie determine whether an asset is eligible?

Unsurprisingly, it's an area in which we have considerable expertise. And we'll be only too pleased to share it with you.

Incidentally, if you have insufficient tax capacity, you can use ours, courtesy of The Royal Bank of Scotland Group profits. Which is why we specialise in asset acquisitions, particularly plant and equipment, over £1m.

It's our aim to use ingenuity, in order to make the lease fit the business need (not the other way round).

After all, that's the way we get our repeat business. (Something we've had our share of over the last two decades.)

But before we can establish a working relationship to cover your future acquisition needs, we have to understand your current ones. Tom Carr at our head office on 0242 224455 or Bill Lowe at our

London office on 01-623 4356 are the people to speak to. And they'll promptly arrange a free quote for you.

Written down of course.

LIN Broadcasting warms to McCaw

it appears that after weekend talks, LIN Broadcasting is warming to an improved takeover offer from McCaw Cellular Communications that values the New York company at around \$6.8bn. Having fought McCaw's takeover bid by bying to merge with the cellular telephone Interests of BeliSouth, LIN now appears more attracted to McCaw's raised bid. Page 21

Breaking out of its mould

Systems integration - putting together computer hardware and software from different manufacturers to create tailored solutions to customers' data processing problems — is a tast growing and intensely competitive area in information technology. So much so that analysts believe that only a few very large compa-nles will aurvive in the next decade. Why, then, is Computer Sciences Corporation, a large but low-profile California-based information tech-nology company which works chiefly for the US Government, looking to break out of its federal systems mould and into the Integration mar-ket? Page 22

What's yours called?

Apart from the likes of Elizabeth Taylor, most people do not have the wherewithal to buy dia-monds very often. When they do, they might pay a little more than the market price to have a stone of a guaranteed quality and size, from a big, known producer. So runs Argyle Dia-monds' argument for introducing diamonds with brand names. Argvie, the world's largest diamond producer in volume terms, has found from test marketing in Australia that buyers are willing to pay a premium of up to 25 per cent for a named Argyle gem compared with a similar unbranded diamond. **Page 34**

ABB in UK power station venture

Three Danish banks to merge

By Nick Garnett in London

THE BATTLE between equipment makers to build the UK's next generation of power stations intensified yesterday when Asea Brown Boveri and Northern Engineering Industries announced the formation of a joint venture to market equip-ment for small stations.

Joint venture to market equip-ment for small stations. ABB, the Swiss-Swedish electri-cal group, and NEI will jointly engineer and market in Britain so-called combined cycle and co-generation stations which are itraly to be the most compared. likely to be the most common type of new power plant in the UK over the next decade.

The UK Government's recent decision to shelve plans for three nuclear stations, following the abandonment of three other projects for large coal-fired stations, means that smaller combined cycle (gas and steam turbine) and co-generation (heat and electric-ity) stations will become more

The deal gives ABB, the world's biggest power engineer-ing group, direct access for the first time to the UK's power sta-tion market. It will also bolster the position of NEL, which is a subsidiary of Rolls-Royce, as an equipment supplier for small stations. The deal will intensify the com-

petitive pressure on other UK power station contractors such as GEC-Alsthom, Hawker Siddeley and John Brown. This is one of several blows GEC-Alsthom has

had in the power sector in the past few weeks.

The 50-50 venture between ABB and NEI will be called NEI-ABB Gas Turbines and will be a separate company with a small headquarters staff based in Newcastle npon Tyne, NEI's head-

quarters. The business, which will also market ABB's anti-pollution kit for power stations, will be under the chairmanship of Mr Robert Hawley, NETe managing director. It will sell stations in the UK and Commonwealth countries but not in continental Europe.

ABB will supply gas turbines above about 35 megawatts. Rolls-Royce, through NEI, will provide gas turbines below this

rating. NEI will be linked to a company with proven co-genera-tion and combined cycle technology – ABB has built 60 com-bined cycle plants around the world; NEI has supplied only one combined cycle station – in Bahrain.

NEI hopes to manufacture equipment such as turbines and boilers for stations sold through

the joint company. As part of ABB's recently agreed \$1.6bn bid for Combustion Engineering of the US – a deal still to be ratified – ABB will take control of the US group's 35 per cent stake in NEI Interna-tional Combustion, NET's Derbybased boilermaking arm. Lex, Page 18

GEA in Germany's biggest share issue for three years

By Andrew Fisher in Frankfurt

WEST GERMANY'S biggest public share offering for three years will take place this week with the DM775m (\$435m) issue of with the Dai?/Am (\$435m) issue of stock in GEA, a Ruhr-based engi-neering company which speci-alises in energy-saving and anti-pollution systems. The share issue, the largest since the DM750m flotatloo by the Government in 1986 of 40 per

ceot of the energy, chemicals, and aluminium concern Viag. will invoive 62.5 per cent of GEA's cepital.

However, the Happel family shareboiders will retain control with three quarters of the voting stock.

The public will be able to snb-scribe for voting shares at a price of DM540 each and preference shares at DM485.

The issue will be led by Commerzhank, which said that GEA should produce earnings of DM36 a share in 1990, producing a price-earnings ratio of 15 for the voting shares and 13.5 for the

preference. Mr Kurt Hochheuser, a director of the bank, said this compared favourably with a general price/ earnings ratio of at least 16 for German mechanical engineering stocks. GEA has subsidiaries in 12

countries ontside Germany. It employs some 5,500 people and will have a group turnover of around DM1.2bn this year, rising to DM1.4bn in 1990.

Commerzbank said high growth rates were forecast for the next few years, following rapid expansion in the 1980s. Mr rapid expansion in the 1980s. Mr Hochheuser said this had been financed from GEA's own resources. GEA expects a net profit margin of 6 per cent next year against 5.8 per cent in 1989. The share offering reflects the wishes of the family shareholders to introduce outside capital after turnover has nearly doubled in five wars "The formily now bes five years. "The family now has too much control for a company of this size," said Mr Otto Happel,

Not just Number I in Plumbing Supply

WOLSELEY

head of the supervisory board, in April. **GEA** has bought 17 companies in the last eight years, just miss-ing the opportunity to double its size last year when it was outbid for a desulphurisatioo company

vor a descripturisation company with sales of DM900m. Much of its foreign business is in industrial air coolers, where it claims a world market share of 40 per cent against 8 per cent for its nearest rival.

Mr Happel said it was now looking harder at acquisitions outside Germany, especially in

the US and Britain. In April Mr Happel stated bis intention of adding a fourth diviston to the company, in machine building and electronics, through acquisition. The other three divi-sions are heat and energy tech-nology, air conditioning and refrigeration and food processing successing

SmithKline alters sell-off plan

By Peter Marsh in London

SMITHKLINE Beecbam, the Anglo-American pharmaceuticals and consumer-products company, has dropped its plans to sell its cosmetics division in a single unit. It also says it will accept less than the mooted going price for the division of £600m (\$936m).

Mr Bob Bauman, SmithKline's chief executive, made the announcement yesterday while unveiling a 12 per cent increase in pre-tax profits for the company for the nine months to September

The results were the first for the company since its formation in July as a result of a merger

five months from July to Decem-ber. SmithKline will declare a second interim dividend on March 15 payable on April 17. Mr Bauman said he had been unit.

disappointed at not being able to find a buyer for the cosmetics unit since it was put up for sale after the merger. SmithKline says it wants to get out of cos-metics to concentrate on pharmacetticals, in which it is among the world's top five companies counting both prescription-only

and over the counter drugs. Instead of selling the cosmetics division in one piece, SmithKline has split it into two units, cover-

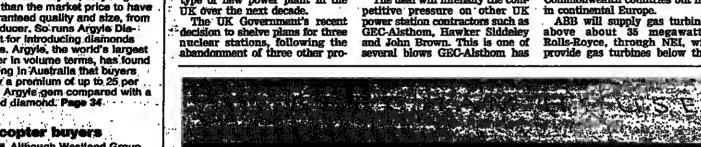

ment for deals" as the reason the sale had not gone ahead. Ana-lysts believe SmithKline may receive only £400m-£500m for the

Regarding SmithKline's prog-ress since the merger, Mr Bau-man said he was "feeling good" about the process of integration. The results for the first nine months "showed a continuation of business momentum". SmithKline has about 150 teams of managers studying the

activities of the former Smith-Kline Beckman and Beecham operations and deciding how to

bring them together.

19

reported a 19 per cent increase in pre-tax profits for the year to September, to £20.7m from £17.4m, the helicopter group has seen a fail in new orders, despite

helicopters that it is due to buy. Pege 25

Big players show their mettle

Political, economic and technical grounds com-hined to give world stock markets a boost, with Europe, Japan and the US rising by 2.7, 2.4 and 1.8 per cent respectively. The result was a 2.15 per cent rise in the FT-Actuaries World Index, the best performance for nearly a year. Page 46

Trevor Humphries Bob Bauman unveiled a 12 per cent increase in pre-tax profits for the nine months to September 30 in the first results since the company's formation in July as a result of a merger between the US's SmithKline Beckman and Beecham of Britain. He said the figures "showed a continuation of business momentum" and added that he felt good about the process of integration.

between the US's SmithKline Beckman and Beecham of Britain.

Profits from continuing operations at the taxable level rose to £587.3m for the nine months, from £524.3m for the corresponding period last year. Sales increased by 16 per cent from £2.71bn to £3.15bn.

The first interim dividend for the company is 2p, covering the

ing the UK and continental Europe. These have annual sales of roughly £240m and £160m. Mr Bauman said that leading

cosmetics manufacturers, such as the Anglo-Dutch Unilever, Rev-lon of the US and France's L'Oreal, had been slow to show an interest. None the less, he hoped to conclude the sale by early next year

He blamed "a difficult environ-

SmithKline did not yesterda break down profits from the different divisions of the merged company But it said that sales of pharmaceuticals had increased for the nine months by 15 per cent, to $\pounds 1.6$ bn from $\pounds 1.4$ bn last year.

There had beeo an especially good performance in the US from Tagamet, the company's big-selling ulcer drug.

BTR will pursue flotation in US

By Andrew Bolger In London

BTR, the industrial conglomerate which is one of Britain's biggest companies, said yesterday it was pursuing plans to float off its US activities. However, Mr John Cahill, chief

executive, said he did not expect

executive, sain he did not expect to make any moves concerning a flotation before BTR reports on its full-year results in March. BTR is keen to repeat the suc-cess of Nylez, its 62 per cent owned Australian subsidiary, which in the first six months of this year reported a 113 per cent increase in after-tax attributable profits to \$173m.

Analysts believe that a quoted subsidiary would allow BTR to raise its profile in the US and to raise cash on Wall Street to fund

further acquisitions. Mr Cabill said the companies to be included in any US flotation would be the BTR paper and valve groups and Tilcon Hold-

John Cahill: no US flotation before March next year ings, a construction supplies and

aggregates company. Mr Cahill estimated that these companies would fetch £1.5bn-

\$7.5bn. He added that the selec-tion of other US companies to be on whether they would be rated at a premium to the market. BTR could obtain a quote by acquiring a US company, using equity to fund the purchase. Speculation has centred oo Owens-Illinois, a leading bottle manufacturer, which is owned by Kohlberg Kravis Roberts, the US

£2bn (\$2.3bn-\$3.1bn), compared with BTR's overall value of

ieveraged huy-ont specialist which has filed for permission to buy up to 15 per cent of BTR. However, Mr Cahill said he did

not envisage BTR's US flotation plans involving KKR - which did not have "even a toehold" on BTR's shares register. He did not think KKR would sell Owens-Illinois, which had been taken private and would not immediately provide a quoted vehicle.

Asda warns of sharp profits fall

lower than planned, and that the

By Maggle Urry in London

ASDA GROUP, the UK food retailer, said yesterday that its interim pre-tax profits would be 25 per cent lower than the £109m (\$170m) made in the first half of last year. It also warned that group pre-tax profits for the full year would be "significantly below" last year's £246.6m. The shares fell 18p to 117p, a drop of 13.3 per cent.

Mr John Hardman, chairman, added: "We are over 21, and there is no use crying about it." He blamed the downturn on

difficult trading conditions for non-food items, such as clothing and footwear, which make up about 30 per cent of the business in the Asda stores, and the carpet and furniture retail business of its Allied Maples subsidiary and its MFI Furniture Group associ-He also said that efficiency lev-

els in the group's new fresh food distribution system had beeo

late completion of the acquisition of 61 Gateway superstores, bought for £705m from Isosceles, the new owner of Gateway, would hit second-half profits. Asda said it would at least maintain its interim dividand and remained confident of the strategic direction of the business and looked forward to a good

recovery. The company also announced a property deal which will raise cash of £275m net for the group. This will bring down the group's balance sheet gearing

from 116 per cent to 73 per cent. Mr Hardman said he aimed to reduce gearing to 40 to 45 per cent by the end of the 1990-91 financial year. Elsewhere in the retail indus-try, a cut in profit forecasts for Ratners, the jewellery retailer,

from two stockbrokers knocked 20p off the shares to 251p. Stockbrokers said they had

expected Asda's profits to fall in profits in the current year, for Asda, but not by as much as was implied in yesterday's statement. They are now looking for pre-tax profits of £180m to £185m for the year. against £246.6m in 1988-89. Mr Hardman said that sales in the Asda superstores were op 11 per cent in the first half of the year, but that pre-Christmas trad-ing was sluggish. particularly for beers, wines and spirits and nonfood lines.

Operating profits of Asda Stores would be unchanged in the first half, he said. Changes in accounting policies and lower pension fund contributions would benefit first-half profits by £8m. In the second half, he said the new ranges of clothing from the George Davies Partnership, to which will be launched in Febru-

ary, should improve profitability, though initially they would mean a £3m exceptional charge. Lex. Page 20

MIDLAND MONTAGU ASSET MANAGEMENT WOULD LIKE TO MAKE AN ANNOUNCEMENT ABOUT THEIR WORLD SERVICE.

Global investment is hardly a new phenomenon hut like so many things. it is the quality and depth of service that distinguishes one operator from another.

At Midland Montagn Asset Management our global capability focusses oo diversification of risk and achieving the best possible return for institutional portfolios. We recognise that no two clients needs are the same, which is why we adopt a flexible approach which ensures that irrespective of the type of iovestment, it is always results that count.

Personal service is fundemental to our business philosophy. Each of our clients has a Portfolio Manager assigned

to their business which ensures personel attention to detail and a thorough noderstaoding of their needs.

All this is supported by fully computerised administrative back-up and reporting. And just in case this isn't enough, we bave full access to Midland Group's international and domestie network.

So yon can rest assured that wherever your investments may be our world service will be making them work for you around

call a special general meeting because he owns 71 per cent of Mondador's privileged shares and 43 per cent of the compa-ny's total capital. Although ny's total capital. Although some calculations suggest that even after a capital increase the De Benedetti camp may just fall short of an absolute majority, his aides were confi-dent yesterday. They also revealed that the Formenton family had signed an agreement last year to give Mr De Benedetti full control of the Amef financial holding

the Amef financial holding which owns 50.3 per cent of Mondadori ordinary stock by selling their 25.7 per cent of Amel in January 1991.

This would appear to pre-cinde a sale to Mr Berlusconi but it does not solve the immediate problem of different majorities controlling ordinary and extraordinary meetings.

Luxembourg gets fiscal over Hollywood

By Lucy Kellaway in Brusseis

SHERLOCK Holmes and Shaka Zuba have discovered what many others seem to have missed: that Luxembourg is the Hollywood of Europe. At least that is the general idea behind

a joint venture company set up yesterday to capitalise on the Government's generous concessions to the film industry. The partners in the scheme - the Lux-

embourg Government, Paribas Luxem-bourg Banque et Caisse D'Epargne de Luxembourg, and Harmony Gold - have grand ambitions. They may only have a mere \$6m worth of productions underway at the moment, but over the next few years expect to have financed \$300m of

films in the Grand Duchy. Thanks to a law passed at the end of last year, Luxembourg has become possi-bly the most attractive place to make films in the world – while it is not best known for its film talent, its fiscal incen-

tives are as good as anyones. Producers spending money in Luxem-bourg – even if it is only on hotel bills – get tax vouchers equivalent to 30 per cent of the amount spent. And unlike in most other countries, where everythe form the sprint Priters where everyone from the script writers down have to be nationals, in Luxen-

bourg there are no strings attached. The new company, called Harmony Gold Finance of Luxembourg, intends to finance US and European international productions.

productions. It will start with a four-hour classic children's television programme — eract details yet to be announced — and plans to move on through Shexlock Holmes, and something called "Shaka Zulu: The Missing Chapter."

Luxembourg's desire to have a film industry is part of its move to diversify away from its traditional areas of strength in steel and banking.

Rütgerswerke says earnings have climbed SCOA plans

RUTGERSWERKE, ths West German chemicals group, said earnings in the first nine months of 1989 climbed more than 15 per cent above last year's levels, boosted by strong growth in foreign turnover,

AP-DJ reports. The company, which is majority owned by the coal group Ruhrkohle, said group sales gained 15 per cent in the nine months ended September 30 to DM2.56bn (\$1.4bn). In an interim report, the company

did not state to what levels earnings had climbed, saying only that they rose above the 15 per cent rate that sales gained.

Ritgerswerke said despite a levelling off in earnings towards the end of the year, it expects the 1989 result to be better than the 1988 profits.

The company said October sales rose 15 per cent above levels a year earlier. Basic chemical sales climbed 25 per cent to DMI.01bn, syn-

stake in UAL from 9.7 per cent to 11.8 per cent in a series of share purchases disclosed on Friday. The group said earlier that it would launch a proxy fight to unseat UAL's management, but softened its rhetoric yesterday. Coniston said that

yescerday. Coniston said that its plans for a proxy fight would now depend on "the progress being made towards the consummation of an extraordinary transaction." The type of transaction now expected by many analysts on Wall Street would be a partial leveraged buy-out, which

publicly traded in the stock market. A restructuring of this kind would be much easier to finance than a full bny-ont because it would require less cash. It would also overcome one of the most controversial features of UAL's initial plan - the almost total absence of equity or subordinated debt in the restructured company's financial structure.

The first UAL buy-out plan failed because commercial banks were expected to lend more than 100 per cent of the buy-out price. The main equity

he company would have come from the notional value of contractual "givebacks" negotiated with the pilots' union in exchange for a controlling stake in the business, to be held through an employee stock ownership While UAL's lead bankers, Citicorp and Chase Manhattan,

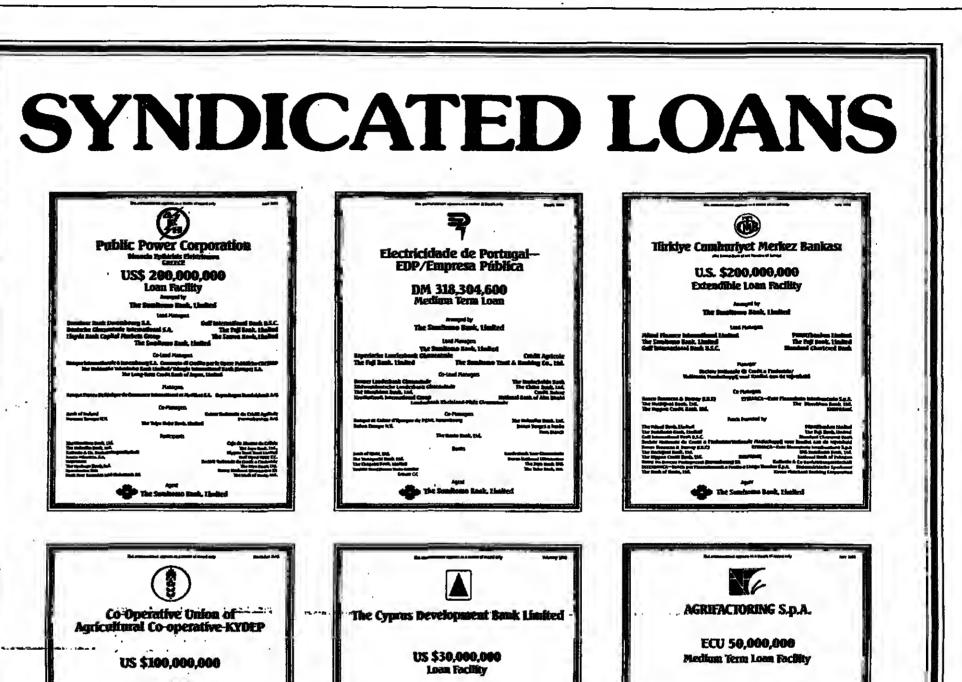

valued this "equity" at around \$2bn, some of the other banks

they approached to join a lend-ing syndicate were highly scep-tical about the security such "equity" was supposed to pro-One big reason for the bank-

ers' scepticism was the opposition to the initial buy-out plan expressed by the International Association of Machinists, UAL's biggest union. The company's management has since indicated that it would try to persuade all its main unions to join in a revised buy-out proposal. However, this requirement could create a large stumbling block to any new deal. The IAM has consistently

Integrated systems turn to Europe Du Pont to build plant

Alan Cane finds a US high-technology concern anticipating 1992

US Air Force. In Europe, projects range from the Loudon Airport "Laces" cargo scheme in 1968 to monitoring the progress of the London Stock Exchange's automated quote distribution system (Seaq) in 1987. It has also created a paperless freight management system for the Deutsche Bundesbahn. Why should CSC wish to move outside its highly profit-able niche in government systems? Mr Hoover sees the answer in straightforward commercial realities: "It became apparent to us, how-US Air Force.

became apparent to us, how-ever, that the commercial market for consulting and systems integration was growing faster than the federal sector. Our goal, therefore, is to become a major participant in that mar-ket - to have about half our revenues come from the non-

federal sector in five years." A principal concern is to be a key player in the European market where data processing markets are growing more rap-idly than in the US.

Ł

· ·--- ··· --- ·· · .

Mr Hoover sees globalization as the driving force; "It is forcing integration of systems across national boundaries. We are seeing that most intensely in Europe now as corporations gear up for pan-European approaches to husiness."

track 1.6bn spare parts for the

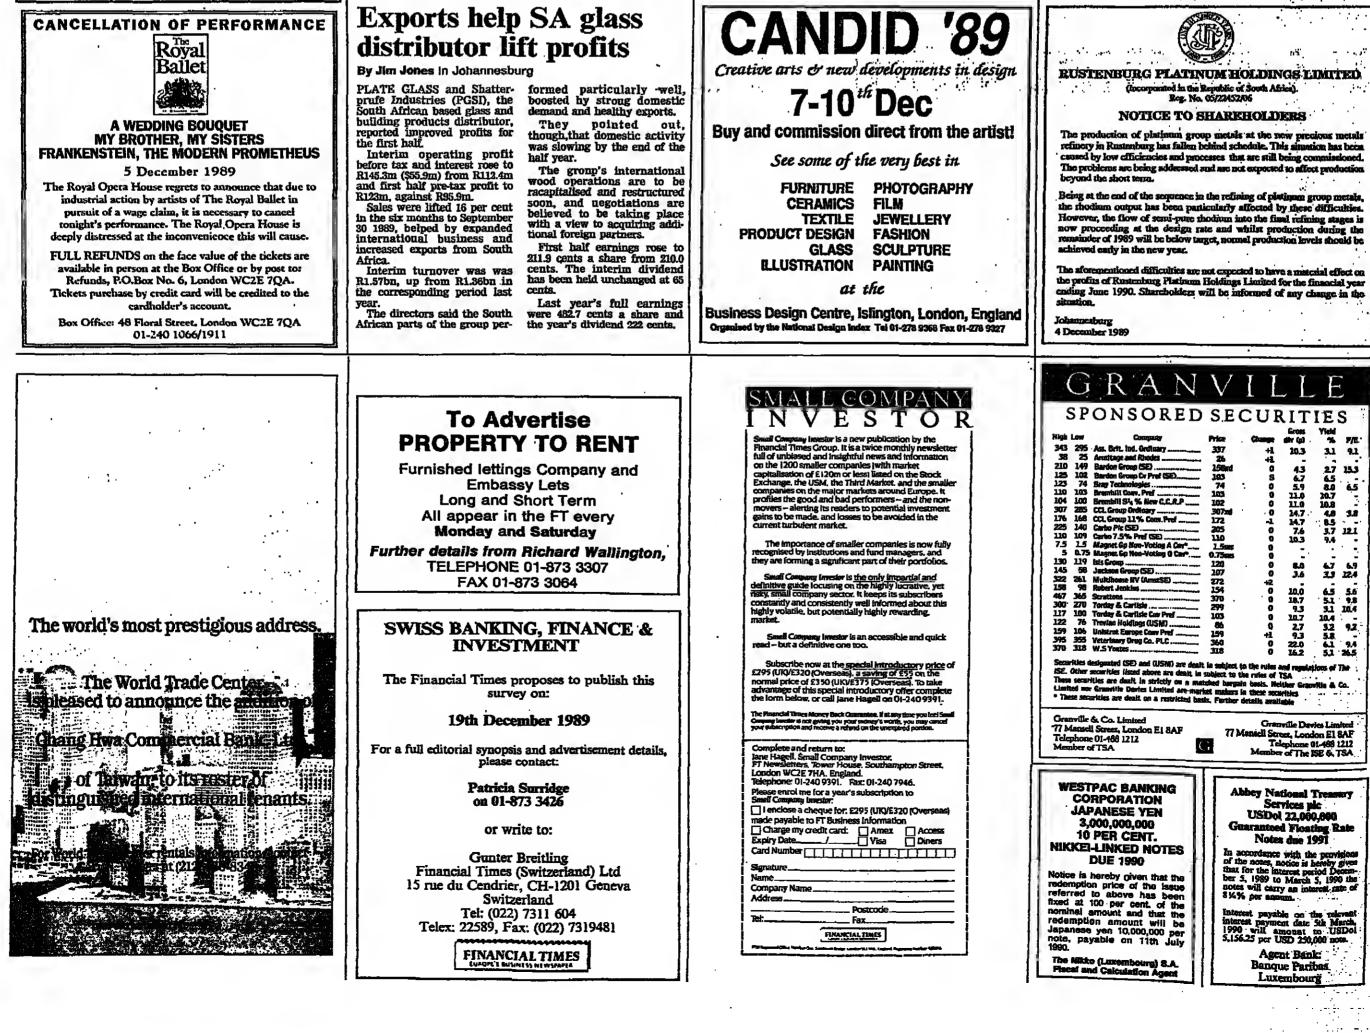

By Tom Burns in Madrid DU PONT, tha US chemical giant, is to increase signifi-cantly its European production base following a decision, announced yesterday, to invest \$1.2hu in a manufacturing complex close to the Eusidesa steel works in Asturias, northern Spain.

The site was originally ear-marked for a General Electric petrochemical plant. Construction of an initial \$200m Du Pont plant that will manufacture a fibre named Nomex, which is used in the aerospace industry, will begin midway through next year. As many as 12 further production centres planned by Du Pont for the complex will man-

ufacture polymers and other fibres. Dn Pont's investment will eventually create some 5,000 direct jobs in a high unemploy-

ment area that was severely shaken last year when GE decided to switch its \$1.6bn petrochemical project to Carta-gena, South East Spain.

Mr Edgar Woolard, Du Pont president, said the Asturias plant would help increase the company's competitivity in the European and in other world markets.

Inc based in Minneapolis which develops systems for medium-sized computers and has revenues of about \$9m. These deals come hard on the heels of the acquisitions of CIG Intersys in Belgium earlier this year and, last year, of the Index Group, a well respected and influential US-based IT

Mr William Hoover, CSC president and chief executive consultancy. CSC is not saying how big a dent these acquisiofficer confirmed the planned spending level as \$500m over tions have made in its war chest The Index Group has now become CSC Consulting, CSC's consulting arm, under Mr Thomas Gerrity, for-

mer chief executive of Index. Mr John Thompson, former chairman of Index's European operations, has been appointed European head of CSC.

CSC has been in husiness since 1959 hnt has until now remained determinedly low profile. This is chiefly because it derives about 70 per cent of its \$1.3bu revenues from advanced systems for the US government, many of which are confidential.

The large projects in the US, include a \$1m contract from the National Aeronautics and Space Administration to provide systems, engineering and analysis services over a 10 year period and a stock control and distribution system able to

five years. The kind of companies CSC was looking for, he said, would contribute skills, geographical advantages or both. CSC with \$1.3bn in revenues in 1989 was growing at 10 per cent a year, but he believed that its growth rate should be 25 per cent through a mixture of organic growth and acquisition. He thought that rate of growth could be maintained for four or five years. CSC's buying spree has already started. Earlier this month it announced it was in

Eulabank to sell off assets as shareholders withdraw

By David Lascelles, Banking Editor

BULABANK, the London-based consortium bank specializing in lending to Latin America, is to sell its assets to its parents and wind down operations. The decision was taken by the bank's 11 European and 11 Latin American bank share-bolders.

م من مر - ¢ e – holders. The alternative was to put

up more than \$200m in fresh capital to enable the bank to raise its provisions against Third World Ioans, which cur-rently stand at 28 per cent. This is well below the 50 to 70 per cent level set by leading banks.

A LEADING Indonesian banker has urged the Govern-ment to change a law blocking

foreigners from buying shares in banks listed on the Jakarta stock market, Reuter reports. Mr Abdulgsni, chairman of Bank Duta, a leading private bank, said the restriction

ignored needs of private banks to raise capital to finance

as other companies," said Mr Abdulgani, who is also chair-man of the Association of Pri-

vate National Banks."

Indonesian banker urges

banks.

share ownership reform

now be repaying deposits as they matured. This process would take until the middle of next year, when the question of what happened to the bank's licence would be addressed. Eulabank has about \$900m of Latin American loans. The 22 owner banks will buy them in proportion to their abarehold-

proportion to their sharehold-

ings in the bank. A year ago they subscribed \$205m to Bulabank, enabling it to raise the necessary provi-sions. But this year the cost of additional subscriptions proved too much. Mr Gunson said: "They took

Mr George Gunson, the bank's chief executive, said tion and concluded that this yesterday that Bulabank had was the best course." stopped taking funds in the money markets, and would people. Mr Gunson said there

been allowed to buy into all listed companies except

limit to a certain proportion of bank capital the amount banks can lend to any one business group, triggering the need for increases in banks' capital

would be a phased programme of redundancies as the winding down proceeded. Eulabank, which was formed in 1974 to provide finance for Latin America, is the latest of a series of casualties in the consortium banking sec-

tor.

A year ago European Brazil-ian Bank handed back its licence and is now managing its loan book as a commercial concern. In September Inter-mex transferred half its \$800m.

loan book to its parent banks and is continuing in a slimmed down form. Eulabank's European share-holders include Barclays Bank, Dresdner Bank, Union Bank of

Switzerland and Banca Nazion-ale del Lavoro.

Warm reception for Norinchukin Bank's debut deal

By Andrew Freeman

24

SEVERAL successful deals dominated new-issue business on the Eurobond market yesterday, although syndicate offi-cials said investors were cautious and unwilling to commit new funds. A \$200m debut issue for

INTERNATIONAL BONDS

Norinchukin Bank, the Japa-nese agricultural credit bank, was launched by the bank's own subsidiary to a fine reception. The seven-year bonds carried an 8% per cent coupon and were priced at 101% to yield some 72 basis points over the equivalent US Treasury.

Traders said Enropeen demand for the paper was strong, with much buying in ation of further interest in Tokyo overnight. The bonds traded as high as less 1.45 bid, before settling at less 1.65 bid,

well inside full fees of 1% pe cent. The spread over Tress suries narrowed to around 6 basis points. Proceeds were UDSW nswapped. IBJ International was the

lead manager of the firs Euroyen issue for KfW Inter national Finance, which met good reception. The borrower hosted e road

show for investors in Japan to lay the ground for the Y25br deal, which offered a yield of 6.28 per cent at less 1% per cent full fees. It was judged by syndicate managers as wel priced. Demand was mainly priced. Demand was mainly from European institutions and central banks, and the bonds traded at less 1.80 bid, inside fees. Dealers said there was some switching by clients. There was speculation that the proceeds were swapped into floating-rate US dollars. Parlbas Capital Markets brought an Ecul00m issue for Crédit Local de France to a mixed reception. Traders said

re around fees at less 1.85

Malaysia fund By Deborah Hargreaves

Hoare Govett

launches \$75m

HOARE Govett Corporate Finance yesterday launched a \$75m Maloysian Emerging Companies Fund which will invest in the smaller compa-nies listed on the Kuala Lumpur Stock Exchange, the latest in a flurry of new country fun

It will invest in companies with e market capitalisation of 300m ringgit (\$111m). According to Hoare Govett, the num-ber of companies of that size or smaller listed in Kuala

Lumpur account for 75 per cent of all concerns on the exchange, bnt only 21 per cent of the market capitalisation.

The fund will be marketed on a global basis to UK and overseas institutions which are keen to participate in the often phenomenal growth of emerging markets worldwide. The KLSE is open to foreign investors, which makes it easier for large institutions to gain access to blue-chip Malay-sian companies.

Hoare Govett aims to select firms with the best growth potential although the company has not forecast any growth figures for the fund.

US TREASURY bonds showed market was rebounding so small losses at midsession yes-terday in quiet trading as deal-ers remained cautious prior to Friday's key employment figwhat in response to low

what in response to low interest rates. Yesterday's figures follow last week's news of a 0.4 p cent fall in leading indicato in October, a jump in the late week's claims for unemple ures for November. At midsession the benchmark long bond was quoted & ment insurance and anot weak US purchasing manage

Bank of England announced that Britain's reserves for November had fallen by \$331m. would respond instead to news on inflation from the Treasury and Civil Service Select Com-This gave some indication of the heavy official support for sterling on the foreign exchanges – although not as heavy as October, the month mittee, et which Mr John Major, the the Chancellor, was giving evidence. News on inflation, however, came from another source. A Mr Nigel Lawson resigned as securities house forecast a Chancellor.

deterioration in the inflation **Consumer credit for October** rate to an average 6.25 per cent, e gloomier prediction and final retail sales figures were also released. Neither of these had much impact on gilts since the market had decided it than that of the Treasury. This sent the index-linked market higher, as investors sought to

expected to close today accommodate the new rise and escape from fixed interest into an adequate hedge.

The escape was also partially driven by fears of the damage wrought on the financial mar-kets by the leadership contest in the Tory party. The index-linked 2.5 per cent 2004 bond rose 10 ticks to yield 3.55 per

In the cash market at the lo-year range, prices fell: the yield on the Treasury 11% per cent 2003/07 topped the 10 per cent mark and came down nine

Cant mark and came nown must ticks in price. On Liffe, traders squared positions ahead of the expiry of the December bund on Wednesday, and prices were broadly unchanged.

■ THE FRENCH Treasury will sell between FFr7bn and FFr9bn of tap stocks at this week's bond auction.

The offering will comprise at ast FFribn of the benchmark 10-year 8.125 per cent 1999 tap as at each euction this year The Treasury will also offer further tranches of the 30-year tap, 8.50 per cent 2019, and of the variable-rate 1993 tap whose coupon is based on the yield of three-month Treasury bills,

By Stephen Fidler, Euromarkets Correspondent aged transactions have sold THE syndication among banks well. A £72.5m financing by Samuel Montagu for LWT Holdings, a television com-pany, which would be defined under US Federal Reserve of £1.35bn (\$2.1bn) in loans for Isoceles, the company formed to buy out the Gateway supermarkets group, is expected to close today. The success or oth-erwise of the syndication will guidelines as a highly-lever-aged transaction, was heavily be read as an important bell-wether of the state of leveraged aged transaction, was heavily oversubscribed. • Gamlestaden Finance, a sub-sidiary of Sweden's Gamles-taden, has a \$250m Eurocom-

Syndication for Isoceles

finance in the UK. S.G. Warburg, the arranger, plans e meeting tomorrow of lenders at which it will outline how well the transaction has fared.

The loans have taken longer than expected to syndicate as international banks have retreated from the UK leveraged market after problems with existing buy-outs. For example, Lowndes Queensway, the carpet and furniture retailer, said last week it was in talks over a second refinanc-

margin. • Rabobank Nederland is the first Dutch bank to issue Euroyen commercial paper and ing since it arranged a buy-out in August 1988. But Warburg has argued certificates of deposit in Lon-don after establishing a Y30bn programme. Dealers are that, as a food retailer, Gate-way does not suffer much from high interest rates.

Other leveraged deals have Nomura International, Daiwa met a poor reception, although some more moderately lever-Europe, Goldman Sachs Inter-national and Rabobank.

half losses

about second

By Vanessa Houlder.

A FALL in new orders Black Hawk helicopters which it was due to buy under the framework arms deal signed last year between the UK and Saudi governments. But West-land had prospects for selling the helicopter in two other Middle Eastern countries and one Far Rastern country, Mr

Jones said. The profit recovery stemmed from a sharp reduction in exceptional losses. The previ-ous year's figure of £13.2m, due to problems in a Sea King contract to India, was cut to 53.2m. This included a 24.5m provi-sion for restructuring at the Westland Technologies subsidiary, where plans to shed 420 jobs were announced in Octo-

Operating profits, 21 per cent down before interest at £20.3m, reflected a smaller number of profitable helicopter deliveries, more private venture spending in helicopters and the "disappointing performance" of We land Technologies.

Alan Jones - hoping Westland can maintain its non-defence share, which makes up to 40 per cent of its total orders

Mr Jones said the company's effort to make its non-military side cost-effective was "a sig-nal for the future". Sales for the year increased.

to £431.9m from £358.1m, with

69 per cent coming from heli-copiers and customer support. Karnings per share, after exceptional items, rose to 10.7p from 6.6p. The recommended final dividend stays at 9.25p final dividend stays at 2.25p

unchanged total of 8.5p. **COMMENT**

per share, making an

The results may be somewhat better than expected but Westland's troubles will not be abated until it gets an order for a new belicopter, and that may be some time. Probably the best thing to be said is that the company's position is unlikely to become much worse. In the interim, it is having to count on continuing export orders for its Lynx, which has been flying for 18 years. There is no doubt that an upsurge in orders is around the corner but the question is when. These are the first full-year figures since GKN took up a 22 per cent bolding, strengthening confi-dence about Westland's long-term future. But expecta-tions of a full-scale bid from

GKN have aubsided. The attraction of such a move may be reduced by uncertainties about future UK defence requirements.

Haden shares fall 25p on revised forecast By Jane Fuller

Tern, the USM-quoted construction development and estate agency group, yesterday announced that it would sink further into loss in the second

The increased loss, which was blamed on problems in the estate agency chain based in the south east of England and timing delays in the propand mining delays in the prop-erty division, dashed hopes expressed at the half-year stage that the company would return to profit. In the six months to June 30 it made a pre-tax loss of \$2,86m.

Yesterday's announcement Yesterday's announcement followed the resignation of Mr James Butterfield, the chair-man, on Friday. He said he had always intended to with-draw from Tern once Mr Peter Hickson, who joined as group managing director in mid-Sep-tember, was in place. Also on Friday Bir Charles Verrall, a former finance director of former finance director of Westland group, was appointed a director. Tern's. shares closed 2.5p.

lower at Sp. some paint plant contracts for

fell 25p to 178p yesterday on the news that pre-tax profit would not reach expectations. Delays in US contracts for paint spraying plant and more difficult UK conditions ware blamed for the revision. In the six months to June 30 the company made £6.3m pre-tax_profit_on_turnover_of

£127.7m; When these figures were announced in late Sep-tember, the full-year profit forecast from the company's stockbroker, Barclays de Zoete Wedd, was £24m.

BZW said yesterday this had been toned down to £20m, which would still represent an 80 per cent increase on last year's £111m.

Mr Philip Ling, chairman of Haden MacLellan, said the rea-son for the announcement was son for the market was getting a bit frothy. We needed a more sober view of our shares." Tha main cause of the reduced expectation was that

SHARES in Haden MacLellan US motor manufacturers would be completed next year rather than this. Holdings, the industrial group, The North American part of the company incurred a loss of nearly £900,000 in the first half.

But the influx of orders is such that it is expected to contribute £7m to the £24m pre-tax profit

forecast for 1990. Mr Ling said UK subsid-iaries, which included a nursery equipment maker and nuts and bolts distributor, were in less buoyant conditions.

He also mentioned higher interest charges as a factor affecting the second half. The company is 25 per cent geared. The announcement abont

current trading coincided with the listing of L4m new shares in the company, issued at 210p to help pay the initial £4.15m

the UK economy through acquisitions and investments in the US and Europe.

US acquisitions help Dobson Park to £19.2m By John Ridding

Warringtons trebles to £2.07m

TWO US acquisitions in the industrial electronics sector helped Dobson Park Industries, the mining equipment and engineering group, improve protax profits from £17.7m to £19.2m for the year to the end of September. Indian power tools manufac-turer. Dobson has a 30 per cent staka but that will be diluted to 15 per cent following a planned rights issue. Turnover increased from 1236.22m to £261.41m. Earnings per share rose to 12.03p (11.49p) and the final dividend is 3.85p for a total of 5.75p (5.5p).

Mr Alan Kaye, chief execu-tive, described the results as · COMMENT

encouraging. He said they reflected the He said they reflected the group's strategy of reducing dependence on the traditional core business of coal mining equipment, which was facing depressed demand, in favour of higher growth areas. Mining equipment remained the single largest division, increasing profits from £7.61m to 53.19m. The fact that Dohson has recorded its sixth straight year of increased profits and earn-

ings per share is impressiva given its traditional depen-dence on the mining industry and British Coal in particular. While others, notably Dowty, have sold out from the declin-ing industry, Dobson has restructured at little cost on a to £8.19m. But the purchase of Trans-

net cash basis. But mining remains tha largest division, ducers, which makes weighing machines and aerospace equipment, and Elgar Electronics, and British Coal the single biggest customer. Flat profits from the division is conse-quently the best that can be hoped for over the next year. manufacturer of power sup-plies, lifted the industrial elec-tronics division from £3.47m to

Mr Kaye said a full contribu-Industrial electronics is tion from Elgar, which was only included for two months, looking a shrewd area of diver-sification, but in the short would mean that industrial term will be constrained by the impact of a slowing US econ-omy. With toys continuing to perform well and a limited recovery in power tools, 1990 electronics would next year overtake mining equipment and contribute about 40 per cent of profits.

Of the group's smaller divi-sions, toys and plastics raised profits from £2.51m to £2.78m, hut power tools saw a fall from should see pre-tax profits reach f22m. But, despite the low pro-spective multiple of a little less than eight, Dobson remains of £2.56m to £1.78m because of disruption caused by transfermore interest as a story of a defensive industrial strategy ring production to a new facthan as an investment. How-ever, the high yield and the attraction of the shares to

tory. Pre-tax profits also suffered as a result of a £845,000 provi-sion against Raillwolf, an income funds limit the downside.

Revamped Alexon bucks trend with 68% growth

By Alice Rawsthorn

ALEXON, the women's wear group, bucked the slump in the clothing industry to increase pre-tax profits by 68 per cent in the six months ended Septem-

the six months ended Septem-ber 30, from £5.5m to £9.26m. Last year Alexon expanded its branded women's wear interests by taking over Ellis & Goldstein, with names like Eastex and Dash. It has since closed or sold the loss-making businesses and is now reorgan-ising Eastex and Dash. Turnover rose to £75.44m (£46.84m) and operating profits to £9.17m (£5.57m). In addition, there was an exceptional

to £9.17m (£5.57m). In addition, there was an exceptional £905,000 from the profit on the sale of E&G's old beadquarters at Brick Lane, in east London. Fully diluted earnings rose to 18.22p per share (15.36p). The interim dividend is increased

by 1p to 5p. Many clothing companies have encountered problems in recent months because of demand. Alexon experienced erratic sales growth in its retailing division - which includes Alexon, Eastex and Dash - although overall sales rose to £47m and operating profits to £4.8m.

Alexon Group Share price (pence) 400 390

The Alexon brand regained momentum after a sluggish first quarter, and Easter benefited from cost cutting and management changes. Dash ran out of stock in the sum-

mer, after strong sales in the spring. The manufacturing division, which is one of the larger women's wear suppliers to

Marks and Spencer, increased its sales to £39m and operating profits to £3.7m. Mr Peter Wiegand, chair-man, said the strong sales

growth at Alexon and Dash in the second quarter had continued into the current half.

COMMENT

In the last year or so the cloth-In the last year or so the cion-ing industry has been in the doldrums, yet Alexon emerged unscathed. The efficient pro-duction practices and strong controls that strengthened it in the good times have been invaluable in the bad. Easter company which operates at the upper end of the car leasing market, was formed in 1984 as marker, was normed in 1904 as the first management start-up backed by Citicorp in the UK. It now has a total fleet of about 10,000 vehicles and about 380 corporate clients, including Cazenove, Hewlett Packard, and Siemens. invaniable in the bear the ben-effit of management changes. There is further scope for cost cutting at Eastex – as more concessions close – but it will take until spring 1991 before Alexon can really revitalise decime and warchandising and Siemens and Stemens. Mr Michael Langdon, Rnt-land'e chief executive, said he regarded vehicle leasing as a growth area and that Lease-contracts would complement design and merchandising. Dash is to be expanded, with new shop openings, and its ordering system has been brought under control. In the meantime the City expects profits of s2m for the full year its existing asset financing operations. The technology group section of this division specialises in lease financing and sales aid schemes. putting the shares — up 5p to 390p yesterday — on a prospec-tive p/e of 10. The shares should rise on fundamentals, but Alexon faces a tough task in overcoming the City's disen-chantment with the clothing industry.

M&G GROUP, Britain's largest unit trust fund management company, yesterday best anslysts' forecasts by announcing a 31 per cent rise in pre-tax profits in the year to end-September

with £23m in the difficult 1987-88 year. The profits recovery, from the static figure a year earlier, was some fim bet-fer than market forecasts and the shares rose 8p to 280p. At the earnings per share

level there was a 33 per cent improvement to 26.75p. Tha final dividend is 8p a share, bringing the total for the year to 12.5p, up 47 per cent on last

to 12.5p, up 47 per cent on last time's 8.5p. M&G said yesterday that both gross and net unit sales during the period had been at record levels. - with the latter figure reaching 2277m, against just 532m in the depressed con-ditions a year earlier. This was aided by the launch of the European Dividend Fund at the end of the financial year. The new fund brought in £61m by end-September, a figure which has since increased to 573m. £73m.

its share of the unit trust market, based on customar accounts, stood at a little less

M&G made £30.1m before tax in the 12 months, compared

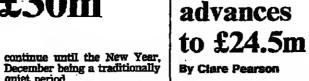

Tha company calculates that

Paddy Linaker - outlook quite good for world economy Operating profit of the group, therefore, totalled 524.5m (£18.3m), while interest receivable and investment income added another £5.54m (\$4.73m).

than 11 per cent in September, compared with less than nine per cent two years earlier. The number of unitholder accounts rose to 569,000, against 493,000 in September 1988, and unit trust funds under management increased from £3.53bn to

24.68bn. M&G added that there had been a "marginal" reaction from investors to the "minicrash" two months ago in the UK, but conceded that business was very quiet at present. It said that it expected this hull to

quiet period. HAZLEWOOD Foods, the During the year, marketing and commissions expenditure mannfactariag gronp, rose sharply to £13.7m (£8.47m) recorded a 21.5 per cent rise in while administration costs saw a more limited increase from £10.9m to £13.8m. The profit from long term insurance busi-ness funds increased to £5.2m (£4m), with funds under man-agement standing at £1.45bn (£1.08bn).

There was a doubling of funds managed on behalf of institutional clients at £1.66bn, but funds in high interest cheque accounts fell from £103m to £48m. M&G said this drop largely reflected the movement of some in-house

Profit wes struck after a sharply increased interest charge of £3.9m (£1.63m), reflecting the weight of bor-rowings, mostly in Dutch flo-rins, incurred to fund acquisi-tions. Gearing stood at 120 per cent at September 30.

On the current investment climate, Mr Paddy Linaker, managing director, said that he believed the outlook was quite good for the world economy generally, and Europe in par-ticular, but that there were some question-marks over the US and, to a rather greater extent, the UK. See Lex On the current investment director, said he did not conparter to make disposals, will the effect of improving the bal-ance sheet, if any such moves seemed appropriate. Said there would be about \$4m costs to be taken above the line in 1989-90 associated with the internal development. There was no profits break-down but Mr Jones estimated that completions contributed

that acquisitions contributed about 20 per cent of the 30 per cent growth in operating prof-its. Geographically, profits were divided as to 45 per cent for Continental Europe and 55

food division, accounting for about 15 per cent of the group, were some 10 per cent lower. This reflected the impact of food scares on recipe dishes. Earnings moved ahead by 18

per cent to 8.71p (7.39p). The interim dividend is 20 per cent higher at 1.8p (1.5p).

COMMENT

Hazlewood, one-time stock market favourite, stands at the crossroads at the moment. Use of words like "restructuring" and "reassessment" cast little light on what type of action it has in mind. It is pretty clear, however, that the move or moves will be significant rather than piffling. Though

the company says it does not mind abont its gearing, it must be aware that many

would be keener to see a stron-ger balance sheet, so a large disposal cannot be out of the

question. Leaving aside these uncertainties, the results were in line with expectations.

Full-year pre-tax profit fore-casts of about £58m put the

shares on a prospective p/e of just over 11.5. It is hard to imagine the company regain-ing much of a premium rating,

but there is certainly scope for improvement in the future should the visible effects of its plan to achieve above-average

growth through internal devel-

opment start to emerge.

Assoc British Eng

Continued progress was shown

Including an exceptional credit of £172,000, the pre-tax profit rose from £352,000 to £603,000, on turnover ahead to £17.81m (£15.1m). Earnings

were 0.21p (0.11p). Although the outlook for the

UK economy was gloomy, the directors said the group had a

strong balance sheet, a good order book, and a well spread

presence in tha commercial

catering equipment market. "Wa expect to continue to

"Wa expect to continue to make progress in the second half," they stated. In the half year catering equipment increased its profit contribution to £320,000 (£241,000) and electrical engi-neering turned round strongly to a £50,000 profit (£124,000 loss).

NEW GENMIN GOLD MINE IN OFS

A new gold mine, to be named the Weltevreden Mine, is to be established on a major gold deposit in the north-western Orange Free State, bordering on the Vaal River and about 8 kilometres south-west of Orkney.

Extensive drilling has indicated the existence of the Ventersdorp Contact Reef horizon at a depth between 100 and 1100 metres below surface. Weltevreden Mines Limited ('Weltevreden') will make application for a mining lease over an area previously known as Area 1 West, measuring 3 448 hectares.

The mine has been designed in two phases. Phase I is designed to reach a production rate of 30 000 tons milled per month, with work beginning in January 1990 and the first gold expected during the second half of 1992. The capital cost of Phase 1 is estimated at R160 million in July 1989 terms. If the Phase 1. operations turn out as planned, a Phase 2 expansion will be undertaken to increase throughput to some 90 000 tons milled per month at a capital cost of R100 million in July 1989 terms. The mine will have a lifespan in excess of 20 years.

Gengold Limited, a wholly-owned subsidiary of Genmin, will hold 76,6 percent of Weltevreden's issued shares with Lydenburg Exploration Limited holding 10 percent, Vaal Reefs Exploration and Mining Company Limited 8 percent and Randex Limited 5,4 percent.

An immediate listing is not envisaged at this stage.

FT LAW REPORTS

Bank usage implies right to charge compound interest

NATIONAL BANK OF GREECE SA V PINIOS SHIP-PING CO NO 1 AND ANOTHER

House of Lords (Lord Bridge of Harwich, Lord Brandon of Oak-brook, Lord Griffiths, Lord Goff of Chieveley and Lord Jauncey of Tullichettle): November 30 1989

A BANK'S right, implied by usage, to charge compound interest, is not restricted to current mercantile accounts, and subsists beyond the date of the bank's demand for payment of principal and interest, in that such demand does not

antomatically end the bank-customer relationship. The House of Lords so held when allowing an appeal by the National Bank of Greece SA form a Court of Armoni SA from a Court of Appeal decision that it could not charge compound interest on money owed by the first and second respondents, Pinice Shinning Co No. 1. and Mo Shipping Co No 1 and Mr George Tsitsilianis.

LORD GOFF said that in 1975 Pinios agreed to buy a ship, the Maira. When it was delivered, 70 per cent of the price was outstanding, the balance to be paid in instalments secured hy first mortgage on the ship.

The bank guaranteed pay-ment of six instalments, secured by second preferred mortgage, and hy personal guarantee from Mr Tsitsilianis. It was called on to pay two instalments by its guarantee.

The ship sank at sea in April 1978. Insurance proceeds were tice Lloyd and Lord Justice O'Connor stressed, appeared to have been derived from Fergusinsufficient to enable Pinios to son v Fyffe (1840) 8Cl & F 121. repay the bank under the sec-

ond preferred mortgage. On November 13 1978 the bank asked for repayment from Pinios and Mr Tsitsilianis, including compound interest There was no response. In 1980 it began proceedings against Mr Tsitsilianis and, in 1981,

against Pinios, claiming princi-pal and interest. Mr Justice Leggatt gave judgment for the bank, saying it was entitled to capitalise interest up to date of judg-ment, either on express words

in the mortgage or because the parties' relationship remained unchanged after demand date. The respondents appealed successfully on the compound interest point. The Court of Appeal held that the bank's entitlement to capitalise inter-est ended on date of demand, so that it was entitled only to simple interest from November 13 1978 until March 2 1988.

It rightly disagreed with Mr Justice Leggatt's view that the bank was entitled to compound interest on express terms of the mortgage. There was no such term

per cent maximum interest were circumvented by the fic-tiou of a series of staccato On the present appeal Mr Pickering for the bank submit-ted its entitlement to comagreements whereby, at each half-yearly rest, it was prepound interest arose from sumed to have been agreed that interest due could terms implied into the contract by bankers' custom or practice. The need for a "mercantile "become principal and carry account current for mutual transactions" which Lord Jusinterest."

interest. After repeal of the usury laws they continued to follow what had become bankers' practice. It later became There the Lord Chancellor recognised as a usage implied asked "can there be a title to into the contract.

compound interest without a contract expressed or implied In Reddie v Williamson (1863) 1 Macph (Ct of Sess) 228, 237 Lord Justice-Clerk Inghs said a from the mode of dealing with former accounts, or custom?" He said "Generally a contract banker's privilege to balance the account at the end of the year and accumulate interest "is founded ou this plain ground of equity that the inter-est ought then to be paid and, or promise for compound interest is not compound inter-est is not available in England . . . except perhaps as to mercantile accounts cur-rent for mutual transactions." That dictum could only have because it is not paid, the debtor becomes thenceforth referred to the situation when the debtor in the amount as a principal sum itself bearing

referred to the situation when the usury laws applied and should have been of little rele-vance after their repeal in 1854. In Deutsche Bank (1924-1936) (1931) 4 LDB 293 the Court of Appeal, relying on Fergusson, said obiter that the bank's right to compound interest ceased in 1914 when war In Part's Banking [1898] 2 QB 460, 467 Lord Justice Vaughau Williams said "According to the ordinary practice of bankers" interest due was from time to time ceased in 1914 when war stopped the current account continuing, or in 1918 when the added to principal. In Yourell [1918] AC 372, 385, Lord Atkinson said that to secure com-pound interest by taking half-yearly rests was "a usual and perfectly legitimate mode of dealing." In Holder [1931] 2 KB 81, 98, Lord Justice Romer said canitalization of interest was account was closed. That slender line of anthority was the basis for the Court of Appeal's reasoning in the present case. In Bevan (1803) 9 Ves Jun 223, usury laws imposing five capitalisation of interest was in accordance with usage.

The status of the usage was put heyond donht in *Patom* [1938] AC 341, 349-350, where Lord Atkin cited with approval the passage from *Reddie*. In Osuald [1945] AC 350, 373 Lord Porter said Paton was a case in which the capitalisation of interest contract was a con-tract "constituted by custom of

bankers;" and Lord Simonds said it was a case where interest was added to capital with half-yearly rests "according to the practice of bankers." No case in which that usage

had been recognised eppeared to have been cited in Deutsche Bank. There was no reference in those cases to its restriction to mercantile accounts current for mutual transactions. In Paton Lord Macmillan referred to the usage as pre-vailing "between bankers and customers who borrow from them and do not pay the inter-est as it accrues." Having regard to the statement in Red-

die and the equity on which the nsage was based, there was no good reason for restricting it any more narrowly than was set out in Lord Macmillan'e simple statement. On the later authorities, in particular Poton and Oswald, the restriction to mercantile accounts current for mutual transactions had no application to the bankers' usage now well recognised by

English law. The question was whether the usage ceased to apply on demand for repayment.

The suggestion that a bank ceased on demand to be enti-tled to capitalise interest rested entirely on the author-ity of Crosskill and dicta in dsche Bank. In Crosskill the reasoning was affected hy the under-

standing that entitlement to capitalise was limited to an "ordinary mercantile current

account." It was concluded that in the absence of special agreement, on closure of the account the bank ceased to be entitled to charge interest.

That was inconsistent with the "equity" on which Lord Justice-Clerk Inglis stated the banker's privilege to rest. If it were equitable that a banker should be entitled to capitalise interest at yearly or half-yearly rests because his customer failed to pay on due date, there was no basis in justice or logic for terminating that right sim-ply because the bank emanded payment. The cases cited showed the

usage applied to annual and half-yearly rests. There was nothing to indicate it did not apply to quarterly rests. The respondents conceded the bank could charge compound inter-est with quarterly rests during the banker-customer relation-ship. There was no reason why that relationship should not have continued until repayment or judgment with the effect that so long as interest was payeble, the bank was entitled to capitalise it. The appeal was allowed. Mr Justica Leggatt's order was restored. Their Lordshipe

agreed

FINANCIAL TIMES CONFERENCES

WORLD PULP & PAPER CONFERENCE 12 & 13 December 1989 - London

工場。倉庫に囲して

その他不動産に関して

The Financial Times ninth annual conference, to be erranged in association with the European Paper institute, will review tha changes taking place in the International structure of the business and corporate strategles for the 90s. It will also analyse opportunities for international trada and investment as well as the Impact of technology and Innovation. Speakers include: Carl G Björnberg, Central Association of Finnish Forest Industries; Hans de Korvar, CEPAC; Bo Wergans, Swedish Pulp & Paper Association; Jean-Paul Franlatte, COPACEL; Rune Brandingar, Sodra Group; Adam Zimmerman, Noranda Forest Inc; Ian Kennedy, The Wiggins Teape Group Limited and Jorge Nunaz, Torraspapel SA.

CREATING A EURO-WORKFORCE IN THE 90s 22 & 23 January, 1990 - London

This two-day conference will opan with keynote addressas by Tha Rt Hon Norman Fowler, MP, Secretary of State for Employment and Mrs Vasso Papandreou, European Commissioner for Social Affairs. Tha challenga for managamant of attracting an adequate supply of qualified peopla in the next decade will be reviawed by John Banham, Director-Genaral of tha Confedaration of Britiah Industry; Tony Raban, Chairman of tha Forum Européan da l'Orlantation Académiqua; Profesaor Dr Matti Otala, Senior Vice President of the Nokia Corporation and Ivan Yates, CBE, Deputy Chief Executive (Engineering) of British Aerospace pic. Professor Paul Lee Evans of INSEAD will speak on tha challenges and opportunities of a pan-European market and how companies can make axisting managera more Europaan. The internationalization of managemant will be discuss by Richard Noonan, Vice President, Industrial Relations, Ford of Europe and John De Leeuw, Managing Director of tha Corporate Staff Bureau, Phillips International BV.

COMMERCIAL AVIATION IN THE ASIA PACIFIC REGIN TO THE END OF THE CENTURY AND BEYOND Singapore 12 & 13 Fabruary

By tha year 2000 the Asia Pacific region is expected to account for soma 25% of the entire world's air transport output, ganerating a massive growth in tha whola air transport Infrastructura of the region. This Financial Times conference brings together a most distinguished panel of speakers to assess this growth and examina tha challanges and problems it will ganerate,

Contributors includa: Lim Chin Bang, Sir Colin Marshall, Petar Sutch, Mitsunari Kawano, Dean Thornton, Louis Harrington and Cecil Rosen.

......

government is committed to attracting foreign investment through

radical economic reforms, which have roused fierce opposition. Inflation and nationalist unrest have exacerbated the problems facing Yugoslavia. John Lloyd reports.

Mixed economy facing reform

THE YUGOSLAVIAN leadership is now attempting to revive the class struggle. The reformists who are now trying to assert a central government presence are also seeking to destroy the social and economic consensus created under Josip Tito, in favour of a free market system in which struggle - economic competition, soon perhaps the clash of rival parties - will be

the ruling order. Generally, Yngoslavian reformism takes its place in the overall reforming matrix of East/Central Europe. The with-drawing tide of belief in communism among communists; the widening technical gap; the accelerating fall in living stan-dards, and the impatience of workers and intellectuals with party tutelage all have their Yugoslavian resonances and examples. But the modes and contexts of reform are dis-tinctly Yugoslay. The future of the Yngoslavian economy depends on the depth and breadth of these reforms.

Reform is at once easier and more difficult than elsewhere. It is easier in the obvious sense that the country daveloped market relations of a kind since the early 1950s; it has let people in and out fairly freely; it has been relatively lenient

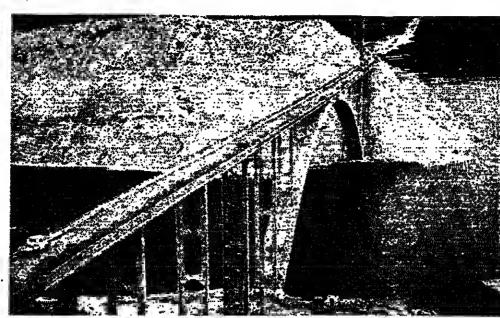

(compared to other one-party states) in its treatment of dissent; and it has, in its northern republics of Croatia and Slov-enia, areas as advanced in some respects as capitalist countries, and with developing commercial cultures.

But the very prosperity of those republics has exacer-bated Yugoslavia's chronic internal tensions, newly high-lighted by a Serbian call for enterprises and consumers to boycott Slovenia, in protest at the northern republic's refusal to host a pro-Serbian rally.

The fact that Yngoslav socialism was internally developed rather than externally applied and that it has been relatively non-dogmatic and open, means it retains a deeper hold than in Poland and Hun-

gary. Ivan Ribnikar, dean of the faculty of economics at Lju-bljana University and a man hijana University and a man emerging as an important fig-ure in reformist thinking, says: "Materially, other East Euro-pean countries are in a worse way — but ideologically, they are in better shape. A central command system is a definite thing — and if you want to

thing - and if you want to leave it, then there is a clear need for a break. But the Yugoslavian system, which is a to take care of the property, of hybrid one, still commands a the social needs.' But there

of the cornerstones of the economy (see Page 5)

Yugoslavia Trade and Industry

lot of support. It is, after all, a was no legal basis for any of system we discovered." The system was created in this. Formally, tha property was not even owned by the adversity, following Tito's break with Stalin in the late

Politics ruled, chilling most 1940s. At the heart of his vision enterprise leadership, says was a society truly communist Vedran Marinkovic, chaf de in eschewing both private (cap-italist) and state (Stalinist) property relations. Tito and his cabinet at the Serbian Economic Chambar. "The eco-nomic system developed in colleagues; snch as Milovan Djilas and Edward Kardelj, developed a distinctive system such a way that the manager was put in charge of something with which he had nothing to based on social property and workers' self-management. Par-tially open to, and favoured by, do. People were given the task of keeping an enterprise alive, but they couldn't move it forthe West because of its anti-So ward... in the 1970s, there was said to be a technocracy. These were actually good managers who were able to adapt and work well within the system vietism, the ruling party did institute some market alements: hnt in successive reforms, more and more power was devolved from federal to hut they were seen on the political level as a techno-bureaucratic counter revolution, and they were retired. So management professionalism was killed off."

This was perfectly rational within an ideological universe which feared the restoration of republican level, where control came in practice to be vested oppressive class relations charin local groups of party and state officials, republican banks and managers - except that managers often lacked orthopic and independence acteristic of pre-war years and which believed it had, in the mixture of market and control from the base, discovered a true path to socialism which would not ultimately need the authority and independence, being accountable to the workers in the enterprise who, in turn, had no stake in it. state or the institutions of capi-talism, Although the federal Mr Zhivko Pregi, the deputy federal Prime Minister and one of the most enthusiastic reformers, says "there used to state withered, at the republican level, it was activa and interventionist. In the 1970s. republican banks, many of which had never before oper-ated in the international marbe many influences on the firm - the Party, local authorities, and so on, who said, 'We have ket, dipped their hands into the flow of petrodollars to obtain finance for prestigious

and largely unprofitable projects. By the start of the 1980s, the

federal state was liable for a debt of some \$20bn, much of it contracted for by banks over which it had little control. Inflation was rising (it is now around 1,500 per cent) and productivity was stagnant or falling. Republican rivalry was intense: the northern republics increasingly looked west; the southern provinces were enmeshed in debt and back-wardness; and the Serbs in the middle, feeling put upon, rallied to the cause of their ethnic kin in the south Serbian province of Kosovo, where they constituted a declining minor-ity against the ethnic (and Moslem) Albanians. The inner party is still grappling with debate over what to do about Kosovo being sliced through, last year, by the Serbian Presi-dent Slohodan Milosevic,

through an assertion of control over the province and tha arrest and trial (now going on) of 15 Kosovans on the charge of "connter-ravolutionary activities" - trials which seem to the Croatian and Slovenian elites as smacking of Stalinist excess and a source of national embarrassment.

Thus the impression most cople have of Yugoslavia in the 1980s has been one of leap-ing inflation, national fragmentation and cheap, sunny and sometimes shambolic holidays: the blurry images of a country which cannot stay together but which cannot come apart: a Mediterranean/Slav/Central European/Orthodox/Catholic/Moslem/Communist stew at once impossible and ungovern

This may change, or at least there is cause for believing so. The Federal Government formed by Mr Ante Markovic on March 16 is now passing laws designed to destroy the fundamentals of Yugoslavian socialism and replace it with something which may still for-mally be called socialistic, hut will be so only in the sense that workers will have a say in management in a similar way to West Germans. Zhivko Pregl says the princi-ples of equal treatment of

Yugoslav and foreign investors, of property pluralism in which no type of property is privileged, of rights for capital as well as labour and the adoption of universal (actually, cap italist) forms of business organisation underpin the laws sed or slated to be pa passed or slated to be passed this year. These laws include a draft law on property which allows foreigners to buy assets and land; a new law on labour which, according to Radisa Gacic, the Labour Minister, "makes it clear to all that jobs depend on performance." He has also forecast that, in an expected shake-out of labour, some 20 per cent of the work-force might become technologically redundant. Other laws permit the issuing of stocks and the creation of a stock market; and a phased series of tax laws which will introduce a profit tax and, over the next two years, integrate tax raising

powers into the fedaral and republican authorities. Says Mr Pregl: "We don't have an ambition to be innovative (in the forms of enterprises) any more. Practically. this means giving up many

Printing money: inflation is now around 1,500 per cent

specific regulations and insti-tutions we've had so far: those known under the common name of 'associated labour' or 'workers' self management.' We're giving these things up. We're establishing limited companies, joint stock companies - all the types of company structures known in the world are regulated for in our new laws. So we're departing from the innovations which so far

haven't given any results." Two further processes flow On other pages: Foreign trade, 2: Shipbuilding, 3; Films, 4; Wood . Wine and Construction, 5

from this: one is centralisation, the other democratisation. The controversy round either could

stall the progress of all. Centralisation is probably essential if the Markovic Gov-ernment's initiative is to suc-ceed - and it is the logic inherent in many of its actions. If it is to control money supply it must stop republican banks uing credit and companies which should be bankrupt issu-ing promissory notes which then act as money; it must take tax raising powers; it must regulate its relationship with the National Bank of Yugoslavia, which failed to see

tne debt crisis of the 1980s coming. Says Lojze Socan, head of the institute of Eco nomic Research at Ljubljana University: "The World Bank, since 1987, has supported the idea that governments in developing countries should play an important role. The present Government is the creator of the legislation now going through, and institutions bere must support it. We are still in a situation where the Bank of Yugoslavia does one thing, the Government another. Neither has credit and monetary policy under control. This is one of the main problems economists looking at the country see."

The prize, for the Markovic Government, is to break the networks of control (and sometimes of corruption) within the republics, and replace them with institutions and practices which begin to look to the federal level. For the present, republics tend to define both capital and labour markets: but if the labour laws allow the emergence of clearly delineated managements and labour who express their different interests through collective bargaining (rather than blur them in a consensual glacis) it is likely that the trade unions will develop sectional, rather than republican or enterprise interests - with an increasing need to represent miners, cnginccrs or teachers across the federal stata, rather than in simply being a rather inactive part of the consensus. In short, the re-establishment of the "class struggle" could establish a national, rather than a gional, labour market and lahour-management-federal government relationship.

Democracy, to an optimistic vicw, now seems to he strengthening: that is, of course, Western or bourgeois democracy. Questioned on this during a TV phone-in last month, Mr Markovic, pressed to choose between workers self-management and political pluralism, said he would go for both. Mr Pregl thinks it will come within o year; it is already foreshadowed in constitutional reforms coniroversially passed by the Slovenian assembly in the summer.

It needs hardly be said that none of this will be easy. The power of Mr Milosevic in Ser-bia; the power, too, of those in the League of Communists who wish still to seek for a socialism which does not capit ulate, as they would see it, to Western forms of democracy; and the huge structural difficulties are all obstacles familiar enough to East European governments now, but no less daunting for their familiarity. But the possibility of overcoming them is higher than it has been for years.

YUGOSLAVIA TRADE and INDUSTRY 2

Aleksandar Lebi discusses foreign trade

Exports and imports increasing

IN THE face of hyperinflation, which this year, according to estimates of the federal office of statistics will reach 2,500 per cent, and slow growth of industrial output, which will hardly exceed 2 per cent, the perfor-mance of exporters gives every reason for optimism. Trade is expanding fast, invisible earnings are increasing, reserves are close to \$6bn and foreign investments in Yugoslavia are rising. in the nine months to the

30

end of September 1989 exports to the hard currency area increased by some 11 per cent compared with the same period t year, while imports from that area went up by nearly 17 per cent

The ratio of hard currency exports to imports declined from 95.2 per cent to 90.6 per cent and the trade deficit

Mr Markovic and his associates have been warning that soon protective walls will have to come down. They have in mind

that 1992 is very close

tocreased from \$330m to \$763m However, that was the result of deliberate government policies to liberalise and increase imports to assure an ample supply of raw and intermediate materials for the Yugoslav industry, especially that sector oriented towards exports, and to create a more competitive environment on the domestic market, which is dominated by monopolie

The degree of import liberalisation has reached 87 per cent, while at the start of this year it. was only 55 per cent, and a

year before 11 per cent. The process of liberalisation was September trade figures gave reason for even more optimism than during the summer. Hard started by the previous government of Mr Branko Mikulic, but it was vigorously pushed ahead by the present govern-ment of Mr Ante Markovic. currency exports were up 26.9 per cent on September 1988 fig-Taking into account changes The level of tariff protection has been reduced and the averin intercurrency rates, which "nndervalned" exporte age tariffs are now 7.1 per cent.

Imports of intermediate goods used in the production of export products do not pay custom duties provided exports go up by more than 50 per cent over the previous year. Imports of equipment by joint ventures are also duty free. What mars this bright pic-

what mars this oright pic-ture of liberalised imports and low tariffs are very high non-tariff levies, which make imported goods too expensive. Here, the government treads cautiously, although some levies have been moderately reduced. First, the federal bud-get needs those revenues. Also, Yugoslav industry is not yet ready to face foreign competi-

But Mr Markovic and his associates have been warning that soon protective walls will have to come down. They have in mind that 1992 is very close and that the Yugoslav economy has to prepare for tougher competition in the European Community, period was 176.5 per cent, the exchange rate for the dollar went up by some 115 per cent, and that of the D-Mark by some 119 per cent.

Since late October down-floating of the dinar has speeded up but the discrepancy between the inflation and exchange rates hes not yet been eliminated. The overval-ued dinar naturally hampered exports while at the same time encouraged imports. Attempts by the Yugoslav

and Soviet governments to reduce the Yugoslav trade sur-plus failed, and this has cre-ated one of the main Yugoslav problems of recent years. The surplus fuels inflation, as the national bank pays Yugoslav exporters promptly from the new money issue npon presen-

The Government, in the opinion of exporters, contributed to the widening of the trade gap by halting the downfloat of the dinar, which became overvalued. While inflation in the August-October period was 176.5 per cent, the exchange rate for the doilar went up by some 115 per cent

expressed in dollars by 4 per cent, the rate of growth that been created in the republics such as Serbia, which sell a large share of their total exports in the Soviet Union month exceeded 30 per cent. However, October results dashed the hope that the same because the government proposes to deley payment to exporters and to establish a trend would continue. Compared to October 1988, exports did not increase, while imports continued their neward move. lower exchange rate for the clearing dollar. The Government, in the

In the first nine months of opinion of many Yngoelav 1989, the accumulated surplus with the Soviet Union manufacturers and exporters, increased by another clearing dirs 208m. Although part of the contributed to the widening of the trade gap by halting the downfloat of the dinar, which became overvalned. While surplus, \$550m, was converted into a medium-term loan at a inflation in the August-October low interest rate, the remain-

ing surplus still lingers close to clearing dirs 2bn. Yugoslav firms cannot find enough goods to import from the Soviet Union.

Both sides have been reluctant to resolve the problem by reducing Yugoslav exports. They actively search for ways out of the impasse and have set np a working group of experts to recommend solutions

In spite of a possible slow-down in the rate of growth of erports this year, the Yugoslav balance of payments will be satisfactory. In the first eight end of the year the surplus could exceed \$2bn, as it did last

nomic reforms, although addi-tional foreign capital will be needed. That means the pro-cess of external debt reduction,

cepts of ownership, management control and labour discipline. The changes pro-ceed from a hard-eyed view of the present system, seen by much of the political flite as irredeemable. An interview with the Fed-

nately, only a part of that can be collected, as debtors are mostly the developing countries, but then the Yngoslav debt is also not worth its face

"The change will be difficult for many enterprises, for the present system is badly flawed in many of its main ele have in mind, first, that it is a closed system: Yugoslav indus-try tended to withdraw into itself and lacked foreign com-petition: second, we had a high vel of government intervention in the economy, from the state, the republics, communes and the party - because the and he party was not separated from the state and third, we had a high level of state-set prices, combined with an inadequate

YUGOSLAVIAN industry led

the country's growth after the war, particularly in the 1960s and 70s. Its export successes, particularly within Comecon, were impressive and it man-aged to develop a diverse range of both commer and control

of both consumer and capital

Its woes in the 1980s stem in

part from the drop in domestic demand, which in turn was

adversely affected by restric-tive budgetary measures, from

a lack of hard currency; and from a stagnant or falling share of hard currency exports. Its engineering, ehipbuilding and car plants are all big

exporters - but all have finan-cing and technology difficulties

which will take some years to

At the root of the changes

now being attempted in Yugo-slavian industry are the con-

goods.

overcome

system of investment finance. Industrial investment was created by credits, and busiasses were supposed to pay interest, capital repayments and make profits ... there were enterprises which functioned quite well, especially before

state authority should shrink - except in the crucial areas of monetary and fiscal policy, to make these changes." On labour, Mr Santo talks in a way few Thatcherites would and in the fight against inflahave dared, even in the beyday of their radicalism: "Yugosla-vian industry is over-emtion.' Inflation, the most visible sign of the country's malaise,

John Lloyd looks at industry

Changes on the agenda

ployed this means that indus-try will have to get rid of a is not, however, on the imme-diate agenda for action. The large number of workers, who Markovic government has postare redundant poned a direct attack on it until the new laws are in place - then, says Mr Santo, 1990 This might be as many as 20 or 25 per cent, in all sectors -- then, says Mr Santo, 1990 will be the year we tackle it. And it will be through ecoprobably more in the bureau-cracy. In other words, we have to create a modern business colture, which so far we hadn't been able to do... when I was a manager in Croatia, I suc-ceeded because I obtained the nomic, not administrative means." The liberalised eco tem is expected to produce con-ditions in which new, small, confidence of the workforce. All of the self-management company formation will be rapid: and it is on an expandbodies (in the enterprise) were prepared to take my view on ing network of small and medium-sized companies that the reformers place much of their faith. Dr Lojze Socan, director things.

But this led to a different kind of inefficiency, because you have to spend a lot of time on winning confidence instead of doing other things. Explain-ing things was often a waste of time." time."

The opening up of a formerly partly closed industry, and the dethronement of "social prop-erty" and the use of the market at every level will mean that the country, like other socialist countries, will depend crucially on assistance from the West. "Investment from abroad is of decisive importance to us.

That is because, since most enterprises have had no work-ing capital, they were financed on the basis of bank credits. They didn't retain any working capital. It's now necessary to constitute them in a different way, which is where invest-ment from abroad would come in. We want enterprises to form joint stock companies and mixed companies. We want citizens to invest their funds in company equities. This would mean a stock market. That's a new thing for us, we would need help from the world bank and other institutions. We will in future be able to create new enterprises, and we shouldn't have any trouble with joint ventures. The problem is those

The Minister, like his cablnet colleagues, sees as indispensable to the industrial restructuring a stronger federal government - ironically, so that it will interfere less, or rather, ensure that the republican and party authorities interfere les

"A new constitution is under way. A main feature in it will. be that the Government, will_ have the instrument to conpolicy, which means an inde-

release new skills, bring back finance which has been exported and we could get growth." It is in these small companies that many of the workers to be made redundant from the large enterprises seeking to establish profitabil-ity would be relocated: they would also allow much of the "black" economy - estimated to account for as much as one third of the national product to find legal forms. It will be a long haul, even the legislation is passed and is accepted, even if the govern-ment can increase its authorenterprises which are unprofitable: it may be difficult to sell ity, even if labour becomes more efficient. Yugoslavia is a wealthier country than the other socialist countries: but it lacks the huge sums needed to modernise its industries, and thus bring its products gener-ally up, to world standard (a recent survey, conducted by Dr. Socan's institute, showed that

Yugoslavia is a

Ground, boiled, a tree stretched into an infinitely long thin white sheet. Alongside fire, the wheel and gunpowder, perhaps the most Important foundation of civilisation. It has conveyed historical memory through millenia. Thought only achieved the power to change the world when it became written and multiplied. From the Bible to a banknote worth a million pounds, from tollet paper to Japanese lanterns, from air fliters to paper tigers. ' Paper can take anything' they say.

We make it in Krško. Who could count all the Slovene, Bosnian, Hungarian and Siberian forests which we have manufactured into cellulose. How many words, thoughts, images have been carried amongst the people by newspapers printed on our paperi The paper trails ot our labour reach from the United States ot America to the indian subcontinent, from Africa to Scandinavia. And quite a large proportion of our smooth paper track, comes back to us, covered in print - dirty and crumpled, so that we can recycle it and send it back into the world all nice, neat and new.

We know a lot about paper, as we have devoted our lives to it; our ambitions and plans, our abilities and difficulties, our experience and happiness are linked with the production, formation and marketing of paper.

We build our path to the future from experience and knowledge. Now In the paper which we send through the world, there is more and more work, less and less energy and half the raw materials that there used to form formerly an almost exclusive producer of cheap newspaper, we have developed into a modern industry with a wide range. Of products there is practically no type of paper left today which we cannot supply from our own or our cooperative programme.

Fat, half ton baies are no longer the only form of paper that we send throughout the world. We have begun to diversify and print an ever greater proportion of it. in addition to the heavy industry basic paper trom cellulose raw materials, we are producing more and more touched up and imaginative end-or semi-finished products.

BEOGRADSKA BANKA D.D. - BEOGRAD

١

With our new trademark VIDEM, we have a programme with which we wish to co-operate in the paper part of the world.

We don't of course, reach to the moon, but we certainly do achieve a paper moon.

he attempt to find a "consensual economy" in the 1970s. "The old Yugoslavian system was really an attempt to find a

new way, not capitalist and not

state socialist. But it didn't

work, and that's why we have

ndent monetary po licy. With these instruments in its hands. the government should have the power which is at present in the hands of the republican authorities. "We think that, in general,

trical engineering company, and Energoprojekt, the leading consultancy and contracting company. It is their experience and practice which need to be made the rule.

PROFILE: SIMPO

Furnishing prosperity

1960s, it now employs a work-force of more than 6,000. In

addition, it has a network of 13

factories and an increasingly

In Vranje itself, the modern, large and clean factory, has production lines earmarked for

both east and west. Mr Slobodan Stojanovic, one of the directors to the Belgrade

office, says that exports are

healthy balance sheet.

past 26 years.

THEY make revolving beds for the Soviet market and high quality leather-bound armchairs for the western market. They have shops to Szczecin, in northern Poland, and representatives scattered through-out western Europe. Mrs Raisa Gorbachev visited the firm's headquarters in Belgrade, while Mr. Gorbachev met Mr Dragan Tomic, the managing director. Pierre Cardin now provides designs for the enter-prise which will sell them under the famous Parisian's label.

In short, Simpo, one of Yugoslavia's most successful furni-ture manufacturers, despite the cripping inflation which is now 1,200 per cent a year, is enjoying a period of prosperity and expansion. It started in 1963 to Vranje, a

increasing each year. More than 60 per cent of its total production is now being exported, of which 75 per cent exported, of which 75 per cent goes to hard currency coun-tries and the remainder to Foland, Czechoslovakia and the Soviet Union. In 1988, Simpo earned \$37m-\$25m from hard currency coun-tries - and the rest from the town tucked deep in the south of the Republic of Serbia. Then, the region was com-pletely underdeveloped. Today, Vranje is a bustling, confident town, dominated by young, well-off people who are

clearing account market with the Soviet Union and Eastern employed in Simpo and in Yunco, the large textile factory. The relative prosperity is Europe.

This represented an increase partly due to the way in which Simpo has expanded over the of 14 per cent on the previous year. This year, Mr Stojanovic expects the exports to reach From employing a few hun-dred workers in the early \$100m.

Success rests on a wall-trained workforce which, by all accounts, are paid above aver-age. But it is also due to the firm's increasing specialisation, particularly over the past year.

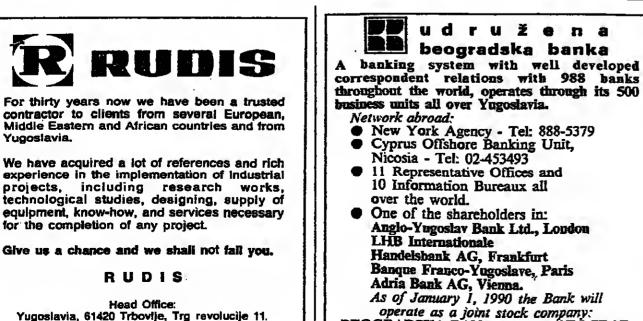

Just 16 kilometres from Vranje, in the little town of Bujanovac, Simpo opened in 1967 a new factory which will deal only with manufacturing leather goods. The aim is to produce top

quality furniture specifically for the export market. This increasing trend towards speci-alisation has already earned Simpo an additional \$8m and is likely to consolidate the firm's presence on western markets over the next few years.

These industries (shipbuilding rather more than steel) have had to operate in market environments and are con-cerned to meet world standards: at the same time, how-ever, they have suffered from over-protection and (steel) rather more than shipbuilding) political criteria being employed for the construction of plants.

The point is clearly made on the technological level. The efficiency of steel producers may, in part, be measured by the speed with which they move away from open-hearth steelmaking to the continuous casting method.

Japan's industry is 93 per cent continuous casting: west-ern Europe 81 per cent; eastern Europe 20 per cent - and Yugoslavia, in between, with 56 per cent. "We want to have a modern steel industry which will make profits," says Arsenile Jovanovic, secretary of the Yugoslavian Steel Makers' "We know the direction we

want to travel. For example, we know that open-hearth pro-duction no longer is profitable: western countries make almost none of this kind of steel. But 25 per cent of our production is

A FEW kilometres north of Ljnhljana is a former landowner's mansion set in its own estate: nearby, now converted into luxury flats for hire, is a modern hotel. The mansion had been one of President Tito's many official dwellings: the hotel had housed his staff and ministers when he was in residence. Now, the cult of the personality gone and the eco-nomic problems of Yugoslavia laid bare it must earn its keep.

Part of its keep comes from a permanent boarder: that is the Brdo management school, which rents a large part of the hotel. Brdo was the first school of management in a socialist country (there is now one in Budapest); and though still (by international standards) small it is referred to as a kind of talisman of Yagoslavia's commitment to change.

The school was founded on the initiative of the Slovene Chamber of the Economy, and of Dr Danica Purg, its for director. In the past three years, she has seen pass through the school some 4,000 managers, on courses lasting, from one day to seven weeks; from next October, it will offer the first MBA to be taught in: Eastern Europe (in English). It uses a core of staff, mostly: from Slovenia: but draws in ket-driven economy. But things US, West German, British,

still open-hearth."(In eastern Europe,49 per cent is open-hearth.) To assist the movement up the technology and profits ladder, the Steel Producers' Association has contracted British Steel Consultants to draw up a series of options from which they can choose what to do about the industry's future.

aware that they face, not just relative technological back-wardness, but also vast overmanning – again, an effect of political control of the plants. They know, too, that many of the plants themsels and of the the plants themselves should, on a rational view, go. Will they privatise some plants, as the new legislation

will permit them to do? Mr Jovanovic is cautious, pointing to the example of the hallan steel industry which slimmed down and cut losses while majority control remained in But he says that ancillary activities - as transport, pro-vision of plant services -could be hived off "depending

have".

The producers are already

on the interest investors would Foreign investment is abready showing some interest: Italian and Soviet companies, for example, are likely to take a share in the new Sisak steel pipe plant in Croatia.

Shipyard in Spill: the industry is in good shape The best known steel plant in Yugoslavia - perhaps the best known plant of any - is Smederevo, in Serbia: steel pro-ducers would prefer it were not so famous. It has been seen as the classic case of bad investment: conceived as a prestige project for Serbia, overstaffed,

Further, education at every It is, of course, no accident that the school should be level was, when not actually anti-management, naturally located in Slovenia and have backing from the Slovene Chamber, this republic is the oriented towards the particular nature of the Yugoslav economy: and many managers, called upon to take on the most entrepreneurial of the six making up Yugoslavia, accounting for some one third responsibility of major enter-prises, were usually trained of its total exports, though with less than 10 per cent of its total population. Because it is only in engineering, and not at

all in accounting methods, per-sonnel skills, general adminis-tration, sales or marketing. Says Vedran Markinovic, chef de cobinet at the Serbian Economic Chamber in Belgrade: "Management was not regarded as a professional skill. Anyone could do it. There was a cult of engineers, at least in Serbia. There were many attempts in the last few years to re-assert the management profession, but so far they have not been successful. "The most important thing

now is to make people believe they don't know much and thus have to

in an attempt to make it fully operational: "the next year is the crucial one", he says, "in which it will either work or it will not work."

The shipbuilders have no comparable white elephant: indeed, the industry which usually features in the world's top five, is in relatively good shape. It is concentrated in two

areas - larger ships are made along the Adriatic coasts, while the shores of the Danube support scores of smaller

Both industries have tended to serve the large Soviet mar-ket: both are now seeking new outlets, with some success claimed in doing so. It has problems, but they are often less of the competitive-

ness of the product, and more those of the economy in which they operate: for example, the May 3 shipyard in Rijeka lost large orders to foreign competition when they failed to secure export finance for the ships from the Yugoslav Bank for International Economic

ands shows the way the wind is blowing. Over the present five-year period, 1986-90, some 80 per cent of orders were placed by Soviet shippers: in the next, from 1990-1995, only

40 per cent come from the USSR

In the past four years, deals with western countries for ships have risen from between \$40-\$60 to (in 1988/89) \$160m. The Soviet trade, though massive and steady, has thrown up constant hard currency prob-lems: problems, particularly in securing sufficient hard cur-

rency to huy parts in the west. Yugoslav shipbuilders are now considering seeking a shift from rouble trade to hard currency trading - a move which is likely to be reflected

Both the large Adriatic yards and the smaller Danube yards at present socially owned, will at present socially owned, win be free to go private: at least one, the Sava yard, which was founded in 1919 and specialises in the construction of barges, dredgers, floating cranes, icebreakers and fishing vessels, has attracted the interest of a Norwegian company. However the legislation does not exist to allow foreign purchase.

but the new courses have to overcome decades of neglect, and must push for the universities to prepare its managerial graduates in ways they have uever considered before. Busi-ness economy courses are being added to the curriculum, learn. The chamber will now found an institution, on a site though there is no fully-fledged course outside Ljubljana Unioutside Belgrade, in which to

versity yet. The final problem is motivarun short five to seven-day "Managers say to us: 'why should I bother about market-ing and all that when people will snatch out of my hands courses specialising in fields such as banking. "There is now a husiness school market, if we keep high standards. We must have high quality lectures, so that the people who come will pay. The anything I make?" says Mr Markinovic. "It makes it a harder task than elsewhere to first course was 80 per cent subsidised by Serbian corporainsist that they must be aware tions - in the future we intend of the customer."

Mr Vukovic believes now, with the benefit of hindsight, John Lloyd | that "social ownership should

PROPERTY RIGHTS

Difficult debate

not have a substantial position in the Yugoslav economy. There should be several kinds of ownersbip and property rights. In other words, these rights should be tested on the market place."

31

The market and competition are the key points. As Yugoslnv economists see it, the ideal arrangement would be for the State to sell off some of its enterprises, while retaining sectors such as utilities. Inevitably, there would be teething problems. For years, enter-prises and the workforce have been fed aubsidies, and have been guaranteed pensions and other social benefits even if the enterprises were near bank-ruptcy. On this point, Mr Vukovic reckons there is plenty of scope for enterprises to set up their own pension funds as a means of standing on their own feet and becoming more

But there are other problems. There is the question of assessing the real value of an enterprise. Auditors, says Mr Vukovic, would be called in. But the most pressing issue would be the availability of capital for these small businesses, and the setting up of the legislative climate in which these husinesses could function. Already, Mr Vukovic and his colleagues are thinking about setting up facilities for risk capital. They also hope to set up a \$3m fund which would be specifically earmarked for restructuring and transforming large enterprises into small

They recognise that nnemployment would follow. But as Mr Vukovic says, about 20 per cent of those employed are "underemployed anyway", "I think the small businesses would actually generate employment and, more importantly, it would increase gross social product, (the East bloc equivalent to GDP), to about 7 per cent," he says. If the Fed-eral Assembly buys these argu-ments, one of the difficult hurdles facing Mr Markovic may be overcome.

Judy Dempsey

endlessly delayed, using a mix endiessiy delayed, using a mix of technologies and even now only partially producing. Sme-derevo is looked upon with deep auspicion by almost everyone outside Serbia and many (more quietly) within it. Mr Jovanovic says Serbia has decided to sink another \$500m Cooperation. The experience of the Dunay

to charge the full cost."

This is encouraging, if small:

of the Danube Shiphuiders' Association, is forthright: "The new labour legislation, in par-ticular, should allow us to ensure higher quality work and higher productivity. It will be easier to dismiss workers and, in particular, idle work-ers. The employer will have a free hand to do what is most appropriate.

THOSE YUGOSLAV economists and officials who are anxious to push through new legislation on small busi-

terms aimed at distinguishing the Yugoslav political and eco-

nomic system from what were then the higbly centralised

Soviet and East European

However, given the determi-nation hy Mr Ante Markovic, the Prime Minister, to radically

change the economy, it now seems that property rights will be finally on the agenda.

Mr Veselin Vukovic, a young

economics expert in the Gov-

ernment, is partly responsible for smoothing the legislative path for small businesses. He

says that much of the basic

work is over. Foreigners, witbout restric-

tions, can invest in Yugoslav companies. They can control even 100 per cent of an enter-

prise. They can repatriate their

profits, and they can do it in

The sticking point emerges

when anyone asks, "who owns the enterprise?". "I agree that the main issue is one of owner-ship," says Mr Vukovic, a

soft-spoken economist. "All

reforms undertaken in the past

by the socialist countries have

failed to address this ques-

hard currency.

tion."

economies.

nesses will need much luck this month. For this is the time that the Federal Assembly is due to debate one of the most difficult subjects so far: prop-

erty rights. It is a debate which now dominates all the East European countries. In Yugoslavia, it takes on a special meaning because of the way enterprises have been managed over the Under the complicated and ideologically-loaded system, all enterprises were "socially" owned by the workers. Not that the workforce had any shares in the enterprise, or that they could buy out the plant, or sell it or declare it bonkrut

- EUROPE 1992

In view of "Europe without frontiers", it is both a challenge and imperative for Iskra to outline it's own business strategy! West European markets represent approximately 60% of total Iskra foreign trade - therefore it is of paramount importance for Iskra to maintain this position es well es to endeavour through competitive strength to assure the development of new market segments to endeavour through competitive strength to assure the development of new market segments. Although in the past decade, significant achievements were made in exporting lakra products, systems, services and technology to non-developed, third world and COMECON countries, lakra continues ro be fully alert to the strategic contribution of West European marketing to our business success. Being involved in advanced alectronics and state-of-the-art technologies requires ability to cope with ever demanding and competitive environment-drive and push rarely found in third world countries! third world countrias!

third world countrias! The Yugoslav – EEC trade activities guided through prefarential trade co-operation agreement, showed soma encouraging results over the pest several years. Although significant afforts have been made on both sides, Yugoslav exports to the EEC community still only represent 12% of the total EEC import-figure, the same as 15 years ago! These exports are primarily to non-dynamic sectors end into low-price segments. On these grounds, providing Yugoslav industry is able to overcome certain barriars of the 1992 regulations, h would be correct to assume there is additional room for truly competitive and advanced Yugoslav products in. the various EEC markst sectors.

the various EEC market sectors. It is no secret that some social and economic difficulties in Yugoslavia have had en edverse impact on axport minded anterprises throughout the country. This was evident in reducing the competitive advantage of Yugoslav companies, affecting their terms of trade and making exports far less attractive and profitable. It took t deal of affort and sacrific

growth in West European Export markets. But we succeeded Iskra's exports to the Western Hamisphere assured a steedy growth and represented in 1988 more than \$150m - a figure never achieved before! This also proves Iskra'a efficiency and strength to

This also proves Iskra's efficiency and strength to compete world-wide. We are looking forward to the reform of the Yugoslav economy which should have e positive impact on stabilizing the overall economy in Yugoslavia, beating down huga inflation and bringing market-driven entreprenaurship to full realisation. The key role of Iskra's global marketing orientation is Iskra's own markebing network. It spans the globe and promotes Iskra in 65 countries. Trading companies, manufacturing facilities, representative offices and holding companies are located virtually in eli major Western Countries – United States, West Germany, Switzerland, Italy, France, United States, West Germany, as well are Switzerland, Italy, France, United Kingdom etc. as well as in Tokyo, Moscow, Algiers, Beljingl Their role is complex; promoting Iskra's exports but elso the purchase of raw-materials, components, capital equipment and technology, and the transfar of know-how to Iskra, as well as acting as Iskra's information cantres on the latest demelormate in the world of electronical developments in the world of electronics! With all this in mind it is not surprising that iskra is paying particular attention to the development of the Single European Market after 1392. These activities include ell fields of business in Iskre: - new renge of products in accordance with customer's specification

specification - monitoring new industrial standardization in the EEC and individual countries (BS, IECO, CEN, CENELEC) - analysing cost structure to ensure competitiveness - verifying strategic business areas and distribution channels - consolidating Iskra'a international marketing network - shaping strategic planning in EEC market - restructuring overall corporate organization to be in

line with flexiblity demanda of Europe after 1992 promoting new joint-venture business strategy and long term partnarship alliances in fields corrying "extra weight" in terms of investments

All the activities mentioned above should anable Iskra to overcome the huge burdan that Europe 1992 will represent to those not ebla to adjust thair marketing represent to those not ebla to adjust thair marketing strategy accordingly. The bridga across to Europe is our trading companies and broad customer base located in the EEC, end not unrealistic opportunity expectations that governman's action will assure a privileged position for Yugoslavia in EEC trade activities. The EEC call for reciprocity is a serious threat requiring immedieta afforts to restructure the antire industry. Aesides already established lskra products in the EEC – rotary components, motors, eutomotive products, components, power tools, measuring equipment, arc, lskra will by to promote more sophisticated products through aliances with oartners from the EEC. Different rotary components, motors, eutomotive products, components, power tools, measuring equipment, arc, lskra will try to promote more sophisticated products through alliances with partners from the EEC. Different marketing techniques are therefore needed – contract manufacturing, valua added partnership, etc. Tha topic is also bringing venture capital to iskra by establishing joint-ventures in Yugoslavia, taking into account new Yugoslav regulations on foreign investments. This law ahould ba far more attractive to investors from abroad in every respect – from transferring of profils up to thair full participation in managing joint-venture companies! Aut most of ell, giving up the rigid model of e non-market economy which had a disastrous effect on Yugoslav enterprises, should bring merket driven creativity and anterprise; the known factors of West Europeen success. It's not going to be easy but es an old proverb says: "NO PAIN, NO GAIN," Iskra is on its alreedy established way towards an even more eggressive position in the EEC, irrespective of how Europe is really going to look by than. going to look by than.

President Gorbachev, visited Iskra in the spring of 1988.

YUGOSLAVIA TRADE and INDUSTRY 4

WHEN Emir Kusturica won the Golden Palm at the 1985 **Cannes Film Festival for** "When Father was away on Business", the once-promising Yugoslav cinema found itself in the limelight for the first time in almost 15 years.

However, Kusturica, whose latest film, "The Time of the Gypsies" scored another tri-umph at Cannes this year, remains the only internation-ally visible Yugoslav film director, teaching film at New York'e Columbia University and making the rounds of and making the rounds of noted film festivals.

But far from the limelight, a generation of Yugoslav film-makers, most of them Pragueeducated, are trying to make do amid economic and political chaos, Kafkaesque burean-cracy, paucity of funds and the State's complete lack of inter-est in promoting Yugoslav films, either abroad or at home

Still, Yugoslav films over the Still, Yugoslav hims over the past few years, have fearlessly and vividly dredged up the demons of the past and exam-ined the most painful episodes of Yugoslav history. The mass arrests following the 1948 break with Stalin, the brutality of the secret police, the post-war destruction of the middle class political corruntion and ss, political corruption and opportunism and the injustices of revolutionary justice have all come under the scathing eve of film-makers such as Goran Markovic, Rajko Grlic,

Patrick Linden discusses the film industry

larly talented singer which was filmed in razor sharp black and white, mostly in slums, con-Threat to golden revival white, mostly in stuns, con-struction sites, railway sta-tions and filthy workers' hos-tels. Indeed, these were prime examples of a period that made Italian ucorealism kook like

Zivko Nikolic and Kusturica himself.

Markovic's visnally rich "Reflections", shot in 1988, used sensnously-filmed flashbacks to trace the life of its mentally unbalanced protago-nist as he is slowly driven mad by the upheavals of 40 years of communist rule. Constructed like a horror film, "Reflections" ends in an explosion of violence. Like most Yugoslav films, it is characterised by the abundance of explicit sex and an open disdain of commu-

Nikolic's "In the name of the People", portrays the brutality and lawlessness of Yugoslav-ia's dreaded UDB, the secret police, in the 1960s, and the stranglehold it had on the ter-rified Yugoslav population. Grlic's films are a rarity in Yugoslavia: modern and witty

stories of urban neurosis, mid life crisis, npwardly-mobile media people, ex-convicts who cannot fit in and artists who have sold out. His "In the Jaws of Life"

puts one in mind of a central European Woddy Allen or Paul Mazurski, with its knowing satire of Zagreb's affluent intel ligentsia.

With only about 30 films a year made in Yugoslavia, on budgets of \$700,000, many filmmakers seek refuge in interna-tional co-productions. Grlic's latest film, called "That sum-mer of Dead Flowers", was

mer of Deau Flowers, was filmed in English and stars Tom Couti, Suzannah York and Rod Steiger. Marković, Kusturica, Alexander Petrović and Dusan Makavejev have also done co-productions. Among the least known national cinemas in Europe, Yugoslav cinema has made few inroads into cinema theatres

around the world, despite the isolated triumphs of individual film makers such as Kusturica, Makavejev and Petrovic. And it is not only because of whole

economic and organisational problems. Purges and repres-sion have either silenced promising talented directors or else have forced them into self-im-

posed exile to the west. In addition, the complexities of the society being portrayed in the films themselves have been made somewhat less accessible to western audi-ences than, say, Czech Polish or Hungarian films. And, unlike these countries, Yugo-slav film directors had not had

products in really competitive

increase competition on the

much of a tradition on which to fall back. Film-making in Yugoslavia

Hollywood gloss by comparistarted from scratch in 1945. Pioneering film-makers in the post-war years had no cine-matic tradition, studios, actors or equipment to work with but were given lavish state subsi-dies to shoot such dreary exercises in socialist realism as "This People will live" and "The Story of a Factory". Film was treated, as Lenin said it should be: as the most important art, an ideological tool in which to educate the masses in the glories of socialist enlight-enment and sacrificing oneself

to the benefit of society as a backlash from the establish-But in the 1950s, the party but in the 1950s, the party began to lose interest in film es an ideological weapon, shifting its attention to television. The party-run committee for cine-matography was disbanded and all production, technical and distribution operations were turned output to the indiwere turned over to the indi-vidual republics. And while state subsidies dried up, the privileged financial position of the cinema soon disappeared with the advent of free mohe Many film-makers ceased being employed by the studios and became freelance artists work-ing on the besis of contracts with individual production out-This newfound, sudden lib-

are finding it increasing diffi-cult to sell their outmoded erty to move away from the party line took a while to sink in. Yugoslav film-makers con-Price and import liberalisa-tion introduced by the Govern-ment of Mr Ante Markovic will tinued to adhere to the morality and mentality of socialist-realism. But the revolution finally took place in the 1960s. The mid-sixties saw the rise of "Black" film in Yugoslavia gritty and often brutal films about people living on the margins of society. These included Petrović's

visually exciting "I even met happy Gypsies" about passion and revenge among gypsies in Vojvodina, a province tucked in the north-east of the coungrave as any purge.

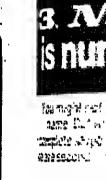

son. At the same time, Godard and the French new wave left and the French new wave and their mark on Makavajev's col-lage-like tract on politics and sexual liberation. "Love Affair, or the case of the missing Switchboard Operator", with its continuous nuclity; and perticularly "Wr: Mysteries of the Organism" which attacked communist morality and western decadence simultaneously, ridiculed Stalin, extelled ser-ual intercourse and finally incurred the full wrath of a

try; Zivojin Pavlovic's "When I'm Dead and Pale", the story of a ruthless and not particu-

-

ment. Thus, in 1972, the late Presideut Josip Broz Tito purged "Liberal Forces" in Yugoslavia and changed the face of Yugo-slav film almost overnight. In a confrontation with intellectuals, plays and books were ban-ned, artists sacked from teach-ing posts and a film student, Laza Stojanovic, was jalled for offending Tito in his film "Plas-tic Jesus". Makavejev fled Yugoslavia half a step ahead of the law. Petrovic also left. Oththe law. Petrovic also left. Oth-ers could not find work. State-funded war spectacles about the struggle of Tito's partiaans against the Nazis dominated screeus for the following decade. And in the general affluence of the 1970s, financed by credits from the West, few people seemed to mind. But times have changed again. The successful years of the seventies are a distant memory. The party is too pre-occupied with factional infight-ing to concern fiself with can-

ing to concern itself with censoring writers or film-makers. However, it is the virtual collapse of the dinar, the national currency, and the general eco-nomic decline which now pose the real threats to this courtry's still budding cinema. And it is these threats which are as

Golden Paim award: a scene from "When Father was away on Business

AFTER 45 years, shoe manufacturers Bata is expec-ted to return to Yugoslavia. A few months ago, Mr Tomas Bata, president of the Torontobased company, visited the Borovo rubber and footwear "kombinat" of Vnkovar, in eastern Croatia, the largest Yugoslav shoe manufacturing industry, which accounts for between a fifth and a quarter of Yngoslav output. He dis-cussed possible co-operation, including joint ventures, with Borovo's managers. If negotiations, which were temporarily suspended, are successful, Borovo will become part of the Rataempire.

32

The association with Bata will help Borovo overcome its many troubles, financial and other. Borovo has also started similar uegotiations with Pirelli of Italy for tyre produc-

Borovo was founded in 1931 by Tomas Bata's grandfather, theu a Czechoslovak industrialist. The factory developed rspidly and before the German invasion in 1941, Bata's prod-uct mix included leather and rubber footwear, rubber technical goods and car tyres. After the war, together with almost every other industry, it was nationalised, and the name was changed to Borovo. In the 1950s it became a self-managed

firm.

achieve the same efficiency and production standards as and production standards as the private business of Bata. The Yugoslav economic system was largely responsible for that. It was based on social ownership, which escaped all definition and was best described as everybody's and nobody's property, and on the so-called consensual or con-tractual economy. This hoped to remedy shortcomings of the to remedy shortcomings of the market economy by advocating underdeveloped regions, espe-

contracts or agreements regulating all aspects of economic relations between suppliers and buyers, manufacturing and trading, instead of them being regulated by market forces, and to a lesser degree

the state. The role of the management was minimised, and managers were often criticised as techtivity. no-bureancrats who wanted to grab political power from the party. As a result not only Borovo but most other selfmanaged businesses, did not develop as well as they would have done in a more favoura-ble environment. That is also true of the textile, leather and

Although many manufacturers exported a large part of their output, they experienced finan-cial and also regulatory diffi-culties in importing the neces-sary raw materials. That, and the very high inflatiou with correspondingly high interest These industries have been neglected in terms of modernisation and development, financial and other support. For years they had to earn foreign exchange necessary for financing large projects, many of which turned out to be white correspondingly high interest rates, forced manufacturers to elephants. Being labour intensive, the authorities considered them suitable for creating jobs in

VIBA FILM Ljubljana Slovenia, Yugoslavia FILM PRODUCTION AND DISTRIBUTION (EXPORT / IMPORT)

Founded in 1945, the holder of the tradition of the former TRIGLAV FILM AND FILM SERVIS, Viba is the principal production film company in Slovenia today.

Viba possesses studios in both Ljubljana and Piran. The latter is positioned on the Adriatic coast in order to take advantage of the contrasting landscape. Within a circle of 200 km. of Piran are included the Alps, the Pannonian plain, the unique Karst plateau and the Adriatic as well as the accumulated rich heritage of a proud Slovenian people and their culture.

Viba Film is in a position to offer co-production facilities and partnership for a wide range of film and TV programmes including:

- advertising feature films
- childrens programmes - musicals
- documentaries serials
- drama

Co-production facilities include:

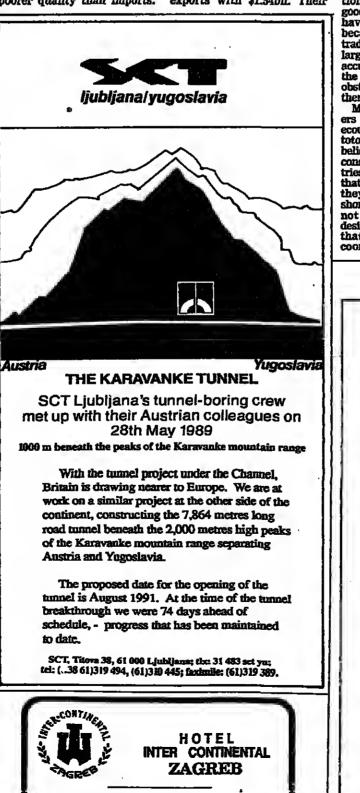

- the supply of foreign crews for filming in Slovenia and Yugoslavia
- provision of production services and technical facilities
- providing Slovene and Yugoslav crews for filming in Slovenia, Yugoslavia and international locations '
- working arrangements for mixed Slovene, Yugoslav and foreign film units.

which is one of the corner-stones of the Yugoslav economy, employs 700,000 or 4.4 per cent of the total labour force

The industry is one of the cornerstones of the economy and employs 700,000

and accounts for up to 14 per cent of the gross social prod-

Several Yugoslav construc-tion companies, especially the Belgrade Energoprojekt, are respected the world over for their efficiency. However, there are also numerous smaller companies which were estab-lished by local authorities primarily to provida jobs. These weaker companies were awarded contracts regardless awarded contracts regardless of their ability to complete the work on time or the price of their tenders. With stricter bankruptcy laws introduced this year many of these smaller companies are expec-ted to fail

Yngoslav companies have won numerous contracts abroad in the face of strong international competition and have undertaken construction projects in more than 60 comtries. In some years Yugoslav

contractors accounted for up to 1.6 per cent of overall capital construction in the world ????. In the mid-1980s the annual value of projects undertaken by Yugoslav companies aver-aged \$2bn with up to 30,000 Yugoslav workers and experts on sites abroad. However, in 1968 the total value of comstruction projects dropped to \$1.327bn. This year orders picked up and estimates after the first six months suggest a 35 per cent increase to \$1.8bn. Even if these expectations are too optimistic, an increase of at least 20 per cent will certainly be achieved.

be achieved. Of more significance to the econemy, is the amount of for-eign exchange flowing into the country. Although this is diffi-cult to assess, it is estimated that in terms of wages and sal-arles brought back to Yugo-slavia by workers, purchases of Yugoslavia equipment, build-ing materials and furniture, foreign exchange could total 30 foreign exchange could total 30 to 40 per cent of tha gross value of projects. Profits are likely to be 25 per cent of this amount. ???

It is also difficult to deter-mine the value of various ser-vices provided ahroad. Although the bulk comes from construction, the revenue from consulting, technical supervision and construction manage-ment is gradually increasing.

ment is gradually increasing. Yugoslav construction com-panies have undertaken a vari-ety of projects abroad, includ-ing hydro-electric power plants, land reclamation works; water supply systems, canals, ports, highways as well as work in the military field such as airfields and harbours.

of Yugoslavia's total exports. Indeed, for the past few years, wood exports have exceeded \$1.2bn, of which around \$250m is made up of paper products. He reckons that total exports will increase by a further IF THERE is one sector of the Yugoslav economy which is thriving, it is the wood industry. But not because the manufacturers invest heavily in marketing and advertising. Rather, it is because the qual-ity of Yugoslavia's wood, plus fairly cheap labour costs, will increase hy a further remains an attractive proposi-

\$550-\$600m. Part of the success is due to the gradual modernisation of not only the wood industry but also the way in which designtion for western importers. One tends to think of the vast forests of Scandinavia, the ers have come to play a greater role in furniture. Soviet Union and other parts of

Judy Dempsey on the wood industry

A profusion of forests

The industry is made up of 460 furniture manufacturers, Eastern Europe as the main suppliers of wood and wood-related materials, such as paper, to the export market. But importers often admit that the some of which employ as few as 50 people, others, as much as 5,000. More than 86,000 peodamage caused by pollution to the forests in Bohemia means that they sometimes have to turn elsewhere. And that is to ple work in the sector which tends to concentrate on produ-cing office/institutional furniture, products for the home Yugoslavia. The country is well served by forests. More than 37 per cent of the total area is under and paper. But Mr Juric says that the United States is taking a keener interest in actually importing prefabricated houses

forest or wood – about 10m bectares – of which the major-ity are deciduous trees, such as oak and beech – ideal for fur-niture. Wood production is from Yugoslavia. Given the intense competi-tioo for finished wood prodtioo for finished wood prod-ucts, Yugoslavia has some way to go in promoting itself. At the moment, as is the case with all socially-owned enter-prises, which are not directly run, hut are owned by tha State, they rely on Foreign Trade Organisations (FTOs) to market their products ahroad. Sloveniajales, the largest of the furniture FTOs which is based in the northern republic of Slovenia, retains a good record for exports and for quality. increasing by 28m cubic metres a year while tha forests are being cut at a rate of between 21m-22m cubic metres over the Such an industry, as Mr Antun Juric, secretary of the wood industry of the Yugoslav Chamber of Commerce, points out is of crucial importance to the country's economy. He should know. For he has had more than 25 years experience in the business. Born in Slavo-nia, a region in the north-west for exports and for quality. However, Mr Juric thinks that the economic reforms now started by Mr Ante Markovic, of Yngoslavia which is the Prime Minister, will have a significant impact on the wood

endowed with woodland and forest, and trained as a bioloindustry. For instance, now that forgist, ha axudes a calm hot infectious enthusiasm for the eign investors can set up joint ventures in Yugoslavia withindustry, coupled with a concern for its protection against ont any restrictions on the pollution. Mr Juric says that wood repatriation of profits, the selection of the management, the workforce and the running

of the enterprise, the wood industry could reap many benefits. For instance, says Mr Jnric, joint ventures would mean that: The wood/furniture industry

would be made increasingly aware of developments in world markets: • The industry would he exposed to technological

know-how: The country's engineers would have the opportunity to learn new skills in this sector;
 The industry would, in the long term, he more secure thanks to improved marketing and sales; and sales; • Investments by foreign part-

ners would automatically open up new markets. Already the industry is mak-

ing inroads. Sloveniajales, for example, recently formed a joint venture company, called the Association for the Develnt, Financing and Market-

ing of the wood and furniture industry, with one Italian and two Austrian firms. Yugo-slavia's geographical location is ideal for such a venture. in is ideal for such a venture, in addition, there are negotiations taking place with an Italian firm to produce, oo a mass scale, chairs. And Ikea, the Swedish honsehold chain stores which are expanding throughont Europe, plan to open two department stores in Yugoslavia. increasing integration with

western markets will not only provide more security for the industry, but Mr Juric reckons that the quality will increase, too. And unlike, say, the wine industry which is arbitration industry which is subjected to heavy tariffs from the Euro-pean Community, for tha momant, at least, the wood industry is not inhibited hy

such restrictions. Until 1989, Yugoslavia had preferential treatment with the United States, That ceased last May. But recently, under the terms of the General Systems of Preferences, Yugoslavia is not required to pay customs taxes for its wood exports. But the key issue, says Mr Juric, is that the wood/furniture indus-try complies to international standards, be it in terms of quality or even the kind of glue (which now must not contain formaldehydes).

Given Mr Juric's enthusi-asm, the industry is in good hands to face the challenge of the new economic reforms and the increasing competition.

EVEN IF Yugoslavia's wine merchants were radically to improve their marketing, they would still be faced with what they regard as prohibitive tariffs imposed hy the European Community. That, at least, is the view of Mr Damjan Bulum, director of the country's wine

industry. Mr Bulum, a respected vet-eran wine specialist from the rich vineyards of Bosnia-Hercegovina, believes that, if tariffs were reduced, then Yugoslavia would be capable of exporting far greater quantities to the BC. And more importantly, the country would not be forced to underprice its top-quality wine

Under present regulations, Yugoslavia is permitted, tarifffree, to export 545,000 hecto lit-res of wine to the EC. Given that it is already exporting between 1.1m and 1.2m hecto litres a year to the EC, of which 20 per cent is earmarked for the West German market,

for the west German market, Mr Bulum and his colleagues reckon they are losing a great deal of vital hard currency. "I will give you an example. For every becto litre of wine which we export to West Ger-many, the importers have to have been a block pay between DM25 and DM30 for each hecto litre. Yon can see the problems they are fac-ing, if they want to make prof-its, and similarly for us, if we want to sell more and earn hard currency," said Mr

Bulum. Indeed, it is now thought that the tariffs are costing Yugoslavia's wine-growers about DM20m a year. But, as Mr Bulum points out, the wine industry is much more than tariffs and complaints. It is Bulum. also about maintaining the

quality of the wines, whose history goes back to the 6th Century BC.

Around that time, the ancient Greeks, who had estab-lished colonies in Vis, Hvar and Korcula, or Issa, Pharos and Korkyra, as they were known then, transplanted the vine which they had brought with them. And according to legend, in their quest for the Colden Floces they founded Golden Fleece, they founded the town of Polis (today Pula), and there they planted the first vineyards.

The "industry" expanded even further under the Romans, who explored the hin-terland, and then it was the turn of the Slavs, who, coming

Home-produced wines on sale in a Belgrade supermarket

33

down from the north in the 7th Century, settled in what is to be modern Yugoslavia. By the end of the 1890s, the

country - not yet a state -was exporting 1.6m hecto lit-res, mostly to the courts of

Yugoslavian wines go back 2,500 years

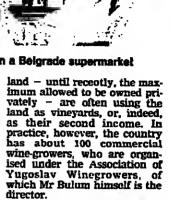

Europe, until the devastating Phylloxera disease, which caused havoc throughout the vineyards of Europe, also wiped out Yugoslavia's crops. Since then, the industry has been carefully built np, stocks renewed, and grape varieties, such as Riesling, Pinot, Char-donnay, Cabernet, and Sauvig-non, introduced.

Today, Mr Bulum is cautious in saying the industry is thriv-ing. Several years of drought has caused enough damage so as to affect production. In the mid-1980s, for example, output hovered between 6m and 6m hecto litres per year, which were grown on 228,000 hect-

ares. But hy 1989 it had dropped to around 4.3m hecto litres. The cold weather did not

help matters either, Mr Bulum says recent bitterly cold spells in regions around Macedonia and Montenegro destroyed some of the best crops. So far, lower production has not adversely affected the work force. Although there are more than 2m people directly or indi-rectly involved in the industry, many work in it in their spare

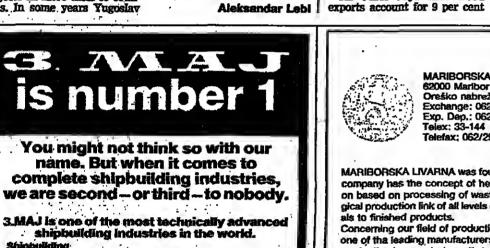

So, those with 10 hectares of

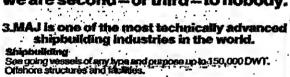

director. In addition, the winegrowers can rely on higher domestic wine consumption which prewine consumption which pre-vents over-production. Indeed, a look at drinking trends in Yugoslavia seems to testify to this. All the six republics are now consuming 60 litres of wine per capita a year. The exception is the province of Kosovo, where for religious and social reasons wine con-sumption is often as low as LS litres per capita per year. Mr Bulum thinks, however, that, if the economy, the inflation now running at 1,200 per cent a year and declining living stan-dards continue, then the wine industry will inevitably feel

the pinch. Which is why Mr Bulnm longs for a marketing hudget for the wine industry. "It's a hit like the chicken-and-egg syndrome," he says. "If we become more aggressive in our marketing, then maybe our exports would be boosted. But in order to promote our wine. we need hard cash to finance any marketing campaign. I agree that we could do much more, hut our present eco-nomic climate is not that fayourable

Cold weather drives up crude and gas oil prices

By Steven Butler

34

CRUDE OIL and gas oil prices were driven sharply higher yesterday as cold weather gripped north-east Europe and North America.

December gas oil futures prices rose to their highest levels eince early 1986, topping \$200 (£128) a tonne at London's International Petroleum Exchange, up from \$193.50 on Friday.

The January Brent crude oil price, said by traders to have followed the strong demand for gas oil, rose by 52.5 cents in European trading to close at \$19.225. On the New York Mercantille Exchange, January futures contracts for West Texas Intermediate Crude were up by 25 cents to \$20.55 in midday trading

Crude oil prices are now nearly e dollar a barrel higher than a week ago, when the market fell because a production accord by the Organisatioo of Petroleum Exporting

Technology gives Argyle the cutting edge Kenneth Gooding on how the world's largest diamond producer plans to expand **RGYLE** Diamond is the spending about A\$1m in Aus-A world's newest and -in volume terms - bigtralia on promotion this year, a

considerable chunk of its A\$5m gest diamond producer. It is now ready to try to establish an international retail brand identity for its diamonds. It will be the first time any revenue in the country. That pales into insignificance, however, compared with the US\$140m (190m) being

spent this year by De Beers, the Sonth African group, to promote diamonds generically gem stone or precious metal mining company has takeo such a step. The development goes hand in hand with e worldwide. De Beers' Central Selling Organisation controls A\$17m (£8.5m) expansion pro-gramme at the Argyle mine in the Kimberley region of Westabout 80 per cent of world trade in rough (uncut) dia-Argyle has a five-year con-

ern Australia and increasing use of high-technology tract with the CSO, which mar-kets 75 per cent of Argyle's industrial diamonds (boat) and nachines to sort its diamonds. Mr David Karpin, Argyle's near gem stones (melees). All but a few of Argyle's gem stones are also sold through the CSO. Argyle withholds about 6,000 carats a year of managing director, says it is almost certain thet the Argyle Diamonds brand will be introduced in either Japan or the US next year. These countries gem quality diamonds -including most of the pink-col-oured stones for which it is have been chosen because each accounts for about one third of world gem diamond retail famous - for cutting and polishing in Perth. After cutting

To provide enough suitable stones for the campaign, Argyle will have to set up a and polishing, these are sold at auction or privately and have second cutting and polishing centre, probably in Thailand. China, India and Malaysia are in the past returned over US\$400,000 a carat.

also being considered. Mr Karpin says that the com-pany's test marketing operations in Australia have M r Karpin points out that these operations give Argyle, which started mining as recently as 1983, a "window on the diaindicated that an Argyle Dia-monds' branded stone can mond market." They also add a great deal of value to the rough attract e price premium of 25 per cent over a similar unbranded diamond. He sugstones. Argyle recently sold 67 gems in Geneva totalling 64 gests the main reason is that buyers are willing to pay extra for the comfort of knowing that a large producer is guar-anteeing the size and quality of carats for US\$9m, and a 1.5 carat stone sold privately for a record (for a pink) of more than US\$1m a carat. All 20 cutters in Perth come

the stones. Argyle is promoting only a from outside Australia, which has no experienced craftsmen very limited proportion of its of its own. However, Argyle output - stones of more than four tenths of a carat, or "40 has now decided, after an 18-month test, to take on three points" in the trade jargon, and only those cut and polished at its own centre in Perth. It is locally born epprentices. Mr Karpin says it would not make commercial sense to set up in a high-cost base like Western Australia the large cutting and polishing centre that will be needed to service a branded diamond operation in Japan or the US.

The brand campaign will concentrate on promoting the coloured stones which account for about half of Argyle's prodoction. These brown stones were previously not regarded as gen quality, but Argyle found rapid consumer accep-tance when it marketed them as "champagne" and "cognac" diamonds. The CSO concentrates on promoting only white diamonds but Mr Karpin says: We have found there are peo-

ple out there who would not buy white diamonds but will buy coloured stones." Argyle's contract with the CSO ends in 15 months' time and Mr Karpin suggests that while there is some tough bar-gaining ahead, "it would not be in the interests of either com-

pany if there was not an asso-ciation between Argyle and the CCO.' He describas the Argyle mine as "a dream venture" because it was brought in under budget, on time and has worked well above rated capac-ity for most of the time – it was designed to handle 3m tonnes of ore but is processing 4.7m tonnes

The mine supplies about 30 per cent of the world's dia-monds by volume, making it the world's largest producer, but it ranks sixth in terms of value of production. This is The mine is set in a very remote part of Western Austra-lia, where at this time of year the contractors have to start work at Sam - because their equipment gets too hot to hanbecause only 5 per cent of the stones mined are of gem qual-ity (earning about 40 per cent dle after the sun has been up a few hours. The only unexpected problem has been that the level of the Ord Dam -aof the revenue of about A\$1m a stretch of water bigger than Sydney Harbour from which day), 40 per cent are near-gem (45-50 per cent of revenue) and the mine takes its water supply - has dropped to its lowest point ever, and Argyle is havabout 55 per cent are industrial quality (10 to 15 per cent of revenue).

ing to extend its piping and pumps further out into the Argyle finds only two carats of intense pinks among every one million carats it mines. dam. This is on top of the cur-rent A\$17m expansion pro-gramme, which will lift the mine's throughput to 6m

The scale of production at the mine would not have been possible without the use of automation to sort the diamonds. X-ray machines are used to

Diamond production this year should reach more than 35m carats (32m in 1988), and the increase in ore throughput should enable the company to locate the diamonds among the ore, and machines also sort diamonds by shape and by col-our. The latest addition to the armoury of automation is a prototype machine that classi-fies stones according to their purity.

Operating at up to 4,800 carats an hour (more than carais an hour (more than 75,000 stones an hour) the device is possibly the only dia-mond purity sorting equipment in the world that can operate with accuracy at this speed. Like much of Argyle's anto-mated equipment, it was designed by CRA's group spe-cial equipment unit in Mel-baurne. bourne

profits

CRA now owns 58.3 per cant of Argyle and Ashton Mining, another Australian group, 38.7 per cent

Argyle's net profit soared from ASI3.55m to \$46m in the first half of this year, well above any full year to date. The company had the benefit of a CSO price increase in the year which translated to a 14 per cent rise for Argyle dia-

Mr Karpin says the outlook for the diamond market next year is "reasonably good" although "it won't be a year of spectacular growth." He will be more than happy if the CSO can maintain the total diamond market revenue at this year's level.

He points out, however, that if the market should soften, buyers tend to trade down to less-expensive stones - the kind Argyle mainly produces.

Brazil starts importing methanol

By John Barham in Sao Paulo

IN THE face of furions domestic opposition, Brazil has begun importing methanol.

Officials hope the methanol will avert a potential collapse in fuel supplies. Over the weekend, the national oil company Petrobras pumped 50m litres of methanol ashore. Angry envi-ronmentalists protested outside the port and at Petrobras headquarters.

Brazil faces a critical shortage of fuel alcohol, the alterna-tive fuel that is distilled from sugar cane. Alcohol powers a quarter of Brazil's cars, but motorists fece e 1.7bn litre

shortage of the fuel in 1990, equivalent to about 13 per cent methanol. Environmentalists and trade unionists fear the of annual consumption. methanol will worsen air polin-

Mr Felix Andrade da Silva, an official of the National Petroleum Council, which is overseeing the methanol imports, said: "We have no pre-cise idea of how much methanol will be imported. We will buy methanol as necessary to avoid shortages."

Fruit from Chile arrives in US

By Barbara Durr, In Santiago

CHILE'S first fresh fruit The losses suffered by the shipment for the 1969-90 winter Chilean fruit exporting indusseason has arrived in the US, and consumer reaction is try, one of the country's most important for foreign trade, were estimated by the Exportexpected to be positive in spite of a controversial poisoning ers Association to reach \$300 million (£192m). Recent reports have suggested that the grapes may not have been poisoned at all or that, if they were, the inci-dent took place in the US, not Chila The Chilarn Attorney

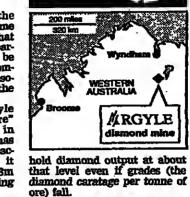

or a controversian poisoning episode earlier this year of two Chilean grapes. The US Food and Drug Administration's discovery last March of two grapes tainted with cranide in Philadelphia with cyanide in Philadelphia closed the US market for four days at the peak of the Chilean Chile. The Chilean Attorney General, Mr Ambrosio Rodrifruit exporting season. The discovery, which experts

guez; has said that if it is proved that the grapes were poisoned in the US, Chile have since questioned, followed two anonymous phone would sue the US government calls to the US embassy in Santiago, which threatened to poison fruit exports to the US. Similar calls were made to the Japanese embassy, which also led Japan to close its marrequest in US federal courts.

Chilean fruit exports are expected to grow in the 1969-1990 season by 12 per cent to 105 million crates, according to Mr Ronald Bown, director of

the Exporters Association. Mr Bown said the industry's previous annual growth rate of between 16 and 20 per cent has been broken by the poisoning scandal. Tougher inspectious and security have been imposed on the industry, and banks - which previously lent liberally to finit producers and exporters - have been more tight-fisted this year, according

to Mr Bown. He said this has caused "a

LONDON STOCK EXCHANGE

Equities stand up to the profit-takers

A BATCH of warnings from the corporate sector about earnings introduced a touch of reality into the HK stock mar-icet yesterday and the market quickly abandoned an attempt to extend the substantial gains of the past nine sessions. However, equities rallied to defend the Footsie 2,300 mark, and closed with only modest loss on the day. There were further signs of Japanese and European buying of UK equities, and London responded in late dealings to a firm opening on Wall Street,

The main shock of the day came from Asda, the supermarket group, which confirmed the market's worries over the

Asda hit by profits warning

Asda, the supermarket group, fell quickly in heavy trading as a profits warning caught the market unawares - the timing, as well as the content, upset investors. "We had been expecting more shocks, but not quite so quickly," said Mr Philip Dorgan, analyst at Gold-man Sachs. Mr Julian Hard-wick at BZW said: "The prob-lems are not new but the extent of the impact on profits is greater than expected." Asda. had already acknowledged that it had hit a rough patch.

Analysts cut their forecasts across the board. Mr Dorgan, for example, replaced his £202m prediction for current year profits with a £180m to £185m range. Next year's figure is £215m instead of £243m.

The shares dropped sharply, and bargain hunters only put in an appearance at below 120p when turnover expanded rapidly in busy two-way trade. Some 20m shares had changed hands by the close with the price settling at 117p. Asda topped the list of actives in the traded options market with contracts for the equivalent of almost 1.7m shares being exchanged. ..

Analysis claimed that Asda's senior management was rela-tively inexperienced. They also argued that the directors had taken their eyes off the ball in their expenditure of \$705m on: superstores, once rim by Gate-way, and £165m on a new dis-tribution system. One pointed out that the stresses at the top were not helped by the fact that Asia was losing market share to Kwik Save in its heartland of the north of England. Kwik Save was one of the few food retailers to rise yesterday, closing 12 better at 5630 1.1

Rover, the UK car group, could upset the deal. ery set in. The rally was helped by a firmer trend in early deals on Wall Street which encouraged hopes that US interest rates may be on a downward trend. At the final reading, the FT-SE index was a net 7.7 points down at 2,303.4. Turnover, noticeably thin during the early and bearish part of the session, increased towards the close. Sean volume finally totalled 484.4m shares, against But the initial impetus soon Friday's 544.3m and the lower daily totals recorded for most

trouble", said one. Yesterday's modest fall was regarded as almost insignificant when mea sured against last week's sharp rise. More important was the re-appearance of Far Eastern buyers for UK banking and financial stocks which have established themselves as a prime defensive sector of the UK market, as well as an arena. for international bid moves. Insurance stocks stood out

as the market rallied, reflecting the view that foreign insurance firms continue to cast acquisitive eyes on the UK sector. Once again, Guardian Royal Exchange was a notably active feature, although the shares closed lower.

of last month. Despite yesterday's dip in market indices, market strategists were not too upset by the Asda profit warning - we know the retail industry is in ny's much-heralded appraisal well off the coast of Thailand has been damaged and that drilling of the crucial well will probably be delayed for some

that the drilling could be held up possibly until late January. Shell, one of UBS Phillips & Drew's "shares for the 1990's" and where top analysts are said to be visiting the com-pany's Far Eastern operations, eased 3 to 456p. Ultramar, on hopes of a revaluation of the

touched 633p during the morn-ing before slipping back to close a net 15 up at 613p. Brit-ish Airways attracted late buying interest, encouraged by news that Sir Gordon White, the Hanson director, had joined the board. BA rose 4 to close at 213

food retailing sector, where the leaders shed a few pence. The apprehension spilled over into other retailers where only Body Shop put in a firm perfor-mance. The shares climbed another 21 to 528p helped this time by the appointment of a new broker, County Nat West

WoodMac instead of ANZ. Ratners, which with Body Shop has been one of the few retailers to attract buying in the face of a possible recession, suffered a reverse. Two securities honses, County NatWest WoodMac, and US Phillips & Drew, cut their profit forecasts. County now predicts £108m for the current year; instead of £117m, while UBS is going for £105m instead of £115m. Their recommendations, however, are unchanged at "buy" and "sell" respectively. Mr John Smith at UBS explained his bearishness, by arguing that Ratners theoreti-

too late to help the shares which ended 5 cheaper at 145p. A 68 per cent improvement in interim profits at clothesmaker Alexon pushed the shares to 402p before they eased with the market to close 5 better on the day at 390p. McCarthy & Stone, the troubled sheltered homes construction and management group, managed a minor gain after announcing further moves to relieve pressure on the group from higb interest rates. McCarthy shares, which have fallen from 407p to a low of 72p this year, settled 2 firmer at 107p. The company is selling its Homelife Investments sub sidiary to BUPA Investments for £9.2m and says it will use the money to "reduce overall indebtedness." Homelifa Investments owns and runs five nursing homes for the elderly.

Earlier this year McCarthy said that the economic climate was hitting the sbeltered homes market and that it was experiencing a severe reduc-tion in sales of retirement homes in the south of England. It began a series of restructur-ing moves, including staff cuts and the sale of its headquarters building in Bournemouth The company said yesterday it was "continuing to experience difficult trading conditions" but that it "believes Spring 1990 will see the return to an improving market." An analyst said: "I think it has taken the biggest knock it is likely to take, though people are still nervous and it will thus remain a bit weak." As FT-A Ali-Share Index 1250 for the possibility of paying back the "sweetener", the ana-lyst said: "Even if British Aero-1150 space has to pay back that money. Rover is still a bar-gain." Another analyst said that it was unlikely that BAe 1100 Mar C

would be made to repay the money But it was not all doom and gloom around British Aero-space and the company announced it was forming a

joint venture with Asda, the supermarket chain. Abbey sold

Abbey National was active with almost 8m shares changing hands. Dealers said the

165p but then began to wilt in the face of concerted selling by small investors to close a net 2 off at 161p. The shares were floated in July at 130p spiece. "The small private investor,

who probably speaks for around 80 per cent of Abbey shares, has been selling them with a view to re-investing in the water flotations. He is also selling Abbey to help pay for Christmas," said Mr John Wriglasworth of UBS Phillips & Drew. He advised buying Abbey on any weakness."

The clearing banks were up and running hard at the outset, with buyers' appetites whetted by talk of further strong support from Japanese institu-tions, a stock shortage and a positive note on the sector from **UBS** Phillips & Drew. The UBS banks team rates the whole sector a buy, stresses that LDC debt "is basically a pest problem," and says inves-tors, "should turn to the domestic prospects for the banks with their scope for enhanced earnings",

Dow defies doubts to make gains

Wall Street

THE new-found optimism in the stock market remained in place yesterday despite more data pointing to weakness in the economy, writes Janet Bush in New York.

At 2 pm, the Dow Jones Industrial Average was quoted 6.83 points higher at 2,754.48 on moderately active volume of 92m ahares. Yesterday's modest midsession gains built on last week's substantial rally and Friday's gain of 41.38 points to 2,747.65, the blue chip index's highest close since the mini-crash of October 13.

Gains were somewhat selec-tive, bowever. While the Standard & Poor's 500 index and the Nasdaq Composite ware both marginally higher at midsession, the American Stock Exchange index was quoted 1.36 point lower at 374.22.

rates

The stock market appears to

THERE wers solid gains almost across the board, with

West Germany again taking the lead, writes Our Markets

Staff. FRANKFURT extended its

rally to a fourth straight day in turnover of DM8.8bn, down

from over DM10bn last Friday

but still at an extraordinarily

high level. The strength of the D Mark and prospects in Europe brought in heavy for-

eign buying, and high-profile blue chips gained accordingly. Deutsche Bank, which post-

poned indefinitely a press con-ference planned for tomorrow

following last week'a murder of

its chief executive, Mr Alfred Herrhausen, headed the active

stocks list in turnover of

DM1bn with its shares up DM7 to DM730. It was followed by

Mannesmann, up another DM11 to DM328.50 on its cellu-

lar telephone prospects, and Siemens DM8 higher at DM656

and a popular brokers' choice for the Christmas buying rush.

respectively, taking the FT-Ac-tuaries World Index up 2.15 per cent - its best since a rise of exactly that extent in the week to January 27 of this year. In the European engins room, France nearly trebled the previous week's gains with a rise of 3.2 per cent. Its Finance Minister, Mr Pierre Beregovoy, dispelled fears of higher Interest rates last Thursday and, in London, stockbrokers UBS Phillips Drew noted that inflation had

been slowed: "Within the over-all husiness sector," they said, "unit labour costs in 1968-89 Singapore Canada have risen only shout half as fast in France as the European USA Mexico ... average." West Germany absorbed the South Africa WORLD INDEX

shock of the terrorist murder of Deutsche Bank chief executive, Mr Alfred Herrhausen, which actually seemed to cre-ate a note of defiant bullishness in the stock market. Already huoyant on the transformation of Eastern Europe. Germany was fired on Friday by strong rumours that a Man nesmann-led international consortium would win a cellular telephone network licence from the Deutsche Bundespost; that day gave it the best part of the week's rise, in high turn-

"Wild card" investment themes for 1990

the back of higher oil prices, although trading remained thin. The all-share index closed

ally lower in moderate volume. Saab continued to be in demand as its talks with Fiat proceeded. While the Affärsvärlden General index lost 5.9 to 1.154. Saah free B shares rose SKr6 to Skr243.

Europe is growing faster rel-ative to the rest of the world than it has before, and Phillips & Drew forecasts that gross national product will increase by about 3 per cent a year in the early 1990s, compared with less than 2 per cent for the US and UK and about 4 per cent

The securities house also argues that continental Euroan markets are cheaper and is recommending an overweight position there for global investors; within the Continent, it favours West Germany, France and Spain and would avoid Italy and

Sweden. Mr Rigden acknowledged that liking the Spanish market was unfashionable, given fears of overheating. But he said the Gonzalez Government would attempt to rein in consumer spending without destroying

economic and corporate profits growth. P&D forecasts that earnings will grow by 18 per cent in Spain next year, and by 12 per cent in both West Germany and France.

On the monetary side, Dr Richard Reid, chief European economist, said political resistance from most governments made it unlikely that there would be a realignment of European exchange rates

before 1991, when Kuropean economic growth would have slowed. "The Bundesbank, frastrated in its desire for a realignment, is thus almost certainly going to tighten monetary policy again in the near fature," he concluded.

SOUTH AFRICA

IN SPITE of a downward drifting bullion price, gold shares firmed on bullish sentiment. The JSE all-gold index finished at a preliminary 2,132, up 12 points.

feature was in the Nordic area, where Sweden posted the best rise of the week. Mr David Longmuir of Kleinwort Betson Longmuir of Klemwort Schoon notes that, before last week, Stockholm had been drifting lower on worries about interest rates and 1990 inflation pros-pects. Renewed domestic insti-tutional interest, he says, was what transport worked. what turned it round.

Something similar applied in Norway. The specific fear for early 1990 thera is unfavourable wage settlements, but domestic investora cams wheeling back into shipping, offshore and oils stocks. Mr Longmuir is not so sanguine. about Finland; he sees last week's rise as, at best, a mar-ginal recovery in a bombed-out market, which is worried that the economy is out of control.

In a string of improvements around the Pacific Rim, the odd market ont was. Hong Kong with a decline of 2.1 per cent. Brokers Hoare Govett said at the end of last week that market activity had been "appallingly low," and that a slightly disappointing land auction in mid-week added selling pressure.

daily rises. People are saying that Japanase institutional investora have huge piles of cash and are willing to commit it with interest rate, currency and political issues in apparent equilibrium.

formed strongly. There wera gains both in blue chips such as Lafarge Coppes, FFr45 ahead at FFr1,481, and in smaller huilders like Pollet, which jumped FFr35 to FFr651. MILAN saw active buying of the Ferruzzi gronp on the L3.600bn sale of its La Fondiaria insurance group to Mr Camillo De Benedetti; and heavy selling pressure on group companies of Mr Carlo De Benedetti, his cousin, in response to his apparent loss of control of the Mondadori pub-lighting group. The Comit index moderate voinme worth F1 845m, helped by Wall Street's gains on Friday and a slightly stronger Dutch bond market. The CBS tendency lishing group. The Comit index closed 2.94 higher at 670.21, due mostly to a L62 rise in Monted-ison to L2,028. index was up 2.1 at 187.6. NatNed, the insurer, was

accepted their joint hld for

Enasa a Spanish truck maker.

Ferruzzi Finanziarla was unusually the day'a most suspended following the weekactive share, rising 90 cents to F1 72.80. it was the subject of a end announcement, but Ferruzzi Agricola rose L65 to L2,560. Fondiaria and Gaic, the holding company controlled by Mr Camillo de Benedetti, were also suspended. Mr Carlo De Benedetti's

holding company, Cir, was sold down to L4,930 from L5,085 and slipped to L4.870 after hours. PARIS enjoyed a strong day for blue chips and other recent laggards and the OMF 50 index gained 6.28 to 532.53 in reason-

abla turnover estimated at FFr3bn or above. Asea Brown Boveri, announced Investors have ditched their immediate fears of higher interest rates and appear to be

favourable article in an investment magazine and has a presentation in London today. Hoogovens, the steel company, recovered further ground from its recent lows, adding F13.30 to F186.70. Its high for this year was Fl 122. ZURICH nudged higher in light trading, with the Credit Suisse index up 3.3 at 630.5. Brown Boveri rose SFr35 to SFr5,210 as its 50 per cent owned international arm, ABB

a joint venture with Rolls Royce to supply power plants. COPENHAGEN was buoyant taking their cue from gains in on the news of the country'a

second banking merger within a month. Market optimism was further boosted by Friday's hudget agreemsnt by the minority Government. The bourse index rose 6.3 to 358.94. The announcement of the long-awaited merger of Privat-AMSTERDAM rose solidly in banken, SDS and Andelbanken depressed their share prices. however, Privatbanken losing DKr7 to DKr319, SDS falling DKr2 to DKr318 and Andelbanken DEr5 to DEr373. Other banking shares gained, as did industrials. **HELSINKI** rose on active trading, the Unitas all share index gaining 10.2 to 636.6.

Nokia was one of the most heavily traded stocks, its free shares rising FM3 to FM88: it announced a major restructuring and a fail in consumer sales.

OSLO finished strongly on 5.66 un at 628.93.

slump and then recovery in Bond Corp.

active trading of 35.6m shares. The planned listing of a Mit-sui subsidiary has been sup-porting the issue, but yester-day's buying appeared to stem from dealer interest related to The All Ordinaries index rose 21.7 to 1,646.4 In modest turnover of 94m shares worth A\$191m, amid optimism that huge increase in trading in interest rates would come down soon

Bond Corp dropped to an all-time low of 13 cents on reports that the company might collspse, and then it rebounded to close unchanged at 20 cents.

Bond Media eased 1 cent to 16 cents after Friday's bid from Mr Kerry Packer, which values the company at 10 cents a ahar

HONG KONG tried to follow Wall Street, and nearly failed as a 30-point opening surge was chooped back by profit taking. The Hang Seng index gained 10.56 points to 2,767.46, but turnover was the thinnest in a month at HK\$567m, down from HK\$624m last Friday. -TAIWAN initially plunged

following opposition gains in last Ssturday's elections, but then recovered a little to end with the weighted index down 265.43, or 3 per cent, at 8,665.85
